

The background of the entire image is a photograph of a multi-story apartment building. The building's facade is covered in a dense network of brown metal scaffolding, indicating ongoing construction or renovation. The building has multiple windows, some of which are visible through the scaffolding. The overall color palette is dominated by the brown of the scaffolding and the grey and white of the building's exterior.

Pannell, Christopher J. Smith, Youqin Huang, 2011-07-16 Despite China's obvious and growing importance on the world stage it is often and easily misunderstood Indeed there are many Chinas as this comprehensive survey of contemporary China vividly illustrates Now in a thoroughly revised and updated edition that offers the only sustained geography of the reform era this book traces the changes occurring in this powerful and ancient nation across both time and space Beginning with China's diverse landscapes and environments and continuing through its formative history and tumultuous recent past the authors present contemporary China as a product of both internal and external forces of past and present They trace current and future successes and challenges while placing China in its

international context as a massive still developing nation that must meet the needs of its 1.3 billion citizens while becoming a major regional and global player. Through clear prose and new dynamic maps and photos, China's Geography illustrates and explains the great differences in economy and culture found throughout China's many regions. *China's Social Policy* Kinglun Ngok, Chak Kwan Chan, 2015-10-23. This book critically and comprehensively examines China's welfare development amidst its rapid economic growth and increasing social tensions. It covers the main policy areas from China's inception of the open door policy in 1978 to the new administration of Jinping Xi and Keqiang Li, including social security, health, education, housing, employment, rural areas, migrant workers, children, and young people, disabled people, old age pensions, and non-governmental organisations. In particular, it critically analyses the impact of policy changes on the well-being of Chinese people. *Social Inequality In China* Yaojun Li, Yanjie Bian, 2022-12-05. This book provides a comprehensive analysis of the patterns and trends of socio-economic development and social division in contemporary Chinese society. It discusses the determinants, manifestations, and consequences of social inequality in the last 40 years, with particular regard to social mobility, educational attainment, social capital, health, labor market position, including employment, opportunity, career advancement, and earnings, housing, wealth, and assets, urbanization, social integration of migrant, peasant workers into urban life, social protest, and civic engagement, subjective well-being, and subjective social status. **Confronting the Challenges of Urbanization in China** Zai Liang, Steven F. Messner, Youqin Huang, Cheng Chen, 2016-08-05. Since the late 1970s, China has experienced an unprecedented pace of urbanization. In 1978, only 17.8% of the population resided in urban areas, but by 2013, the level of urbanization had reached 53.8%. During the same period, China also enjoyed spectacular economic growth. China had become the second largest economy in the world by 2012, just behind the United States. Despite China's highly acclaimed achievements in urbanization and its economic miracle, urban China confronts a set of significant challenges. This book provides theoretically informed and empirically rich analyses of some of the key challenges facing China's urbanization. The first part deals with new patterns of urbanization, focusing on comprehensive measures and environmental dimensions of urbanization. The second part of the book focuses on several aspects related to migrants in cities: migrant entrepreneurship, return migration, and local people's attitudes toward migrants. The final section examines two key issues important for migrants, urban local residents, and policy makers that have become quite contentious in China today: housing and urban health care. This collection presents original, cutting-edge research on some of the most pressing challenges confronting contemporary urban China, conducted by researchers from multiple social science disciplines. It will appeal to scholars and advanced students of urban studies and China studies, as well as those in sociology, anthropology, geography, and political science. **China: Regaining Growth Momentum after the Pandemic** Ligang Song, Yixiao Zhou, 2024-12-13. The slower growth of the Chinese economy in the aftermath of the pandemic has prompted the Chinese Government to adopt measures to boost domestic consumption and deepen structural reform, with the effectiveness of such policies beginning to be felt.

However China still faces challenges that will affect its growth dynamics down the track These include the slowdown of its real estate sector the complex internal and external environments for macroeconomic policy the high level of income inequality weak growth in investment by the private sector negative population growth high levels of debt deglobalisation weakness in the financial sector and equity markets the inadequacy of its fiscal system and the imperative to decarbonise the economy China must confront these challenges to maintain growth momentum and achieve higher levels of income and living standards The theme of the 2024 China Update book is China Regaining Growth Momentum after the Pandemic It discusses some of the challenges and policy issues that are being watched with keen interest by decision makers and markets alike including What are the obstacles to economic growth in the aftermath of the pandemic and how can these be overcome What are the key challenges and opportunities for China to move to the next level of development against the backdrop of negative population growth Is it time for a Tax Sharing System Reform 2.0 to consolidate China's fiscal position What are the challenges facing China's small and medium enterprises How is China's business environment faring and what are the implications for investment How does China's urban housing affordability impact its low fertility rate How will the trade conflict between China and the United States play out regarding semiconductors and other high tech products How does China Africa bilateral agricultural trade impact on African rural transformation

China's High Savings: Drivers, Prospects, and Policies Ms.Longmei Zhang,Mr.Ray Brooks,Ding Ding,Haiyan Ding,Jing Lu,Rui Mano,2018-12-11 China's high national savings rate one of the highest in the world is at the heart of its external internal imbalances High savings finance elevated investment when held domestically or lead to large external imbalances when they flow abroad Today high savings mostly emanate from the household sector resulting from demographic changes induced by the one child policy and the transformation of the social safety net and job security that occurred during the transition from planned to market economy Housing reform and rising income inequality also contribute to higher savings Moving forward demographic changes will put downward pressure on savings Policy efforts in strengthening the social safety net and reducing income inequality are also needed to reduce savings further and boost consumption

Urban China The World Bank;Development Research Center of the State Council,2014-07-29 In the last 30 years China's record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor cheap land and good infrastructure While China has avoided some of the common ills of urbanization strains are showing as inefficient land development leads to urban sprawl and ghost towns pollution threatens people's health and farmland and water resources are becoming scarce With China's urban population projected to rise to about one billion or close to 70 percent of the country's population by 2030 China's leaders are seeking a more coordinated urbanization process Urban China is a joint research report by a team from the

World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive, and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use; denser cities; modernized agriculture; and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.

China's Emerging Middle Class Cheng Li, 2010-11-15. Decades ago there was no distinct middle class in the People's Republic of China. Any meaningful discussion of China's economy, politics, or society must take into account the rapid emergence and explosive growth of the Chinese middle class. This book details the origins and characteristics of this dramatic change.

Misery beneath the Miracle in East Asia Arvid J. Lukauskas, Yumiko Shimabukuro, 2024-12-15. Misery beneath the Miracle in East Asia challenges prevailing views of the East Asian economic miracle. Existing scholarship has overlooked the severity, persistence, and harmful consequences of the social welfare crises affecting the region. Arvid J. Lukauskas and Yumiko Shimabukuro fill this gap and put a major asterisk on East Asia's economic record. Combining big picture analysis, abundant data, a dynamic interdisciplinary framework, and powerful human stories, they shed light on the social ills that governments have failed to address adequately, including low wages, child abuse, elderly poverty, and substandard housing. One of the major forces behind the multidimensional welfare crises is the region's productivist welfare strategy, which prioritizes economic growth while abandoning a robust social safety net, leaving the most vulnerable segments of society largely unprotected. Misery beneath the Miracle in East Asia brings the region into debates over the dangers of seeking growth at all costs that are currently embroiling the United States and other advanced

industrialized countries.

The City after Chinese New Towns Michele Bonino, Francesca Governa, Maria Paola Repellino, Angelo Sampieri, 2019-03-04 By 2020 some 400 Chinese New Towns will have been built representing an unprecedented urban growth While some of these massive developments are still empty today others have been rather successful The substantial effort on the part of the Chinese government is to absorb up to 250 million people chiefly migrants from the rural parts of the country Unlike in Europe and North America where new towns grew in accordance to the local industries these new Chinese cities are mostly built to the point of near completion before introducing people The interdisciplinary publication written by architects planners and geographers explores the new urbanistic phenomenon of the Chinese New Town Especially commissioned photographs and maps illustrate many examples of these new settlements

The Geographical Transformation of China Michael Dunford, Liu Weidong, 2014-10-17 The aim of this book is to examine the transformation of the geography of China in the years since the start of China's policy of reform and opening up in 1978 as seen through the eyes of Chinese geographers Throughout that period Chinese geographers have studied these environmental economic political and cultural processes closely drawing on sources that are far from easy to access and have published their results in Chinese Much of this research has underpinned the Chinese government's assessment of policies and the policy choices at different levels yet it is not well known outside of China This volume deals with aspects of the socio economic geography of China's transformation including its changing relations with

the rest of the world although it also deals with the impact of China's development path on the country's ecological systems. Each chapter deals with aggregate trends and specific cases to show the ways in which the particular characteristics of China's economic and social order, economic organization, political system, and cultural model and values have shaped and are shaped by its geography.
