China's WTO Accession Reassessed Wang Luolin, 2015-02-20 China's accession to the World Trade Organisation in 2001 was a highly significant event both for China and for the wider world. This book argues that although at the time some people doubted the likely benefits, China's WTO accession has been highly successful. It discusses how China has abided by its commitment to WTO terms and how WTO membership has contributed to China's reform and opening up, explores how vastly increased co-operative exchange with many countries around the world has been mutually beneficial in a range of fields including trade, science and culture, and shows how China's WTO membership has been a great stimulus both for China's economy and the world economy. The book considers the subject from a number of perspectives and draws out lessons for future reform and development for China and for China's relations with the rest of the world, emphasising the need to maintain a win-win approach.

Understanding China Peter Nolan, 2015-10-23 If the West wishes to understand China better, it needs to appreciate the depth of thought and range of debate that is taking place within the Chinese political system. China is entering a new and complicated phase in its development. From a minnow in the 1970s, it has become a mighty player on the global stage. It is likely that its role in the global economy and international relations will continue to expand. Today, despite its vast size, China is still a developing country. The country's leaders in the Communist Party of China face innumerable policy challenges. Two key issues facing the Party are its role in the Asia-Pacific region and the ideological legacy from Karl Marx. The CPC is engaged in deep research, debate and reflection on both of these questions. This study provides a unique, in-depth insight into these critically important issues for the evolution of China's political economy.

Chinese Economists on Economic Reform - Collected Works of Lou Jiwei Lou Jiwei, 2013-12-04 This book is part of a series which makes available to English-speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform. The series provides an inside view of China's economic reform, revealing the thinking of the reformers themselves, unlike many other books on China's economic reform which are written by outside observers. Lou Jiwei, 1950, has been a leading researcher on economic restructuring and macroeconomic policy in a range of Chinese policy-making organisations. He has made important contributions to policy in the fields of tax, accounting, finance and banking. In the 1990s, a vice-minister of finance, and from 2007, deputy secretary general of the State Council, he is also at present head of China's sovereign wealth fund. The book is published in association with the China Development Research Foundation, one of the leading economic and social think tanks in China, where many of the theoretical foundations and policy details of economic reform were formulated.

Demographic Developments in China China Development Research Foundation, 2014-06-05 This book assesses current developments in China's demography and discusses the changes which should be implemented to bring policy into line with the current demographic situation. It argues that population planning, which was introduced in the early years of the People's Republic alongside economic planning, including the one-child policy, is no longer appropriate. It considers the results of the 2010 census, which showed the very significant shifts that are occurring, including a declining rate

of population growth ongoing growth of the number of people in the floating population an increasingly imbalanced sex ratio among newborn children and ongoing ageing of the population Besides discussing population planning policy the book also examines how policies in the fields of education health gender relations child development in rural areas and policies for the elderly and families should be adjusted to accommodate demographic developments Chinese Economists on Economic Reform - Collected Works of Chen Xiwen Chen Xiwen,2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Chen Xiwen 1950 has made major contributions to economic policy making on agricultural development and the rural economy Although born in Shanghai he was one of the young people sent down to the countryside in the late 1960s to work in a production and construction corps He has held a number of government and academic positions notably director of the Rural Economy Research Department of the State Council and Vice President of the Development Research Centre of the State Council The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated **China's Urbanization in the New Round of Technological Revolution, 2020-2050** Wang Wei,Deng Yusong,Niu Sanyuan,Wang Ruimin,Shao Ting,Zhao Yong,Liu Xin,2024-04-16 Based on a major research project undertaken by a team at the Institute of Market Economy Development Research Center of the State Council of China a project which included extensive survey research and involved also many international scholars including researchers at the World Economic Forum Research Center and OECD this book explores the possible future trajectories for urbanization in China The book argues drawing on examples from around the world that technological advances have a huge impact on the exact nature of urbanization and that institutions and policies have a significant role too institutional arrangements such as modern education systems patents and intellectual protection and modern corporate systems The book goes on to assess how current technological advances are likely to affect future urbanization and concludes by setting out how China should seize the opportunities from new technological advances and the associated transformation and upgrading of economic and social structures and coordinate the development of technology factors of production industry and institutions as an integrated engine for high quality future urbanization *A New Development Model and China's Future* Deng Yingtao,2014-04-24 The need for China to find a new environmentally sustainable development path is accepted widely among Chinese scholars and policy makers This book makes available for the first time to an English speaking audience Deng Yingtao's ground breaking book *New Development Model and China's Future* Published in 1991 the book was far ahead of its time Deng subjects the development model of the high income countries to rigorous analysis and explores the environmental implications of China following this model His

clear conclusion is that the carrying capacity of the physical environment and nature is limited that economic and social development should not exceed the carrying capacity of resources and that China should not adopt the western development path Based on insights from economics engineering and human psychology the book analyses the environmental impact of the current western development model demonstrates the catastrophic impact this would have in terms of China's own development and in terms of China's relationship with the world and argues that China's rich intellectual and scientific tradition will allow Chinese people to play a central role in finding the solution to the profound environmental and development challenges the world currently faces China's Exchange Rate Regime China Development Research

Foundation,2014-12-05 The imbalance between China's currency the RMB and those of other countries is widely regarded as a major problem for the world economy There was a reform of China's exchange rate mechanism in 2005 following which the RMB appreciated 17% against the US dollar but many people argue that further reform is still needed This book reports on a major research project undertaken following the 2005 reform to assess the impact on China's economy It considers the impact in a number of areas of the economy including export oriented companies the banking industry international trade international capital flows and China's macroeconomic policy It concludes that the policies pursued so far have been correct and that further reform both to the exchange rate and to the system overall would be desirable but that any reform should be gradual and incremental preserving economic stability and integrating changes with reform in other parts of the economy

Chinese Economists on Economic Reform - Collected Works of Yu Guangyuan Yu Guangyuan,2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Yu Guangyuan 1915 is a famous Chinese philosopher and economist A member of the Chinese Communist Party from 1937 he has made significant contributions in the fields of Marxist theory and in state planning He was head of the Political Research Office of the State Council from 1975 and the first director of the Economic Research Institute of the State Planning Commission He has held many other important posts and was editor in chief of the Dictionary of Economics The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated **China's**

Centralized Industrial Order Chen Li,2014-11-13 This book is about the political economy of China's industrial reform and the rise of a group of Chinese big businesses under the Communist Party and the central state's control It examines the origins evolution and institutional configuration of this centralized system in governing the commanding heights of the Chinese industrial economy Shaped by persistent industrial policies to develop China's national champions enterprises the core parts of China's central industrial ministries and mono bank system have been transformed into a national team of giant

modern business firms in industries such as oil power generation telecommunications aerospace aviation nuclear shipbuilding mining construction automobile and banking Through an adaptive process of learning experimentation and restructuring the bedrock of the authority relations and control mechanisms among the Party government bureaucracy and firms has been consolidated rather than dismantled in the system s transformation This alternative view of China s industrial reform presents a direct challenge to the neo liberal transition model of China s institutional development and the mainstream Western conceptions of Chinese big business

US-China Relations in the Twenty-First Century Michael Tai,2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty first century In the West China s rise is often portrayed as a threat and China seen in negative terms This book explores the dynamics of this crucial relationship It looks in particular at what causes an international relationship to be perceived negatively and considers what can be done to reverse this arguing that trust is a key factor It goes on to discuss US and Chinese rhetoric and behaviour in three key areas climate change finance and international security The book contends that contrary to much US rhetoric China s actions in these areas is often much more flexible and accommodating than the US position and that the Chinese are much more knowledgeable about and understanding and appreciative of the United States than vice versa

The City after Chinese New Towns Michele Bonino,Francesca Governa,Maria Paola Repellino,Angelo Sampieri,2019-03-04 By 2020 some 400 Chinese New Towns will have been built representing an unprecedented urban growth While some of these massive developments are still empty today others have been rather successful The substantial effort on the part of the Chinese government is to absorb up to 250 million people chiefly migrants from the rural parts of the country Unlike in Europe and North America where new towns grew in accordance to the local industries these new Chinese cities are mostly built to the point of near completion before introducing people The interdisciplinary publication written by architects planners and geographers explores the new urbanistic phenomenon of the Chinese New Town Especially commissioned photographs and maps illustrate many examples of these new settlements

China's Urban Century François Gipouloux,2015-11-27 The achievements of China s urbanization should not be evaluated solely in terms of adequate infrastructures but also in their ability to implement sound governance practices to ensure social environmental and economic development This book addresses several key challenges faced by Chinese cities based on the most recent policies and experiments adopted by central and local governments The contributors offer an interdisciplinary analysis of the urbanization process in China and examine the following key topics the institutional foundations of Chinese cities the legal status of the land the rural to urban migration the preservation of the urban heritage and the creation of urban community and the competitiveness of Chinese cities They define the current issues and challenges emerging from China s urbanization Students and academics of urban studies and related subjects will find the strong theoretical backgrounds to be of use to their research Policy makers and other practitioners will benefit from the practical
