The Latecomer's Rise Muyang Chen, 2024-06-15 In *The Latecomer's Rise* Muyang Chen reveals the nature and impact of a rapidly growing form of international lending Chinese development finance Over the past few decades China has become the world's largest provider of bilateral development finance Through its two national policy banks the China Development Bank CDB and the Export Import Bank of China China Exim it has funded infrastructure and industrial projects in numerous emerging markets and developing countries Yet this very surge and magnitude of capital has raised questions about the characteristics of Chinese bilateral lending and its repercussions on the international order Drawing on a variety of novel Chinese primary sources including interviews and official bank documents Chen pinpoints the distinctiveness of Chinese bilateral development finance explains its origins and analyzes its effects She compares Chinese policy banks with their foreign counterparts to show that the CDB and China Exim while state supported are in fact also market oriented they are as much government organs as they are profit driven financial agencies that serve both state and firms interests This approach

which emerged out of China's particular economic history suggests that Chinese overseas lending is not merely a tool of economic statecraft that challenges Western led economic regimes. Instead, China's responses to extant rules, norms and practices across given issue areas have varied between contestation and convergence. Rich with empirical detail and penetrating insights, *The Latecomer's Rise* demystifies the little known workings of Chinese development finance to revise our conceptions of China's role in the international financial system. *The Future of Chinese Capitalism* Gordon Redding, Michael A. Witt, 2007-12-06

Much has been said about the re-emergence of China to its historical position of eminence in the world economy, yet little is understood about the kind of economic system China is evolving. What are the rules of the game of business in today's China and how are they likely to change over the next decades? The answers to these questions are crucial to business persons formulating strategy toward China but also for policy makers concerned with retaining the competitiveness of their nations in the face of Chinese competition and for researchers seeking to gain deeper insights into the workings of economic systems and institutional change. Written by two leading experts in the field, this book sheds much needed light on these questions. Building on recent conceptual and empirical advances and rich in concrete examples, it offers a comprehensive and systematic exploration of present day Chinese capitalism, its component parts and their interdependencies. It suggests that Chinese capitalism as practiced today in many respects represents a development from traditional business practices whose revival has been greatly aided by the influx of investments and managerial talent from the Regional Ethnic Chinese. On the basis of present trends in the Chinese economy as well as through comparison with four major types of capitalism—those of Germany, Japan, Korea and the United States—the book derives a prediction of the probable development paths of Chinese capitalism and its likely competitive strengths and weaknesses. China's Capitalism Tobias ten Brink, 2019-02-14

Since 1978, the end of the Mao era, economic growth in China has outperformed every previous economic expansion in modern history. While the largest Western economies continue to struggle with the effects of the deepest recession since World War II, the People's Republic of China still enjoys growth rates that are massive in comparison. In the country's smog-choked cities, a chaotic climate of buying and selling prevails. Tireless expansion and inventiveness join forces with an attitude of national euphoria in which anything seems possible. No longer merely the workshop of the world, China is poised to become a global engine for innovation. In *China's Capitalism*, Tobias ten Brink considers the history of the socioeconomic order that has emerged in the People's Republic. With empirical evidence and a theoretical foundation based in comparative and international political economy, ten Brink analyzes the main characteristics of China's socioeconomic system over time, identifies the key dynamics shaping this system's structure and discusses current trends in further capitalist development. He argues that hegemonic state-business alliances, mostly at the local level, relative homogeneity of party-state elites, the maintenance of a low wage regime and unanticipated coincidences between domestic and global processes are the driving forces behind China's rise. He also surveys the limits to the state's influence over

economic and social developments such as industrial overcapacity and social conflict Ten Brink's framework reveals how combinations of three heterogeneous actors party state institutions firms and workers led to China's distinctive form of capitalism Presenting a coherent and historically nuanced portrait China's Capitalism is essential reading for anyone interested in the socioeconomic order of the People's Republic and the significant challenges facing its continuing development
