The Metaphysical Theory of Egalitarian Economics Jo M. Sekimonyo, 2018-11-18

What is the catalyzer of the ballooning the social economic and social gap between the gang of robber barons and captains of industry and the rest By the end of the twentieth century every social commerce and trade and political constructs underwent more than rhinoplasties in a desperate effort to escape responsibility A global system underlying the extremely unequal distribution of wealth and power has kept the profane views of the laboring class and hierarchical arrangements between commerce and trade actors the same Conspiracy rules and success myths do work Every existing doctrine compresses the ambiance of the love affair with untamable disillusion Thanks to capitalism as the story goes poor white women and children as humans was recognized Somehow everyone else also found their way through the golden age of self enslavement into the human centipede We have all metamorphosed into efficient slaves

The Evolution of Chinese Filiality Deborah Lynn Porter,2022-03-10 This unique book brings a fresh interdisciplinary approach to the analysis of ancient Chinese history creating a historical model for the emergence of cultural mainstays by applying recent dramatic findings in the fields of neuroscience and cultural evolution The centrality in Chinese culture of a deep reverence for the lives of preceding generations filial piety is conventionally attributed to Confucius 551 479 B C who viewed hierarchical family relations as foundational for social order Here Porter argues that Confucian conceptions of filiality themselves evolved from a systemized set of behaviors and thoughts a mental structure which descended from a specific Neolithic mindset and that this psychological structure was contoured by particular emotional conditions experienced by China s earliest farmers Using case study analysis from Neolithic sky observers to the dynastic cultures of the Shang and Western Zhou the book shows how filial piety evolved as a structure of feeling a legacy of a cultural predisposition toward particular moods and emotions that were inherited from the ancestral past Porter also brings new urgency to the topic of ecological grief linking the distress central to the evolution of the filial structure to its catalyst in an environmental crisis With a blended multidisciplinary approach combining social neuroscience cultural evolution cognitive archaeology and historical analysis this book is ideal for students and researchers in neuropsychology religion and Chinese culture and history
