Tribute System and Rulership in Late Imperial China Ralph Kauz,Morris Rossabi,2022-04-11 Demanding and offering tribute is a most common feature in human societies and nothing special to China In the course of the development of Neolithic and later societies social classes have developed where persons who achieved superior positions first could demand presents or tribute from neighboring societies they defeated and then with the assistance of sturdy servants from their own people China was certainly no exception to that principle and one of the first terms for tax was thus gong tribute In China s early feudatory social system tribute was demanded from lower political entities and the mutual political relations were already highly developed during the Zhou dynasty 1045 256 BCE This system of inner Chinese relations became a sort of matrix when China expanded and achieved contact with countries which were more or less independent and thus the tribute system evolved The individual case studies in this volume focus on the latest manifestations of the tribute system in late Imperial China A China Business Primer Michael A. Santoro,Robert Shanklin,2021-04-27 The COVID 19 pandemic underscored longstanding fissures in China s business relationships with the West If the West is going to develop a relationship of mutual trust and improve business relations with China in the coming decades it is imperative to understand how to engage with Chinese thinking on ethics in business this book explains how Government officials businesspeople and business ethicists have trouble communicating about issues in ethics policy and business across the China West divide This book shows how to overcome the us versus them mindset plaguing China West relations by presenting to Western audiences an easy to understand yet deeply informed primer on core ideas and perspectives in Chinese cultural and philosophical thought The book considers original texts of Chinese philosophy and religion and applies principles from those writings to three business ethics topics of enduring interest to business executives government officials and academics namely the protection of intellectual property assurance of product safety and quality in the pharmaceutical supply chain and human rights This book is a must read for those who want to forge constructive relationships with their Chinese counterparts based on mutual trust and understanding The book is specifically relevant to business executives but it should also be of interest to policymakers educators and students who seek to communicate more effectively with their Chinese counterparts in particular about difficult and contentious business policy and ethical issues
