**Local Elites in Post-Mao China** Yingjie Guo, 2018-03-15 This book provides fresh insights into the study of Chinese elites at the county level and below By shifting the analytical focus onto the agency of elites at the local level and away from the institutional structures within which they operate it fills a number of significant gaps in the field In particular this book addresses the lacunae through an empirically rich and diverse set of case studies It proceeds from the premise that the study of local elites can be most fruitful through examining their relations with each other and with the groups that wield power in the community Particularly pertinent to the analyses are three major relations namely the relationship between the elites and their environment between particular types of elites and between the locality and the upper and lower scales Ultimately it concludes that these relations are not only essential to understanding local elites in post Mao China but also in accounting for socio political change and in distinguishing China from other types of societies As a study of local elites in China this book will be useful to students and scholars of Chinese politics political sociology and Chinese Studies in general

**State-Society Relations in the People's Republic of China Post-1949** Tony Saich, 2016-05-30 This review essay provides an analytical review of the most important works on the evolving nature of the state society relationship in China post 1949 It is not intended to provide a new theoretical framework for understanding state society relations rather the goal is to draw together the most important analyses in Western and Chinese writings We begin by looking at the changing role of two key institutions that have been used by the state to manage society the household registration system and the workplace The analysis of the Maoist period looks at theories derived from Soviet studies as well as those that draw on the Chinese Communist Party's own experiences pre 1949 We complete the review by looking at competing theories such as civil society corporatism or authoritarian resilience that seek to define the relationship and then look in depth at how to categorize the variety of state society relations at the local level

**Class and the Communist Party of China, 1978-2021** Marc Blecher, David S G Goodman, Yingjie Guo, Jean-Louis Rocca, Beibei Tang, 2022-02-24 By examining the changing political economy in China through detailed studies of the peasantry workers middle classes and the dominant class this volume reveals the Communist Party of China's

CCP's impact on social change in China between 1978 and 2021. This book explores in depth the CCP's programme of reform and openness that had a dramatic impact on China's socio-economic trajectory following the death of Mao Zedong and the end of the Cultural Revolution. It also goes on to chart the acceptance of Market Socialism highlighting the resulting emergence of a larger middle class while also appreciating the profound consequences this created for workers and peasants. Additionally, this volume examines the development of the dominant class which remains a defining feature of China's political economy and the Party state. Providing an in-depth analysis of class as understood by the CCP in conjunction with sociological interpretations of socio-economic and socio-political change, this study will be of interest to students and scholars of Chinese Politics, Chinese History, Asian Politics and Asian studies.

**From Rebel to Ruler** Tony Saich, 2021-07-06. On the centennial of the founding of the Chinese Communist Party, Tony Saich offers the definitive history of the CCP's rise and rule. The party has suffered self-inflicted wounds yet thrived thanks to its flexibility. *Polarized Cities* Dorothy J. Solinger, 2018-09-14. This powerful book presents a fresh and compelling set of portraits that bring to life the human dimension of the vast and growing social and economic divides in urban China. Leading scholars explore the increasing rigidity of class and social boundaries, focusing on two new castes in contemporary China's cities: the immensely wealthy and the abjectly poor. Much has been made of the rise in incomes, the elimination of much rural poverty, and the expansion of an urban middle class over almost forty years of spectacular economic growth. But what often has been overlooked is the polarization, exclusion, and exclusiveness in cities that have accompanied this rise, along with the threat that these trends will extend to future generations. The book considers five cases that emblemize these castes and depict their varying degrees of agency. Highlighting the social groups at opposite ends of the social hierarchy, the contributors illuminate the growing inequality in urban China today.

**Global Governance** Edward A. Kolodziej, 2021-11-29. How do we prevent the next pandemic? Will governments successfully tackle climate change? Will they find ways to close the gap between the haves and have-nots and to eliminate poverty? Which solution, democratic or authoritarian, will determine the global governance of a flawed nation-state system? This unique contribution to global studies advances a multidisciplinary theory that the governments of all human societies are the tenuous outcome of the competing solutions to the Imperatives of Order, Welfare, and Legitimacy (OWL). The OWL paradigm provides a common framework to evaluate the contrasting responses of the liberal, democratic, Chinese, and Russian solutions to global governance. Underscored is the volume's contention that global governance is the overriding issue confronting nation-states and the diverse and divided peoples of what is now a global society for the first time in the evolution of the species. The volume addresses a wide spectrum of audiences united in their shared resolve that the democracies prevail in a projected century-long struggle between democratic and authoritarian regimes to determine global governance. Scholars, teachers, students, elected officials, policy analysts, media professionals, and

engaged citizens who make self government work will profit from this visionary and provocative study **Innovation, Automation and a Sustainable Economy** Jon-Arild Johannessen, 2024-04-03 Economic inequality the environmental crisis and the climate crisis are systemically linked Accordingly they should be understood as a single interconnected system and strategies for resolving them should be guided by this understanding This book demonstrates how the Green New Deal and its systemic alternative the Red New Deal could influence the course of these three global crises all within the context of the Fourth Industrial Revolution The author has developed several scenarios that are relevant to the automation that will result from advances in artificial intelligence and intelligent robots The first is one of mass unemployment while the second envisages low rates of unemployment although workers will experience stagnation and then a decline in their wages It is possible to envisage a different set of scenarios however we must replace the capitalist economic model with a different model mutualism a sustainable model that would allow for economic growth while also addressing the three current systemic crises The author argues that if such a model is implemented there will be jobs for everyone and the climate crisis will be tackled because people s welfare will be prioritized over profit We can assert that such a model will foster the development of economic equality The basic premise of this mutual and sustainable economic model is that sustainability is in everyone s interests The book employs not only established and innovative methods such as literature reviews scenario thinking and historical methods to underpin its arguments but also conceptual generalization as an intellectual tool to tackle the general research problem thus it will be an invaluable resource for scholars and students of sustainability and the innovation economy **Comparative Economics in a Transforming World Economy, third edition** J. Barkley Rosser, Jr., Marina V. Rosser, 2018-01-26 An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements with updated country case studies Comparative economics with its traditional dichotomies of socialism versus capitalism private versus state and planning versus market is changing This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field This new edition examines a wide variety of institutional and systemic arrangements many of which reflect deep roots in countries cultures and histories The book has been updated and revised throughout with new material in both the historical overview and the country case studies It offers a broad survey of economic systems then looks separately at market capitalism Marxism and socialism and new traditional economies with an emphasis on the role of religions Islam in particular in economic systems It presents case studies of advanced capitalist nations including the United States Japan Sweden and Germany alternative paths in the transition from socialist to market economies taken by such countries as Russia the former Soviet republics Poland China and the two Koreas and developing countries including India Iran South Africa Mexico and Brazil The new chapters on Brazil and South Africa complete the book s coverage of all five BRICS nations the chapter on South Africa extends the book s comparative treatment to another

continent The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues Each chapter ends with discussion questions *Creating Chinese Urbanism* Fulong Wu, 2022-10-27 *Creating Chinese Urbanism* describes the landscape of urbanisation in China revealing the profound impacts of marketisation on Chinese society and the consequential governance changes at the grassroots level During the imperial and socialist periods state and society were embedded However as China has been becoming urban the territorial foundation of earth bound society has been dismantled This metaphorically started an urban revolution which has transformed the social order derived from the state in society The state has thus become more visible in Chinese urban life Besides witnessing the breaking down of socially integrated neighbourhoods Fulong Wu explains the urban roots of a rising state in China Instead of governing through autonomous stakeholders state sponsored strategic intentions remain In the urban realm the desire for greater residential privacy does not foster collectivism State led rebuilding of residential communities has sped up the demise of traditionalism and given birth to a new China with greater urbanism and state centred governance Taking the vantage point of concrete residential neighbourhoods *Creating Chinese Urbanism* offers a cutting edge analysis of how China is becoming urban and grounds the changing state governance in the process of urbanization Its original and material interpretation of the changing role of the state in China makes it suitable reading for researchers and students in the fields of urban studies geography planning and the built environment *Accelerating China's Rural Transformation* Albert Nyberg, Scott Rozelle, 1999-01-01 QUOTE two issues remain central to the Chinese government s rural development objectives food security and poverty alleviation China has made remarkable progress in meeting these goals the economy including the rural sector has grown at phenomenal rates during the reform period QUOTE While China s rural products input labor and land markets are improving they remain nascent China still needs to foster several critical institutions such as an effective fiscal system a more efficient rural financial system a workable land tenure arrangement and a revamped trade and investment environment for agriculture The primary purpose of this report is to identify and consolidate information on these crucial issues that impact on rural development in China This report assesses strategic options from the perspective of efficiency equitable development and growth It is intended to assist government officials and World Bank staff to prioritize policy and institutional reforms and public investment decisions in the rural sector

*Transforming Rural China* Guy M. Robinson, 2024-02-12 Over the last four decades China has witnessed dramatic economic growth transforming into an economic powerhouse with considerable consequences for its rural regions In this timely book Guy M Robinson adeptly navigates the principal elements key events and significant changes of the transformation of China s countryside **Urban Village Redevelopment in Beijing, China** Ran Liu, 2024-06-12 The book provides a multi stage assessment of the changing housing opportunities of migrant workers in the three stages of Beijing s urban village development emergence erasure and preservation The volume re theorizes Henry Lefebvre s notion of the right

to the city as a largely property based concept that falls within the city's hybrid tenure matrix of varying degrees of tenure security and formality that is undergoing entrepreneurialization or gentrification. This is another highly valuable contribution to China studies from the geographical perspective of the territorial politics at play in the process of urban village redevelopment which has fostered a new propertied landowning class as winners while moving low wage migrants. The book takes the reader on a fascinating journey from peri urban villages to IT worker villages to artists villages revealing a restless landscape of urbanism and state centered governance as well as bottom up counterplots. The fieldwork explores the contradictions of urban village redevelopment in Beijing. On the one hand it is state dominated and yet creates new housing opportunities for migrants on the other it disrupts old orders but also encourages new forms of grassroots alliances. The empirical studies of Beijing's urban villages enrich Henry Lefebvre's discourse on planetary urbanisation. Gilles Deleuze and Félix Guattari's notion of the rhizome and Elinor Ostrom's ideas on the wise management of the commons.

**The Globalisation of Real Estate** Dallas Rogers, Sin Koh, 2018-12-07 Individual foreign investment in residential real estate by new middle class and super rich investors is re emerging as a key issue in academic policy and public debates around the world. At its most abstract global real estate is increasingly thought of as a liquid asset class that is targeted by foreign individual investors who are seeking to diversify their investment portfolios. But foreign investors are also motivated by intergenerational familial security transnational migration strategies and short term educational plans which are all closely entwined with global real estate investment. Government and local public responses to the latest manifestation of global real estate investment have taken different forms. These range from pro foreign investment primarily justified on geopolitical and macro economic grounds to anti foreign investment for reasons such as mitigating public dissent and protecting the local housing market. Within this changing geopolitical context this book offers a diverse range of case studies from Canada Hong Kong Singapore Russia Australia and Korea. It will be of interest to academics policymakers and university students who are interested in the globalisation of local real estate. The chapters in this book were originally published in the International Journal of Housing Policy.
