**Mobile Media and Social Intimacies in Asia** Jason Vincent A. Cabañes,Cecilia S. Uy-Tioco,2020-01-09 This edited

volume brings together cutting edge studies from emerging scholars of East Southeast Asia who explore the role of mobile media in the contemporary transformation of the region's social intimacies from the romantic to the familial to the communal. By providing a regional and transnational overview of such studies it affords new insights into how these mobile technologies have contributed to the rise of glocal intimacies. This pertains to the normalisation and intensification of how people's relationships of closeness are entangled in the ever shifting and constantly negotiated flows between global modernity and local everyday life. In providing case studies of mobile media and glocal intimacies the chapters in the volume attend to a broad range of countries that include China Korea Malaysia the Philippines Singapore Vietnam and Taiwan. This illustrates the differing ways in which mobile media might be embedded in the region's divergent articulations of social intimacies which reflect the ongoing tensions between Western and Asian imaginaries of modernity. The chapters also discuss a wide array of mobile media that people use from social media platforms like Facebook and Instagram to messaging apps like KakaoTalk and WhatsApp to dating apps like Tinder and Blued. This allows for a mapping out of the different levels of impact that mobile media might have on social intimacies in a region that contains some of the most technologically advanced as well as the most technologically behind societies in the world. In summary this book allows readers to take a comparative approach to understanding the complexity of the glocal intimacies that are emerging from the ways people in Asia use mobile media to reconfigure their local ties and to enact global relationships. This volume will benefit students academics and researchers who are keen in media and communication cultural studies sociology anthropology and Asian studies. This exciting and much needed book will greatly advance our efforts to decolonise media and communications research. The chapters offer empirically rich and nuanced accounts that challenge the dominant paradigms about mediated intimacy. Mirca Madianou Goldsmiths University of London. This collection develops the original concept of glocal intimacies to describe how mobile media have become a crucial site where new social intimacies are enacted reinforced and transformed in Asia. It introduces fresh empirical research from emerging scholars to furnish deep theoretical insights into these imaginaries and practices. Audrey Yue National University of Singapore.
