Knapp,1992-01-01 The studies collected in this volume were written by anthropologists architects geographers historians a
sociologist and a veterinary ecologist Taken together they form an exceptionally coherent survey of Chinese villages ranging
from the dry north to the humid southeast and southwest of this vast country Going beyond books on Chinese vernacular
architecture that focus on individual dwellings this work examines the village ensemble itself the various settings for the
habitation work and leisure of China s large rural population Discussions of design spatial layout physical setting settlement
patterns geomantic principles fengshui and evolutionary patterns set the stage for eighteen village case studies Many
villages still preserve characteristics that evoke a respect for and understanding of old China while others expose the drastic
metamorphosis of recent decades Villages are examined as places emphasizing that which is visible each village has its own
order and complex of natural and human elements Chinese Landscapes though it focuses on the physical appearance of
individual villages as they are situated within the constellation that comprises the Chinese landscape suggests much about
more general social economic and political patterns BOOK JACKET Title Summary field provided by Blackwell North America
