Morales, 2018-09-03 This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years From a general point of view coasts are the most quickly changing systems of the Earth This is critical since many human resources such as the main part of economic and social activities are located in the coastal areas Especially in the case of Spain these coasts include cities wide industrial areas including harbor complexes important ecologic systems and our main economic resource tourism Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management so as to solve problems derived from bad plans developed in the last decades of the twentieth century This is a valuable text for advanced graduate students and coastal researchers which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities **Stations Of Coastal Command** David Smith, 2016-02-28 Coastal Command created in 1936 alongside Fighter and Bomber Commands in the reorganization of the RAF in its preparations for the coming war was Britain s mainstay in the battle against the German submarine As more and more Allied merchantmen were sunk during the long voyage from North America the Mediterranean and points south tracking down the U Boats became a constant struggle against harsh weather on long distance patrols out over the Atlantic and Bay of Biscay To counter the threat Coastal Command established a ring of bases stretching from Scotland and Northern Ireland to Iceland and from south Wales and south western Britain to Gibraltar and the Azores all 53 of these stations are covered in this book

Strategy Before Clausewitz Beatrice Heuser, 2017-08-01 This collection of essays combines historical research with cutting edge strategic analysis and makes a significant contribution to the study of the early history of strategic thinking There is a debate as to whether strategy in its modern definition existed before Napoleon and Clausewitz The case studies featured in this book show that strategic thinking did indeed exist before the last century and that there was strategy making even if there was no commonly agreed word for it The volume uses a variety of approaches First it explores the strategy making of three monarchs whose biographers have claimed to have identified strategic reasoning in their warfare Edward III of England Philip II of Spain and Louis XIV of France The book then analyses a number of famous strategic thinkers and practitioners including Christine de Pizan Lazarus Schwendi Matthew Sutcliffe Raimondo Montecuccoli and Count Guibert concluding with the ideas that Clausewitz derived from other authors Several chapters deal with reflections on naval strategy long thought not to have existed before the nineteenth century Combining in depth historical documentary research with strategic analysis the book illustrates that despite social economic political cultural and linguistic differences our forebears connected warfare and the aims and considerations of statecraft just as we do today This book will be of great interest to
