**Future of the Word** Chris Goodall, 2011-03-01 The average young adult in the US reads for about 7 minutes a day and the figure isn't much higher in Britain The last few decades have seen striking and nearly continuous falls in the amount of time individuals spend with books and other printed material And perhaps as a result the average level of literacy in the British and US populations is declining our ability to comprehend complex writing long words or sophisticated expressions is less than it was a few decades ago Very surprisingly the rate of decline is fastest amongst the best educated segment of the population Chris Goodall's readable and comprehensive book asks why this is happening In an ever more demanding world he inquires why is our ability to understand and use the written word in gradual but apparently relentless retreat Chris Goodall's *The Future of the Word* Technology culture and the slow erosion of literacy examines the striking but largely unnoticed evidence from around the world Using the latest research results from neuroscientists from academics who work on reading skills and from cultural analysts Goodall brings his commitment to scrupulous research to demonstrate how modern society is making it almost impossible for people to engage in deep reading Not only are people reading less but they now consume the written word in a more cursory and less reflective way The author has lost control of the reader we all tend to skip across the page searching exclusively for what is relevant to us rather than trying to understand the writer's point of view or memorise her arguments There is a strong tendency to say that this doesn't matter We no longer need to read and to learn because all the information that we could possibly need is instantaneously available to us through electronic gadgets The argument of Goodall's book is that this complacency is mistaken Reading deeply helps us develop a framework and an intellectual structure to which we can add new ideas or opinions The internet gives us orphaned facts but the reading of books or long articles gives us understanding As importantly deep reading trains our brains to cope with complex ideas much as an athlete trains his muscles with repeated exercise Goodall discusses the convincing scientific evidence that truly proficient literacy a skill which is in sharp

decline helps improve other cognitive capabilities and may even improve IQ If we don't go to the literacy gym often enough he says our intellectual capabilities suffer Chris Goodall is a well known writer on climate change and energy winning awards for his previous books and he is a regular commentator on scientific issues in newspapers in the UK and abroad In an earlier part of his career he worked in television and other mass media This book comes out of his fascination with how electronic technologies are affecting the way we think and live Although the digital revolution has made life easier and has improved many of our cognitive skills he says it is reversing our ability to read and to comprehend complex ideas Full of engaging reports of cutting edge science surprising and informative analysis and written with clarity and pace Chris Goodall's *The Future of the Word* is the first attempt to bring rigour to questions that many of us worry about it why do we find it more difficult to concentrate on the written word And what can we do about it

Within A Budding Grove Marcel Proust, 2024-07-04 My mother when it was a question of our having M de Norpois to dinner for the first time having expressed her regret that Professor Cottard was away from home and that she herself had quite ceased to see anything of Swann since either of these might have helped to entertain the old Ambassador my father replied that so eminent a guest so distinguished a man of science as Cottard could never be out of place at a dinner table but that Swann with his ostentation his habit of crying aloud from the housetops the name of everyone that he knew however slightly was an impossible vulgarian whom the Marquis de Norpois would be sure to dismiss as to use his own epithet a pestilent fellow Now this attitude on my father s part may be felt to require a few words of explanation inasmuch as some of us no doubt remember a Cottard of distinct mediocrity and a Swann by whom modesty and discretion in all his social relations were carried to the utmost refinement of delicacy But in his case what had happened was that to the original young Swann and also to the Swann of the Jockey Club our old friend had added a fresh personality which was not to be his last that of Odette s husband Adapting to the humble ambitions of that lady the instinct the desire the industry which he had always had he had laboriously constructed for himself a long way beneath the old a new position more appropriate to the companion who was to share it with him In this he shewed himself another man Since while he continued to go by himself to the houses of his own friends on whom he did not care to inflict Odette

unless they had expressly asked that she should be introduced to them it was a new life that he had begun to lead in common with his wife among a new set of

*Nostromo A Tale of the Seaboard* Joseph Conrad,2024-07-02 I don t mean to say that I became then conscious of any impending change in my mentality and in my attitude towards the tasks of my writing life And perhaps there was never any change except in that

mysterious extraneous thing which has nothing to do with the theories of art a subtle change in the nature of the inspiration a phenomenon for which I can not in any way be held responsible What however did cause me some concern was that after finishing the last story of the Typhoon volume it seemed somehow that there was nothing more in the world to write about This so strangely negative but disturbing mood lasted some little time and then as with many of my longer stories the first hint for Nostromo came to me in the shape of a vagrant anecdote completely destitute of valuable details As a matter of fact in 1875 or 6 when very young in the West Indies or rather in the Gulf of Mexico for my contacts with land were short few and fleeting I heard the story of some man who was supposed to have stolen single handed a whole lighter full of silver somewhere on the Tierra Firme seaboard during the troubles of a revolution
