Leading Collaborative Architectural Practice Erin Carraher,Ryan E. Smith,2017-03-27 The groundbreaking guide to

modern leadership in architectural practice Leading Collaborative Architectural Practice is the leadership handbook for today's design and construction professionals Endorsed by the American Institute of Architects this book describes the collaborative approach to leadership that is becoming increasingly prevalent in modern practice gone are the days of authoritative star architects today's practice is a brand and requires the full input of every member of the team This book builds off of a two year AIA research project to provide a blueprint for effective leadership the ability awareness and commitment to lead project teams who work together to accomplish the project's goals Both group and individual hands on exercises help facilitate implementation and extensive case studies show how these techniques have helped real world firms build exemplary success through collaborative teamwork and leadership Highly illustrated and accessible this approach is presented from the practicing architect's point of view but the universal principles and time tested methods also provide clear guidance for owners contractors engineers project managers and students Build a culture of collaboration commitment and interpersonal awareness Adopt effective leadership techniques at the team project or practice level Handle conflict and resolve communication issues using tested approaches Learn how real world projects use effective leadership to drive success The last decade has seen a sea change in architectural leadership New practices no longer adopt the name and identity of a single person but create their own identity that represents the collaborative work of the entire group Shifts in technology and changing workplace norms have made top down management structures irrelevant so what does it now mean to lead Forefront presents effective contemporary leadership in the architectural practice and real world guidance on everyday implementation Architecture on the Borderline Anoma Pieris, 2019-06-25

Architecture on the Borderline interrogates space and territory in a turbulent present where nation state borders are porous to a few but impermeable to many It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined produced or experienced through architecture and urbanism Drawing on historical global examples this rich collection of essays illustrates how empires nations and cities expand their frontiers and contest boundaries but equally how borderline identities of people and places influence or expose these processes Empirical chapters covering Central Asia the Asia Pacific region the American continent Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on border thinking on the ways of being and navigating frontiers boundaries and margins the three themes used to organise their content The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies and that the view from the periphery opens up new ways of understanding sovereignty In exploring these various spaces and their transformative subjectivities this book also reveals the unrelenting precarity of contesting and living on the margins and related spaces and discourses that are neglected or suppressed **Future Challenges in Evaluating and Managing Sustainable**

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
