Cianciolo, 2008 Lifelong Learning Centers LLCs comprise a suite of technologies that enable online posting of schoolhouse curricula and collaboration among distributed learners These technologies connect the field Army to Army schoolhouses simultaneously improving course currency and supporting training in the field The impact of lifelong learning on organizational excellence seems clear However it is unknown how LLCs promote readiness using educational technology and how LLC effectiveness should be measured The purpose of this research was to develop a comprehensive generalizable framework for conceptualizing the effectiveness of LLCs and for capturing the drivers of success The framework and associated metrics were used to conduct an evaluation of a pilot LLC located at Fort

Leavenworth This evaluation indicated the importance of taking a causal approach An assessment of outcomes alone would have indicated that the initiative had achieved its goals but would have obscured the fact that some of these goals teaching and learning effectiveness were achieved largely independently of the use of learning technologies The basis of the framework in theory makes it generalizable not only across current and future LLCs but also across other blended learning initiatives addressing a gap in the scholarly literature regarding the effectiveness assessment of educational technology

Gauging the Value of Education for Disenfranchised Youth ,2017-11-26 Disengagement of youth from schooling is an issue of significant national and international concern and is a key driver of educational policy and reform that look to maximise school retention for the benefit of both students and the wider community In Australia Flexible Learning Options

FLOs have arisen as a response to the premature disengagement from schooling of a sizeable number of Australian youth. FLOs attend to the educational, social and well-being needs of young people experiencing complex life circumstances, yet empirical evidence of their value to date has been largely anecdotal. The significance of this book lies in its innovative approach to gauging the value of FLOs to young people themselves as well as the wider Australian community. Drawing on past research and new findings from a national investigation, the authors provide novel insight into the pressures pushing young people out of schools and the mechanisms at work in FLOs to re-engage them in education. The varied contributions of this book elucidate many of the measurable impacts of FLOs on the life trajectories of disenfranchised youth, including improved economic integration, mental and emotional wellbeing, and myriad other outcomes. The significance of this project lies in its exploration of how young people and staff understand the transformative nature of the FLO experience, with an analysis that brings to light the wider value of this type of educational intervention in terms of long-term community benefit.
