Agbo-Ejeh, 2024-12-31 The book offers an analysis of the contradictions between theory and practice in the trading system It contextualises the colonial legal structure and its impact on the peripheral countries and their participation and gain in the multilateral trading system The book s core argument effectively situates Economic Partnership Agreements in the systemic asymmetry which characterises the relationship between developed and developing countries in global trade It applies the idea of asymmetry to the relationship between the core countries the EU USA and the peripheral countries ACP in the GATT multilaterally and in the EU ACP trade relationship bilaterally The book identifies that core provisions in the WTO regime such as the special and differential treatment as well as GATT Article XXIV have not lived up to expectations Underscoring the asymmetrical participation and dominant role of former colonial powers the book demonstrates how although trade is generally considered a catalyst for economic growth developed countries have safeguarded their domestic markets while exerting pressure on developing countries to liberalise and compete The European Union has taken measures to address the development concerns of African Caribbean and Pacific countries through the Lom Conventions and Cotonou Agreement however these relationships still retain and reinforce colonial paternalism evidenced by recent trade agreements An alternative possibility multipolarity holds promise for African countries especially intra African trade and critical engagement with China The book is an invaluable resource for scholars postgraduate students government officials and policymakers as it offers a comprehensive understanding of the complexities

21st-Century Statecraft Nayef Al-Rodhan, 2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion, the 21st century requires a new approach to statecraft. In *21st Century Statecraft*, Professor Nayef Al-Rodhan proposes five innovative statecraft concepts. He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity-based governance. He shows how in an interdependent and interconnected world, traditional thinking must move beyond zero-sum games and focus on multi-sum and symbiotic realist interstate relations. This requires a new paradigm of global security premised on five dimensions of security and a new concept of power just power, which highlights the centrality of justice to state interests. These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft. Throughout, Professor Al-Rodhan brings his philosophical and neuroscientific expertise to bear, providing a practical model for conducting statecraft in a sustainable way.

Russian strategy in the Middle East and North Africa Derek Averre, 2024-02-27 This book analyses Russia's strategy in the Middle East and North Africa (MENA) in the turbulent period since the inception of the Arab Spring. It explores the key policy challenges faced by Russia in the context of Russia's relations with both the regional states and the major external powers. The book incorporates chapters on Russia's involvement in MENA affairs, its intervention in the Syrian civil war, the domestic sources of its foreign policy, its clash with the Western powers over issues pertaining to sovereignty and humanitarian norms, its response to the challenge posed by Islamist extremism and its political, military and economic interests in the MENA region. The book offers an original critical analysis of Russia's thinking and decision-making and examines the implications of its more assertive foreign policy strategy following its military interventions in Syria and Ukraine.

The Pulse of China's Grand Strategy Jean Kachiga, 2022-07-08 This book identifies and assesses the grand strategy of Chinese foreign policy following a flurry of diplomatic and investment activities in recent years. Through its adept application of the concept of grand strategy, it examines a series of questions concerning China's objectives, targets, theaters, operations, coordination and purpose/teleology. By answering these questions, the book uncovers the deeper motivations behind China's diplomatic policy, revealing the pulse of China's grand strategy and its implications more broadly to the structure of the international system. Additionally, it offers an evaluation of the external influence exerted by the United States as the incumbent hegemonic power, presenting both the probable policy attitudes of the United States and China's possible reactions and responses. Through these discussions and

evaluations it ultimately reveals that China's motivations are deeply rooted both in its political past and in the interests of its ruling communist party whose determination is the main source of China's current and future successes in ascending past any other nation. Offering an in-depth exploration of China's grand strategy, this book will be of great value to students and scholars of Chinese politics, international relations and diplomacy. China's Energy Geopolitics Thrassy N.

Marketos, 2009-01-01 China's need for energy has become a driving factor in contemporary world politics and a precondition for sustaining China's continuing high economic growth. Accordingly, Chinese energy policy has been a political and strategic rather than market-driven policy. This book focuses on the need of a stable and secure investment environment which is necessary for the energy provision of China from the Central Asian states. The author argues that the institutionalization of the Shanghai Cooperation Organization (SCO), the Friendship and Cooperation Treaty between Russia and China, and Chinese bilateral agreements with individual Central Asian states present an avenue and a framework of stability in which pipeline construction can commence. With the backing of the US in the aftermath of the September 11, 2001 terrorist attacks, Chinese involvement in the region has now been expanding. However, in order to stabilize the region for Chinese investment in energy resources, the author states that the US needs to be present in the region and that a strategic framework of cooperation between Russia, China, and the US has to be developed. The book will be of interest to academics working in the field of International Security, International Relations, and Central Asian and Chinese politics. Chinese Grand Strategy in the 21st Century Thomas M. Kane, Noah E. Falkovich, Noah Falkner, 2023-11 This book examines the state of China's grand strategy in the 21st century, including political, military, and economic factors. Over the past two decades, the People's Republic of China (PRC) has attained the second highest gross domestic product in the world, taken a leadership role in East Asian regional organisations, and substantially improved its military capabilities. Each of these developments, and many others like them, have attracted attention from scholars, journalists, and policymakers. Less frequently acknowledged but perhaps of greater significance is the impressive congruence of Beijing's accomplishments. This book highlights how the PRC's successes support one another and pave the way for future accomplishments, and how these successes seem to be achieved in an unusually coherent and purposeful way. As Beijing's relations with the rest of the world continue to evolve, with events ranging from the ongoing global economic crisis to the turbulence in China's own stock market, which may bring the PRC's government under pressure to re-order its priorities, this book assesses China's grand strategy and long-term approach to national policy. It identifies the political, military, and economic instruments it is likely to use, the key challenges which it will face, and explores the implications for the global community. This book will be of great interest to students of Chinese politics, foreign policy, strategic studies, international security, and IR in general. **Revising China's Strategic Culture:**
