Many more literary and cultural texts are now regarded as valid for classical study. And within this process of widening children's literature has in its turn emerged as being increasingly important. Books written for children now comprise one of the largest and most prominent bodies of texts to engage with the classical world with an audience that constantly changes as it grows up. This innovative volume wrestles with that very characteristic of change which is so fundamental to children's literature showing how significant the classics as well as classically inspired fiction and verse have been in tackling the adolescent challenges posed by metamorphosis. Chapters address such themes as the use made by C. S. Lewis in *The Horse and his Boy* of Apuleius' *The Golden Ass* how Ovidian myth frames the Narnia stories classical nonsense in Edward Lear's *Pan* as a powerful symbol of change in children's literature for instance in *The Wind in the Willows* the transformative power of the Orpheus myth and how works for children have handled the teaching of the classics *The Routledge Companion to Children's Literature* David Rudd, 2012-07-26 *The Routledge Companion to Children's Literature* is a vibrant and authoritative exploration of children's literature in all its manifestations. It features a series of essays written by expert contributors who provide an illuminating examination of why children's literature is the way it is. Topics covered include the history and development of children's literature various theoretical approaches used to explore the texts including narratological methods questions of gender and sexuality along with issues of race and ethnicity realism and fantasy as two prevailing modes of story telling picture books comics and graphic novels as well as young adult fiction and the crossover novel media adaptations and neglected areas of children's literature. *The Routledge Companion to Children's Literature* contains suggestions for further reading throughout plus a helpful timeline and a substantial glossary of key terms and names both established and more cutting edge. This is a comprehensive and up to date guide to an increasingly complex and popular discipline Comparative Children's Literature Emer O'Sullivan, 2005-03-05 Emer O'Sullivan traces the history of children's literature studies from the enthusiastic internationalism of the post war period which set out from the idea of a world republic of childhood to modern comparative criticism **Fundamental Concepts of Children's Literature Research** Hans-Heino Ewers, 2009-06-15 In this book Ewers provides students and professors with a new system of categorization for a differentiated description of children's literature. In the early 1970s Swedish children's literature scholar G. te Kingberg worked to establish a system of scientific terminology for international use but these terms are now somewhat antiquated. This book offers a much needed update systematically analyzing the field and articulating its key definitions terms and concepts. International in scope this study touches on subjects including the distribution of primers and textbooks the means by which children's books are evaluated and classified and the ways in which children's literature can find an adult audience. Also discussed are the system of symbols norms concepts and discourses that have evolved during the past two

centuries leading to an investigation of how authors and publishers have endeavored to make literature appropriate for children and of what it means to accommodate children's needs, wishes, and values. Throughout, Ewers provides concrete examples and clear definitions of terms so that any scholar interested in children's literature will find this book approachable, insightful, and one that crosses cultural boundaries. **Children's Literature** K. Lesnik-Oberstein, 2004-08-31 Children's Literature: New Approaches is a guide for graduate and upper-level undergraduate students of children's literature. It is structured through critical readings of individual texts to bring out wider issues that are current in the field. Includes chronology of key events and publications, a selective guide to further reading, and a list of Web-based resources. **Space and Place in**

Children's Literature, 1789 to the Present Maria Sachiko Cecire, Hannah Field, Malini Roy, 2016-03-09 Focusing on questions of space and locale in children's literature, this collection explores how metaphorical and physical space can create landscapes of power, knowledge, and identity in texts from the early nineteenth century to the present. The collection is comprised of four sections that take up the space between children and adults: the representation of real-world places, fantasy travel and locales, and the physical space of the children's book as object. In their essays, the contributors analyze works from a range of sources and traditions by authors such as Sylvia Plath, Maria Edgeworth, Gloria Anzaldúa, Jenny Robson, C. S. Lewis, Elizabeth Knox, and Claude Ponti. While maintaining a focus on how location and spatiality aid in defining the child's relationship to the world, the essays also address themes of borders, displacement, diaspora, exile, fantasy, gender, history, home, leaving, and homecoming, hybridity, mapping, and metatextuality. With an epilogue by Philip Pullman in which he discusses his own relationship to image and locale, this collection is also a valuable resource for understanding the work of this celebrated author of children's literature. **Cases on Developing Effective Research Plans for Communications and**
