Children's Reading Comprehension And Assessment:

Children's Reading Comprehension and Assessment Scott G. Paris, Steven A. Stahl, 2005-03-23 Originating in a recent CIERA conference held at the University of Michigan this book brings together the nation's most distinguished researchers to examine how readers understand text and how comprehension is assessed. The first part provides both national and historical contexts for the study of reading comprehension. The second part examines how vocabulary, motivation, and expertise influence comprehension and it includes analyses of the developmental course and correlates of comprehension. Chapters in the third part consider how schools focus on comprehension for instruction and assessment. The fourth part includes chapters on large scale assessment that analyze how test formats and psychometric characteristics influence measures of reading comprehension. At the end of each part is a commentary written by an expert that reviews the chapters, critiques the main points, and synthesizes critical issues. Key features of this outstanding new book include: Integration of Research and Practice provides a bridge between conceptual issues studied by researchers concerned with reading comprehension theories and practical issues addressed by educators concerned with classroom instruction and assessment. Comprehension Focus provides a thorough history and rigorous research-based analyses of reading comprehension. Assessment Focus provides innovative approaches to comprehension assessment that include the influences of vocabulary, decoding, and motivation. Synthetic Commentaries provides periodic summaries that analyze and synthesize research practices and issues discussed in each part. Expertise: contributing authors and commentators are highly respected authorities on reading comprehension. See table of contents. This text is appropriate for educational and psychological researchers, reading educators, and graduate students in education and psychology. It is part of the CIERA series which includes the following volumes: Taylor and Pearson Teaching Reading Effective Schools Accomplished Teachers 2002; Van Kleeck, Stahl, and Bauer On Reading Books to Children Parents and Teachers 2003; Hoffman and Schallert The Texts in Elementary Classrooms 2005.
