Panda, 2020-11-23 This book focuses on China's future under Xi Jinping's authoritarian leadership by examining various facets of the political economic social and foreign policy trajectories of contemporary China It assesses Xi Jinping's power dynamic as the core leader of the Communist Party of China CPC and analyses the impact of Xi s signature domestic policies which demonstrate his political authority within the domestic sphere Moreover the book presents Xi s pro active assertive and action oriented outlook as a foundation for China's diplomacy in the new era Bringing together an international set of experts in the field who explore critical facets of China under Xi Jinping that deeply influence the regional as well as the global order the book investigates the impact of Chinese initiatives such as the grand Belt and Road Initiative BRI the Asian Infrastructure Investment Bank AIIB and the BRICS New Development Bank NDB Importantly the book illustrates US China relations and outlines how this relationship will intensify in the post COVID 19 era which is poised to be one of the biggest challenges and turning points of the Asian Century Offering a timely insight into China's future and the trajectory of Xi Jinping's consolidation of power this book will be of interest to academics in the fields of China Studies Asian China's Foreign Policy Contradictions Tim Nicholas Rühlig, 2022 and International Politics and International Relations China's rise to great power status is indisputable but can it shape the future international order This question remains widely debated because China's foreign policy is contradictory Contrary to conventional wisdom this book shows that China does not act from a position of strength but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making it shows that China will not provide a model for a new international system but could undermine the existing order Xi Jinping Alfred L. Chan, 2022 An exploration of all episodes of Xi Jinping s b 1953 life history and his political career begun at age 17 Part I explores Xi s formative childhood and youth experience as well as his governance record spanning every administrative level from the village to the capital Part II focuses on Xi s first five year term as General Secretary 2012 2017 and as President 2013 2018 China in the World Bank, IMF, and WIPO James Frick, 2025-07-10 Previously one of the least connected states in the world China is taking on a considerable role as a leading global power It has participated and benefited from international organizations IOs while also influencing their institutional behavior but it has also demonstrated limited compliance at times China's behavior has shifted from following the rules to a desire to make and set the rules China in the World Bank IMF and WIPO Understanding Trends

in Global Governance Behavior explores 40 years of China's participation within these organizations drawing on in depth interviews and analysis of annual reports meeting minutes consultations and transcripts obtained from archived records to argue how China views its behavior can achieve its desired interests James Frick paints a detailed picture to illustrate that in the context of relative shifts in power variation in China's IO behaviors is predicated by the extent to which IOs conform to China's national interests This rational behavior approach RBA outlines four strategies rule taking rule breaking rule changing and rulemaking As China's relative power increases over time so does its bargaining power leading to a more assertive rule changing behavior as it attempts to adapt the organization to allow its ascendancy as a rule maker China's Coercion of States in the Asia-Pacific Region Maximilian Ernst, 2025-02-11 This book explains why China chooses to coerce Asia Pacific regional states despite the risk of such actions creating a backlash and complicating its strategic calculus China's coercion of neighboring states often a variation of heavy informal economic sanctions combined with diplomatic pressure and gray zone coercive measures has been increasingly observable in the past decade It has become an important tool in China's foreign policy toolbox and is frequently used by Beijing to shape the security political environment of the Asia Pacific The book begins with an appreciation of China's complicated geopolitical exposition and an understanding that such coercion creates backlash since the target state will likely be alienated and pushed into closer security cooperation with the United States China's main geopolitical rival Through two in depth case studies of Chinese coercion targeting the Philippines and South Korea respectively the book demonstrates that first the reason China coerces is that the secondary state engages in actions that fundamentally threaten China's security interests and second it will coerce these states only if other policy options geared to change the secondary state s course of action have not worked Employing balance of power theory and particularly wedge strategies the book solves a pertinent research question and improves our knowledge of contemporary security politics in the Asia Pacific This book will be of interest to students scholars and practitioners of Asia Pacific security China's Crisis of Success William H. Overholt, 2018-01-11 Explores how Chinese foreign policy and international relations China has reached a threshold where continued success requires re invention of its economy and politics The SAGE Handbook of Contemporary China Weiping Wu, Mark Frazier, 2018-07-09 The study of contemporary China constitutes a fascinating yet challenging area of scholarly inquiry Recent decades have brought dramatic changes to China's economy society and governance Analyzing such changes in the context of multiple disciplinary perspectives offers opportunites as well as challenges for scholars in the field known as contemporary China Studies The SAGE Handbook of Contemporary China is a two volume exploration of the transformations of contemporary China firmly grounded in the both disciplinary and China specific contexts Drawing on a range of scholarly approaches found in the social sciences and history an international team of contributors engage with the question of what a rapidly changing China means for the broader field of contemporary China studies and identify areas of promising future research Part 1 Context History Economy and the Environment Part 2

Economic Transformations Part 3 Politics and Government Part 4 China on the Global Stage Part 5 China's Foreign Policy Part 6 National and Nested Identities Part 7 Urbanization and Spatial Development Part 8 Poverty and Inequality Part 9 Social Change Part 10 Future Directions for Contemporary China Studies **Social Mobilisation in Post-Industrial** China Jia Gao, Yuanyuan Su, 2019 In recent years China has experienced intense economic development Previously a rapidly urbanising industrial economy the country has become a post industrial economy with a service sector that accounts for almost half the nation s GDP This transformation has created many socio political changes but key among them is social mobilisation This book provides a full and systematic analysis of social mobilisation in China and how its use as part of state China and the International Order Michael J. Mazarr, Timothy R. Heath, Astrid Stuth Cevallos, 2018-05-21 The question of how China's rise will affect the post World War II international order carries considerable significance for the future of global politics. This report evaluates the character and possible future of China's engagement with the postwar order The resulting portrait is anything but straightforward China's engagement with the order remains a complex often contradictory work in progress This report offers four major findings about the relationship of China to the international order First China's behavior over the past two decades does not mark it as an opponent or saboteur of the order but rather as a conditional supporter Since China undertook a policy of international engagement in the 1980s the level and quality of its participation in the order rivals that of most other states Second looking forward the posture China takes toward the institutions norms and rules of a shared order is now in significant flux various outcomes from continued gualified support to more aggressive challenges are possible Third partly because of this uncertainty a strengthened and increasingly multilateral international order can provide a critical tool for the United States and other countries to shape and constrain rising Chinese power Finally modifications to the order on the margins in response to Chinese preferences pose less of a threat to a stable international system than a future in which China is alienated from that system However these modifications must be governed by strictly articulated end points **Chineseness And Modernity** In A Changing China: Essays In Honour Of Professor Wang Gungwu Yongnian Zheng, Litao Zhao, 2020-02-13 This book is a collection of essays in honour of Professor Wang Gungwu Professor Wang is not only a great historian on Chinese history in general and the Chinese overseas in particular but has much wider influence through remarkable domain crossing namely spatial crossing characterised by geographical straddling between inside and outside of China temporal crossing from the ancient past to the contemporary inter disciplinary crossing from history to the social sciences and intellectual crossing from the academia to public activism He has been a long lasting source of inspiration for understanding some of the most pressing and complex issues in our times including the nature of China's rise and its implications for the regional and world order In a nutshell this book presents Wang as a highly active educator scholar who has achieved the highest academic standard as well as far reaching influence over issues that concern all walks of life By focusing on the theme of Chineseness and China s

modernity this book adds depth to the analysis of China's rise and its implications for the region and the world It contains a chapter providing the most comprehensive and updated review of Wang's scholarship thus far Another chapter demonstrates how Wang based on his deep understanding of Chinese civilisation and history articulates a distinct view of the world order that differs from either the thesis of Thucydides s trap or the advocacy of mutual accommodation Interestingly this book also includes a chapter that highlights Wang's Southeast Asian ness suggesting that Wang's scholarship cautions against not only western centric views towards China but also Sino centric views towards Southeast Asia In short this edited volume is both a reference book for understanding Wang's scholarship and an extension of his scholarship to the analysis of China's growing international influence and its implications for the world order **Playing by the Informal Rules** Yao Li,2018-12-13 Growing protests in non democratic countries are often seen as signals of regime decline China however has remained stable amid surging protests Playing by the Informal Rules highlights the importance of informal norms in structuring state protester interactions mitigating conflict and explaining regime resilience Drawing on a nationwide dataset of protest and multi sited ethnographic research this book presents a bird's eye view of Chinese contentious politics and illustrates the uneven application of informal norms across regions social groups and time Through examinations of protests and their distinct implications for regime stability Li offers a novel theoretical framework suitable for monitoring the trajectory of political contention in China and beyond Overall this study sheds new light on political mobilization and authoritarian resilience and provides fresh perspectives on power rules legitimacy and resistance in modern societies Multilateralism 2.0 and Asian Security Dynamics Kai He, 2020-04-28 In the 1990s there was a wave of multilateralism in the Asia Pacific led primarily by ASEAN Since the Global Financial Crisis of 2008 however many non ASEAN states have attempted to seize the initiative including the USA Japan China South Korea and Australia Kai He and his contributors debate the reasons for this contested multilateralism and the impacts it will have on the region's security and political challenges Will the Indo Pacific turn be a blessing or a curse for regional stability and prosperity Using a diverse range of theoretical and empirical perspectives these leading scholars contribute views on this question and on the diverse strategies of the great and middle powers in the region This collection will be of great interest to scholars and students of international relations in the Asia Pacific and of great value to policy makers in the region and beyond **Belt And Road Initiative, The:** Implications For The International Order Moritz Rudolf, 2021-09-14 This book showcases how the People's Republic of China PRC has been utilizing the Belt and Road Initiative BRI to reshape the global order Dissecting China's increasingly assertive international behaviour the book demonstrates how the PRC projects its self perception onto the international order The book outlines five aspects of China's international role projection which the PRC applies selectively depending on its target audience 1 The bearer of traditional Chinese culture 2 The humiliated nation 3 The socialist state with Chinese characteristics 4 The developing state and promoter of international development 5 The authoritarian globalization optimist
