Raphael Lam,Mr.Markus Rodlauer,Mr.Alfred Schipke,2017-01-14 China is at a critical juncture in its economic transformation as it tries to rebalance what is generally seen as an exhausted growth model A unifying theme across the reforms that will deliver this transformation is that it can no longer be achieved by raising the amount of physical investment and government direction of resource allocation Instead China is building a new set of policy frameworks that will allow markets to function more effectively not unfettered markets but markets that work efficiently in line with broad social and other policy goals and in a sustainable way Hence China is now building a new soft infrastructure that is the institutional plumbing that underpins and guides the functioning of markets as the key organizing principle toward achieving sustained economic and social progress Against this background this volume provides policymakers academics and the public with valuable information about policies and institutions in China today It also looks at the road ahead and key principles that can help China in navigating it The book focuses on issues crucial in the country s transformation such as tax policy and administration social security state owned enterprise reform medium term expenditure frameworks the role of local government finances capital account liberalization and renminbi internationalization As China moves toward a more price based allocation of resources strengthening monetary policy frameworks and financial sector regulation will be particularly important in channeling resources to the most productive sectors and minimizing the risks of financial sector stress Also upgrading statistical frameworks will be critical for macroeconomic policymaking and investors Visit <http://www.elibrary.imf.org/page/modernizing-china>     **China 2030** ,2012     *China 2049* David Dollar,Yiping Huang,Yang Yao,2020-06-09 How will China reform its economy as it aspires to become the next economic superpower It s clear that China is the world s next economic superpower But what isn t so clear is how China will get there by the middle of this century It now faces tremendous challenges such as

Wingender, 2015-03-24 Revenue reforms can contribute to more inclusive green and sustainable growth in China Relative to OECD economies fiscal policy in China is less redistributive Options for promoting more inclusive growth include improving the progressivity of labor taxes individual income tax and social security contributions introducing a recurrent property tax and finishing the transition to a comprehensive value added tax Higher environmental taxes meanwhile would promote more environment friendly economy These reforms could also significantly boost revenue potentially by as much as 61.2 percent of GDP Such increases in revenue could help reduce the deficit finance priority social and infrastructure spending and offset cuts in other taxes We illustrate how these revenue reforms could be part of a comprehensive fiscal package that achieves the needed consolidation in the augmented deficit and foster higher quality growth *Global Perspectives on Fostering*

Kirton, 2016-03-03 If the

growing demand for global governance breathed new life into the established G7 8 and the more recent G20 it raised questions about the evolving and optimal relationship between them One answer arose from the G20's third summit when it proclaimed the G20 would govern global finance and economics while the old G8 would focus on development and security

Yet this rough division of labour did not address which issues lay within each category and how interconnections would be addressed to create comprehensive coherent global governance for a complex world This volume considers these questions It explores the summits performance the division of labour during their coexistence their comparative strengths and limitations and how the future partnership could be improved to benefit the global community The authors explain the recent evolution and performance of the G8 and G20 summits and their evolving empirical relationship They consider the G8 G20 relationship with other actors engaged in global governance notably the major multilateral organizations and civil society They assess G7 8 and G20 effectiveness and accountability And they identify based on this empirical and analytical foundation how the relationship can be improved for today s tightly wired world

Chinese universities are striving to integrate new educational elements such as student-centered learning, group learning, active learning, and learning by doing into current traditional curriculum systems for creativity development among young generations. However, the concept of creativity, by its very nature, is a complex term of many perspectives. It is necessary to clarify what creativity is, how creativity can be fostered in learning environments, and what universities should do in order to foster creative young talents. *Introducing Problem-Based Learning (PBL) for Creativity and Innovation in Chinese Universities: Emerging Research and Opportunities* is a critical scholarly resource that provides a multidimensional understanding on both challenges and opportunities of fostering creativity and PBL in Chinese universities and particularly discusses this implementation in a Chinese cultural context. Though related to a Chinese cultural context, the book can inspire other universities in other cultures, particularly in Asian areas, to learn why PBL is a potential strategy for creativity development and to rethink how to facilitate the innovation capability of universities in the future.
