China and Charles Darwin James Reeve Pusey, 2020-03-17 Although Charles Darwin never visited China his ideas landed there with force Darwinism was the first great Western theory to make an impact on the Chinese and from 1895 until at least 1921 when Marxism gained a formal foothold it was the dominant Western ism influencing Chinese politics and thought The authority of Darwin sometimes misinterpreted influenced reformers and revolutionaries and paved the way for Chinese Marxism and the thought of Mao Tse tung This study evaluates Darwin s theory of evolution as a stimulus to Chinese political changes and philosophic challenge to traditional Chinese beliefs James Pusey bases his analysis on a survey of journals issued from 1896 to 1910 and after a break for revolutionary action from 1915 to 1926 with emphasis on the era between the Sino Japanese War and the Republican Revolution The story of Darwinism in China involves among others the most famous figures of modern Chinese intellectual history **Zhou Zuoren and an Alternative Chinese Response to Modernity**

Susan Daruvala, 2020-03-23 This book explores the issues of nation and modernity in China by focusing on the work of Zhou Zuoren 1885 1967 one of the most controversial of modern Chinese intellectuals and brother of the writer Lu Xun Zhou was radically at odds with many of his contemporaries and opposed their nation building and modernization projects Through his literary and aesthetic practice as an essayist Zhou espoused a way of constructing the individual and affirming the individual s importance in opposition to the normative national subject of most May Fourth reformers Zhou s work presents an alternative vision of the nation and questions the monolithic claims of modernity by promoting traditional aesthetic categories the locality rather than the nation and a literary history that values openness and individualism *A Conceptual History of Chinese -Isms* Ivo Spira, 2015-05-12

In *A Conceptual History of Chinese Isms* Ivo Spira explores the linguistic and rhetorical development of Chinese isms as well as the key concept zh y ism itself He argues that the introduction of this concept from Japan in the 1890s inaugurated an Age of Isms in which it served as a conceptual focus for the stereotypical categorization of people and the utopian imagination of the future The book focuses on Chinese isms in the formative period 1895 1925 through a close reading of key primary sources covering linguistic conceptual and rhetorical aspects of their use in ideological reasoning Spira emphasizes the combination of internal traditional and external Western and Japanese factors in the emergence of Chinese isms **Hideyoshi** Mary Elizabeth Berry, 2020-05-18

Here is the first full length biography in English of the most important political figure in premodern Japan Hideyoshi peasant turned general military genius and imperial regent of Japan is the subject of an immense legendary literature He is best known for the conquest of Japan s sixteenth century warlords and the invasion of Korea He is known too as an extravagant showman who rebuilt cities erected a colossal statue of the Buddha and entertained thousands of guests at tea parties But his lasting contribution is as governor whose policies shaped the course of Japanese politics for almost three hundred years In Japan s first experiment with federal rule Hideyoshi successfully unified two hundred local domains under a central authority Berry explores the motives and

forms of this new federalism which would survive in Japan until the mid nineteenth century as well as the philosophical question it raised What is the proper role of government This book reflects upon both the shifting political consciousness of the late sixteenth century and the legitimization rituals that were invoked to place change in a traditional context It also reflects upon the architect of that change a troubled parvenu who acted often with moderation and sometimes with explosive brutality Academic Nations in China and Japan Margaret Sleeboom,2004-08-02 Chinese and Japanese people s descriptions of themselves and each other differ vastly and contrast starkly with Western perceptions This book explores human categories and how academics classify themselves and the world **Uchida Hyakken** Rachel DiNitto,2020-03-17 The literary career of Uchida Hyakken 1889 1971 encompassed a wide variety of styles and genres including fiction zuihitsu essays war diaries poetry travelogues and children s stories In discussing his oeuvre critics have circumscribed Hyakken to a private literary realm detached from the era in which he wrote Rachel DiNitto provides a critical corrective by locating in Hyakken s simple yet powerful literary language a new way to appreciate the various literary reactions to the modernization of the early decades of the twentieth century and a means to open up a literary space of protest an alternate intellectual response to the era of militarism This book takes up Hyakken s fiction and essays written during Japan s prewar years to investigate the intersection of his literature with the material and discursive surroundings of the time a consumer oriented print culture the popular entertainment of film the capitalist and cultural force of an emergent middle class a planned yet sprawling metropolis and the war machine of an expanding Japanese empire Emerging from this analysis is a writer who relied on the quotidian language of the everyday and the symbols of cultural modernism to counter the harsh realities of modernization and imperialism and to express sentiments contrary to the mainstream ideological rhetoric of the time

**Doctoral Dissertations on China and on Inner Asia, 1976-1990** Patricia Polansky,Anna Leon Shulman,1998-10-15 A guide to the thesis literature on China and Inner Asia written between 1976 and 1990 Includes more than 10 000 entries for dissertations in the arts and sciences law medicine theology engineering and other disciplines Entries are grouped in topical chapters and each entry includes bibliographic information and an abstract **On the Margins of Empire** Jeffrey Paul Bayliss,2020-03-17 Two of the largest minority groups in modern Japan Koreans who emigrated to the metropole as colonial subjects and a social minority with historical antecedents known as the Burakumin share a history of discrimination and marginalization that spans the decades of the nation s modern transformation from the relatively liberal decade of the 1920s through the militarism and nationalism of the 1930s to the empire s demise in 1945 Through an analysis of the stereotypes of Koreans and Burakumin that were constructed in tandem with Japan s modernization and imperial expansion Jeffrey Paul Bayliss explores the historical processes that cast both groups as the antithesis of the emerging image of the proper Japanese citizen subject This study provides new insights into the majority prejudices social and political movements and state policies that influenced not only their perceived positions as others on the margins of the Japanese empire but also the minorities

views of themselves their place in the nation and the often strained relations between the two groups      **A Sense of Place**

David Spafford,2020-05-11 A Sense of Place examines the vast Kant region as a locus of cultural identity and an object of familial attachment during the political and military turmoil of the late fifteenth and early sixteenth centuries in Japan Through analysis of memoirs letters chronicles poetry travelogues lawsuits land registers and archeological reports David Spafford explores the relationships of the eastern elites to the space they inhabited he considers the region both as a whole in its literary representations and political and administrative dimensions and as an aggregation of discrete locales where struggles over land rights played out alongside debates about the meaning of ties between families and their holdings Spafford also provides the first historical account in English of medieval castle building and the castellan revolution of the late fifteenth century which militarized the countryside and radically transformed the exercise of authority over territory Simultaneously the book reinforces a sense of the eastern elite s anxieties and priorities detailing how in their relation to land and place local elites displayed a preference for past precedent and inherited wisdom Even amidst the changes wrought by war this inclination although quite at odds with their conventional reputation for ruthless pragmatism and forward thinking prevailed      The Real Modern Christopher P. Hanscom,2020-05-11 The contentious relationship between modernism and realism has powerfully influenced literary history throughout the twentieth century and into the present In 1930s Korea at a formative moment in these debates a crisis of representation stemming from the loss of faith in language as a vehicle of meaningful reference to the world became a central concern of literary modernists as they operated under Japanese colonial rule Christopher P Hanscom examines the critical and literary production of three prose authors central to 1930s literary circles Pak T aewon Kim Yujong and Yi T aejun whose works confront this crisis by critiquing the concept of transparent or empiricist language that formed the basis for both a nationalist literary movement and the legitimizing discourse of assimilatory colonization Bridging literary and colonial studies this re reading of modernist fiction within the imperial context illuminates links between literary practice and colonial discourse and questions anew the relationship between aesthetics and politics The Real Modern challenges Eurocentric and nativist perspectives on the derivative particularity of non Western literatures opens global modernist studies to the similarities and differences of the colonial Korean case and argues for decolonization of the ways in which non Western literatures are read in both local and global contexts      Knowing the Amorous Man Jamie L. Newhard,2020-05-11 Tales of Ise Ise monogatari is traditionally identified as one of the most important Japanese literary texts of the Heian period 794 1185 Since its enshrinement in the classical literary canon as early as the eleventh century the work has also been the object of intensive study and extensive commentary Its idiosyncratic form 125 loosely connected episodes recounting the life and loves of an anonymous courtier and mysterious authorship have provoked centuries of explication Jamie Newhard s study skillfully combines primary source research with a theoretically framed analysis exploring commentaries from the medieval period into the early twentieth

century and situating the text's critical reception within an evolving historical and social context. By giving a more comprehensive picture of the social networks and scholastic institutions within which literary scholarship developed and circulated, Newhard identifies the ideological, methodological, and literary issues that shaped the commentators' agendas as the audience for classical literature expanded beyond aristocratic circles to include other social groups. Her approach illuminates how exegesis of *Tales of Ise* ultimately reflects shifting historical and social assessments that construct, transform, and transmit the literary and cultural value of the work over time.

*Religion and Ecological Sustainability in China* James Miller, Dan Smyer Yu, Peter van der Veer, 2014-04-29 This book sheds light on the social imagination of nature and environment in contemporary China. It demonstrates how the urgent debate on how to create an ecologically sustainable future for the world's most populous country is shaped by its complex engagement with religious traditions, competing visions of modernity and globalization, and by engagement with minority nationalities who live in areas of outstanding natural beauty on China's physical and social margins. The book develops a comprehensive understanding of contemporary China that goes beyond the tradition/modernity dichotomy and illuminates the diversity of narratives and worldviews that inform contemporary Chinese understandings of and engagements with nature and environment.

Maclachlan,2020-03-17 In 2001 Prime Minister Koizumi Jun ichir launched a crusade to privatize Japan s postal services The plan was hailed as a necessary structural reform but many bemoaned the loss of traditional institutions and the conservative values they represented Few expected the plan to succeed given the staunch opposition of diverse parties but four years later it appeared that Koizumi had transformed not only the post office but also the very institutional and ideological foundations of Japanese finance and politics By all accounts it was one of the most astonishing political achievements in postwar Japanese history Patricia L Maclachlan analyzes the interplay among the institutions interest groups

and leaders involved in the system's evolution from the early Meiji period until 2010 Exploring the postal system's remarkable range of economic social and cultural functions and its institutional relationship to the Japanese state this study shows how the post office came to play a leading role in the country's political development It also looks into the future to assess the resilience of Koizumi's reforms and consider the significance of lingering opposition to the privatization of one of Japan's most enduring social and political sanctuaries *Technology of Empire* Daqing Yang, 2011-04-18 Nearly half a century ago the economic historian Harold Innis pointed out that the geographical limits of empires were determined by communications and that historically advances in the technologies of transport and communications have enabled empires to grow This power of communications was demonstrated when Japanese Emperor Hirohito's radio speech announcing Japan's surrender and the dissolution of its empire was broadcast simultaneously throughout not only the Japanese home islands but also all the territories under its control over the telecommunications system that had in part made that empire possible In the extension of the Japanese empire in the 1930s and 1940s technology geo strategy and institutions were closely intertwined in empire building The central argument of this study of the development of a communications network linking the far flung parts of the Japanese imperium is that modern telecommunications not only served to connect these territories but more important made it possible for the Japanese to envision an integrated empire in Asia Even as the imperial communications network served to foster integration and strengthened Japanese leadership and control its creation and operation exacerbated long standing tensions and created new conflicts within the government the military and society in general

*Sovereignty at the Edge* Cathryn H. Clayton, 2020-03-17 How have conceptions and practices of sovereignty shaped how Chineseness is imagined This ethnography addresses this question through the example of Macau a southern Chinese city that was a Portuguese colony from the 1550s until 1999 As the Portuguese administration prepared to transfer Macau to Chinese control it mounted a campaign to convince the city's residents 95 percent of whom identified as Chinese that they possessed a unique cultural identity that made them different from other Chinese and that resulted from the existence of a Portuguese state on Chinese soil This attempt sparked reflections on the meaning of Portuguese governance that challenged not only conventional definitions of sovereignty but also conventional notions of Chineseness as a subjectivity common to all Chinese people around the world Various stories about sovereignty and Chineseness and their interrelationship were told in Macau in the 1990s This book is about those stories and how they informed the lives of Macau residents in ways that allowed different relationships among sovereignty subjectivity and culture to become thinkable while also providing a sense of why at times it may not be desirable to think them *A Place in Public* Marnie S. Anderson, 2020-03-17 This book addresses how gender became a defining category in the political and social modernization of Japan During the early decades of the Meiji period 1868-1912 the Japanese encountered an idea with great currency in the West that the social position of women reflected a country's level of civilization Although elites initiated dialogue out of concern for their country's reputation

internationally the conversation soon moved to a new public sphere where individuals engaged in a wide ranging debate about women's roles and rights. By examining these debates throughout the 1870s and 1880s, Marnie S. Anderson argues that shifts in the gender system led to contradictory consequences for women. On the one hand, as gender displaced status as the primary system of social and legal classification, women gained access to the language of rights and the chance to represent themselves in public and play a limited political role. On the other, the modern Japanese state permitted women's political participation only as an expression of their citizenship through the household and codified their formal exclusion from the political process through a series of laws enacted in 1890. This book shows how a woman's place in late nineteenth century Japan was characterized by contradictions and unexpected consequences by new opportunities and new constraints.

**Neo-Confucianism in History** Peter K. Bol, 2020-03-17 Where does Neo-Confucianism, a movement that from the twelfth to the seventeenth centuries profoundly influenced the way people understood the world and responded to it, fit into our story of China's history? This interpretive, at times polemical, inquiry into the Neo-Confucian engagement with the literati as the social and political elite, local society and the imperial state during the Song, Yuan and Ming dynasties is also a reflection on the role of the middle period in China's history. The book argues that as Neo-Confucians put their philosophy of learning into practice in local society, they justified a new social ideal in which society at the local level was led by the literati with state recognition and support. The later imperial order in which the state accepted local elite leadership as necessary to its own existence survived even after Neo-Confucianism lost its hold on the center of intellectual culture in the seventeenth century but continued as the foundation of local education. It is the contention of this book that Neo-Confucianism made that order possible.

**Negotiating Urban Space** Si-yen Fei, 2020-03-17 Urbanization was central to development in late imperial China. Yet its impact is heatedly debated, although scholars agree that it triggered neither Weberian urban autonomy nor Habermasian civil society. This book argues that this conceptual impasse derives from the fact that the seemingly continuous urban expansion was in fact punctuated by a wide variety of dynastic urbanisms. Historians should, the author contends, view urbanization not as an automatic by-product of commercial forces but as a process shaped by institutional frameworks and cultural trends in each dynasty. This characteristic is particularly evident in the Ming. As the empire grew increasingly urbanized, the gap between the early Ming valorization of the rural and late Ming reality infringed upon the livelihood and identity of urban residents. This contradiction went almost unremarked in court forums and discussions among elites, leaving its resolution to local initiatives and negotiations. Using Nanjing, a metropolis along the Yangzi River and onetime capital of the Ming, as a central case, the author demonstrates that prompted by this unique form of urban-rural contradiction, the actions and creations of urban residents transformed the city on multiple levels: as an urban community, as a metropolitan region, as an imagined space, and finally as a discursive subject.
