## **Chinas Development Capitalism And Empire Rethinking Globalizations:**

**China's Development** Michel Aglietta, Guo Bai, 2013 Focussing on sustainability this book explores the future of China in light of the successful reforms undertaken in the last thirty years It combines Chinese economic history and up to date macroeconomic theory in order to show how economic transformations and institutional changes are intertwined in developing capitalism under state sovereignty *Rethinking Border Control for a Globalizing World* Leanne Weber, 2015-02-11 This book provides a new point of departure for thinking critically and creatively about international borders and the perceived need to defend them adopting an innovative preferred future methodology The authors critically examine a range of border domains including law citizenship governance morality security economy culture and civil society which provide the means and justification for contemporary border controls and identify early signs that the dynamics of sovereignty and borders are being fundamentally transformed under conditions of neoliberal globalization The goal is to locate potential pathways towards the preferred future of relaxed borders and provide a foundation for a progressive politics dedicated to moving beyond mere critique of the harm and inequity of border controls and capable of envisaging a differently bordered world This book will be of considerable interest to students of border studies migration criminology peacemaking critical security studies and IR in general *Critical Rationalism and Globalization* Masoud Mohammadi Alamuti, 2015-03-24 Critical Rationalism and Globalization addresses how the access to critical reason enables people to shape a new social order on a global scale This book demonstrates how the philosophy of critical rationalism contributes to the sociology of Globalization through uncovering the role of critical reason in arriving at an agreement on common values and institutions on a global scale It discusses how value consensus on the institutions of sovereignty and inter state law has prepared the ground for the rise of a global system of national societies after the end of World War II Masoud Alamuti argues that uneven openness of national economies to global trade and investment should be comprehended in the framework of the post war legal and political context Using the concept of rationality as openness to criticism the book proposes a normative theory of open global society in order to show that the existing value consensus on the cult of sovereignty suffers from the recognition of the possibility of rational dialogue among competing ways of the good life Masoud Alamuti argues that once the people of the world across national communities open their fundamental ways of the good life to mutual criticism they can create common global values necessary for the rise of a just social order on a global scale This book will be of interest to students and scholars of Globalization Studies Global Sociology and International Relations *Rethinking Globalism* Manfred B. Steger, 2004 What is the hottest American export since 9 11 The contributors to this provocative volume contend that it is Western style globalism the dominant free market ideology that determines everything from most favored nation status to the declaration of war In this much needed post September 11 analysis an interdisciplinary team of authors shows how central concepts like globalization liberty free markets and free trade are increasingly being subordinated to and lumped together

with the war on terrorism led by the U S and its allies The authors here hailing from all five continents contend that globalism is being adapted to particular social and political contexts in various parts of the world Nonetheless the impact of globalization with an ideological twist can be devastating as military operations and propaganda supplant transnational trade initiatives as the focal point of global exchange And ironically the post 9 11 framework contains a major ideological contradiction Social forces otherwise profiting from expanded global mobility and interchange must come to grips with necessary limitations on certain aspects of globalization This volume was handcrafted to outline the major lines of inquiry proposed for the new Globalization series edited by Manfred B Steger and Terrell Carver Writing in accessible engaging prose the contributors to this anchor volume consider themselves critical globalization theorists who seek to provide readers with a better understanding of how dominant beliefs about globalization fashion their realities and how these ideas can be changed to bring about more equitable social arrangements Books in the series will share the same perspective and goals

**Rethinking Imperialism** Ray Kiely, 2010-04-09 Imperialism has become a key focus of debate about world politics in the post 9 11 world This major new text provides a systematic reappraisal of the evolution of the phenomenon and the concept from the 19th century as the basis for a reassessment of Globalization and US hegemony in the world today

**Occupying Subjectivity** Chris Rosedale, 2017-10-02 This book explores a variety of forms of radical political subjectivity It takes its cue from the 2011 uprisings in the Middle East and North Africa the Occupy Movement and the European Anti Austerity Movement alongside the wider opposition to authoritarian and neoliberal forms of governance from which they sprang in order to ask an urgent series of questions about the subject of radical politics Who or what is it that engages in resistance Who or what should they be And how are we to negotiate the many complexities of that second question The contributions drawing on a wide range of theoretical traditions offer a rich series of provocations towards new ways of conceptualising evaluating and imagining radical political praxis They engage different kinds of subjects including protestors dancers self burners academics settlers and humans in order to think through the ways in which contemporary subjects are constituted within and work to unsettle dominant relations of power Together the chapters open up spaces to think about how political and intellectual commitment to social change can be enlivened through attention to the subject of radical politics This book was published as a special issue of Globalizations

**Markets and Development** Toby Carroll, Darryl Jarvis, 2017-10-02 Markets and Development presents a series of critical contributions focused on the political relationship between citizens civil society and neoliberal development policy s latest form The dramatic increase of access to finance investments newly gender sensitive approaches to building neoliberal labour markets the universal promotion of public private partnerships and the development financing of extractive industries have all seen citizens social movements and NGOs variously engaged in and against neoliberalism like never before The precise form that this engagement takes is conditioned by both the perceived and real opportunities and the risks of an agenda which seeks to intern emerging and frontier markets deep within a

concretising world market with transformative repercussions for both those involved and notably for state society relations The contributors to this volume focus on essential aspects of the contemporary neoliberal development agenda and its relationship to and with citizens and civil society tackling questions related to the roles that various actors within civil society in the underdeveloped world are playing under late capitalism and how these roles relate to current efforts to establish and extend markets and market society more broadly in a neoliberal image This book was originally published as a special issue of Globalizations

**China's Development** Michel Aglietta, Guo Bai, 2012-11-12 China is entering a phase where deep structural changes will arise throughout society These multi fold processes will be intertwined in a globalized world impacted by the transformation of capitalism in the aftermath of the financial crisis and under the threat of severe environmental damage Focussing on sustainability this book explores the future of China in light of the successful reforms undertaken in the last thirty years It combines Chinese economic history and up to date macroeconomic theory in order to show how economic transformations and institutional changes are intertwined in developing capitalism under state sovereignty The book is divided into three parts Part 1 analyses the structural changes ahead drawing on the knowledge of the causes of the demise of imperial China and of the social disruptions due to political warfare in the 20th century Part 2 examines the reasons why the last thirty years of reform were successful and why the present growth regime will undergo a dramatic mutation in future decades Part 3 seeks to address the question what type of political economy can support the purpose of achieving harmonious society China's Development will be of interest to students and scholars of Chinese economics politics history and development

**Dialectics in World Politics** Shannon Brincat, 2017-10-02 This volume explores the conceptual methodological and praxeological aspects of dialectical analysis in world politics As dialectics has remained an under theorised analytical tool in international relations this volume provides a critical resource for those seeking to deploy dialectics in their own research by showcasing its effectiveness for understanding and transforming world politics Contributions demonstrate a number of innovative ways in which dialectical thinking can be of benefit to the study of world politics by covering three thematic concerns i conceptual or meta theoretical dimensions of dialectics ii methodological features and general principles of dialectical approaches and iii applications and or case studies that deploy a dialectical approach to world politics Canvassing a diverse range of dialectical approaches on key issues in world politics from global security to postcolonial resistances from the theoretical problems of reification and complexity to the study of the global futures and the intercultural historical expressions of dialectics Dialectics and World Politics offers key insights into the social forces and contradictions that are generative of transformation in world politics and yet routinely downplayed in orthodox approaches to international relations Each chapter demonstrates how dialectics can be utilized more broadly in the discipline and deployed in a critical fashion as part of an emancipatory project This book was originally published as a special issue of Globalizations

**Global Governance, Legitimacy and Legitimation** Magdalena Bexell, 2017-10-02 Rules set by

global governance organizations affect communities across the world. Such organizations increasingly seek to obtain legitimacy in the eyes of groups beyond their member state elites. This book advances scholarly debate on the politics of legitimacy and legitimation in global governance. It brings together researchers from different subfields of International Relations in order to highlight trends and contradictions in the contemporary politics of legitimacy across areas of sustainable development, humanitarian relief, responsible investment, sustainable fisheries, and labour standards. The chapters explore legitimation efforts by various forms of global governance bodies such as intergovernmental organizations, public-private partnerships, and fully private bodies. The book demonstrates that different governance forms beyond the nation state share deep legitimacy challenges and engage in continuous legitimation attempts. Questions on the audiences of such legitimation attempts are particularly pivotal in understanding the politics of legitimacy. Audiences are not predetermined but constituted through interaction between legitimation efforts and the reactions to those of targeted and other groups, mirroring broader global power relations. This book was published as a special issue of *Globalizations*. *Globalization and Capitalist Geopolitics* Daniel Woodley, 2017-11-27. *Globalization and Capitalist Geopolitics* is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non-western states to challenge and overcome domination of the rest of the world by the West. This book argues that although the US continues to preside over a quasi-imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities of global economic convergence, the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power. This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy. Breaking with the classical school, Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets, reproducing the structural conditions for corporate power through the transnational state form of capital. In a period of increasing geopolitical insecurity and economic instability, this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis. It is a valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order. *China's Uneven and Combined Development* Steven Rolf, 2020-10-15. This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic accumulation system which remains a confounding hybrid of statist and neoliberal forms of capitalism as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its

economy while GPNs enabled China to generate substantial export surpluses which could be recycled through state owned banks as cheap credit and subsidies to large vertically integrated and politically controlled state owned enterprises In this way a synergy emerged between the neoliberal and Keynesian Fordist sectors of the economy while the national territorial state retained its form and expanded its functions The book chronicles how this reliance on export surpluses however rendered China extremely vulnerable to external shocks prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008 even while sustaining the illusion of economic decoupling from the global economy Finally it examines the growing role of the state in the current crisis ridden economic model as well as China's current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas

**Imperialism and the development myth** Sam King, 2021-09-07 China and other Third World societies cannot catch up with the rich countries The contemporary world system is permanently dominated by a small group of rich countries who maintain a vice like grip over the key parts of the labour process over the most technologically sophisticated and complex labour Globalisation of production since the 1980s means much more of the world's work is now carried out in the poor countries yet it is the rich imperialist countries through their domination of the labour process that monopolise most of the benefits Income levels in the First World remain five and ten times higher than Third World countries The huge gulf between rich and poor worlds is getting bigger not smaller Under capitalist imperialism it is permanent China has moved from being one of the poorest societies to a level now similar with other relatively developed Third World societies like Mexico and Brazil The dominant idea that it somehow threatens to catch up economically or overtake the rich countries paves the way for imperialist military and economic aggression against China King's meticulous study punctures the rising China myth His empirical and theoretical analysis shows that as long as the world economy continues to be run for private profit it can no longer produce new imperialist powers Rather it will continue to reproduce the monopoly of the same rich countries generation after generation The giant social divide between rich and poor countries cannot be overcome

**The Clash of Globalisations** Ray Kiely, 2005-03-01 This book provides a powerful critique of the case made for globalisation with particular emphasis placed on neo liberalism the third way and the hegemonic role of the US state It then examines the rise of anti globalisation politics and the debate over progressive alternatives to actually existing globalisation

In China's Wake Nicholas Jepson, 2020-01-07 In the early 2000s Chinese demand for imported commodities ballooned as the country continued its breakneck economic growth Simultaneously global markets in metals and fuels experienced a boom of unprecedented extent and duration Meanwhile resource rich states in the Global South from Argentina to Angola began to advance a range of new development strategies breaking away from the economic orthodoxies to which they had long appeared tied In China's Wake reveals the surprising connections among these three phenomena Nicholas Jepson shows how Chinese demand not only transformed commodity markets but also provided resource rich states with the financial leeway to

set their own policy agendas insulated from the constraints and pressures of capital markets and multilateral creditors such as the International Monetary Fund He combines analysis of China led structural change with fine grained detail on how the boom played out across fifteen different resource rich countries Jepson identifies five types of response to boom conditions among resource exporters each one corresponding to a particular pattern of domestic social and political dynamics Three of these represent fundamental breaks with dominant liberal orthodoxy and would have been infeasible without spiraling Chinese demand Jepson also examines the end of the boom and its consequences as well as the possible implications of future China driven upheavals Combining a novel theoretical approach with detailed empirical analysis at national and global scales In China's Wake is an important contribution to global political economy and international development studies

**New Neoliberalism and the Other** Giuseppe Cocco, Bruno Cava, 2018-02-19 The exhaustion of neoliberal globalization is marked by three great tendencies or inflections the first is the scornful failure of the South American attempt to construct a neo developmentalist exit the second is the increasingly unavoidable Chinese effect macro and micro dynamics within globalization the third is the combination of austerity policies and monetary emissions Quantitative Easing that characterize for instance the financial conduct of the Central European Bank The dramatic failure to renew traditional state interventionism in the sphere of Pink Tide in Latin American politics in particular with the violent recession of the biggest economy on the Latin American continent Brazil shows and confirms that the escape from neoliberal regulation does not pass through the return of the traditional role of the state At the same time the Chinese economy came to play a double role On one hand it appears to represent the great and irreversible novelty of neoliberal globalization particularly when our point of perspective is South America While almost nothing remains of the legacy of the center left leaning regimes the last South American decade appears to have genuinely been a Chinese decade The Chinese advance is seen especially by voices of the critical globalization studies as a new outside of Empire as something that stands for an alternative path even if it is nothing more than an old new outside Meanwhile the role played by the financial sector continues to be regarded per se as the fundamental problem of contemporary capitalism For some this is a case of a deviation from an otherwise good capitalism the misleading result of a fictitious and unreal sphere as opposed to the sphere of material economy of good old bosses and hard workers while for others it is a case of one of the moral characteristics of Western civilization infinite debt and capitalism happens to be its modern drift Global Modernity, Development, and Contemporary Civilization José Maurício Domingues, 2013-07-03 This book investigates modern global civilization offering an alternative to post colonial theories and the multiple modernities approach as well as the civilizational theory linked to it It argues that modernity has become a global civilization that is heterogeneous and intertwined with other civilizations and also aims at a renewal of critical theory that is not US centric and Eurocentric focusing instead on China South Asia India and Latin America Brazil Dealing with the themes of centre periphery relations complexity including culture and religion democracy and emancipatory possibilities this

book is based on general theoretical ideas such as collective subjectivity the interplay of memory and creativity and the concept of modernizing moves so as to deal with historical contingency

**Asia and Europe in Globalization** Göran Therborn, Habibul Khondker, 2006-09-30 Readers who are tired of the popularized version of globalization touted as a recent phenomenon will find this book rewarding for both its historical depth and its contemporary significance Dealing with globalization in both time and space a team of prominent sociologists historians political scientists economists and theologians ethicists from both Asia and Europe discuss globalization in terms of actual civilizational encounters and their various consequences Essays range from political and economic developments to the issues of universalistic global ethics covering a wide geographical terrain that includes China Vietnam Bangladesh South and North Korea as well as the European continent In this volume the reader will also find issues in regional development with a special focus on gender and a remarkable contribution on the formation of historical empires such as the Mongol Empire as an early exemplar of globalization

**Reconsidering the Limits to Growth** Viktor Sadovnichy, Askar Akaev, Ilya Ilyin, Sergey Malkov, Leonid Grinin, Andrey Korotayev, 2023-09-25 Echoing the famous The Limits to Growth report from 1972 this edited volume analyses the changes that the World System has undergone to the present on the fiftieth anniversary of the original report During the past fifty years both the concept and understanding of these limits have significantly changed This book highlights that the evolution of the World System has approached a new critical milestone moving into a fundamentally new phase of historical development when the old economic and social technologies no longer work as efficiently as before or even begin to function counterproductively which leads the World System into a systemic crisis The book discusses the transition of human society to a new phase state the shape of which has not yet been determined New approaches are needed for both for the analysis of the global situation and for forecasts The book is based on an integrated approach including the world systems historical and evolutionary perspectives as well as a systematic view of society in which changes in one subsystem cause transformations in others Through mathematical modeling it defines the main vectors of transformations of the World System makes a detailed forecast of the development of all the main subsystems of the society and the World System while presenting horizons of changes from short term to ultra long term and presents different development scenarios as well as recommendations on how to achieve a transition to the most favorable scenario The book will appeal to members and followers of the Club of Rome policy makers as well as to scholars from various disciplines interested in a better understanding of the World System evolution global futures development studies climate change and future societies

Geography and the Literary Imagination in Victorian Fictions of Empire Jean Fernandez, 2020-01-20 In this pioneering study Dr Fernandez explores how the rise of institutional geography in Victorian England impacted imperial fiction s emergence as a genre characterized by a preoccupation with space and place This volume argues that the alliance between institutional geography and the British empire which commenced with the founding of the Royal Geographical Society in 1830 shaped the spatial imagination of

Victorians with profound consequences for the novel of empire Geography and the Literary Imagination in Victorian Fictions of Empire examines Presidential Addresses and reports of the Royal Geographical Society and demonstrates how geographical studies by explorers cartographers ethnologists medical topographers administrators and missionaries published by the RGS local geographical societies or the colonial state acquired relevance for Victorian fiction s response to the British Empire Through a series of illuminating readings of literary works by R L Stevenson Olive Schreiner Flora Annie Steel Winwood Reade Joseph Conrad and Rudyard Kipling the study demonstrates how nineteenth century fiction published between 1870 and 1901 reflected and interrogated geographical discourses of the time The study makes the case for the significance of physical and human geography for literary studies and the unique historical and aesthetic insights gained through this approach
