Chinas Military Power Assessing Current And Future Capabilities:

China's Military Power Roger Cliff, 2015-09-15 Once termed the world's largest military museum the Chinese military has made enormous progress over the past twenty years. With skyrocketing military budgets and new technology, China's tanks, aircraft, destroyers, and missile capabilities are becoming comparable to those of the United States. If these trends continue, how powerful will the Chinese military be in the future? Will its capabilities soon rival or surpass those of the United States? The most comprehensive study of its kind, this book provides a detailed assessment of China's military capabilities in 2000 and 2010, with projections for 2020. It is the first of its kind in outlining a rigorous, theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine, training, equipment, and organizational structure. This framework provides not only the most accurate assessment of China's military to date but an important new tool in the study of military history.

China's Military Power Roger Cliff, 2015-09-15 This book provides a comprehensive assessment of China's military capabilities in 2000 and 2010, with projections for 2020. Recognizing that military power encompasses more than weaponry, it develops an original empirical framework for measuring militaries that also includes doctrine, training, and organizational structure.

China's Use of Military Force in Foreign Affairs Markus B. Liegl, 2017-03-16 This book explains why China has resorted to the use of large-scale military force in foreign affairs. How will China use its growing military might in coming crises and existing conflicts? This book contributes to the current debate on the future of the Asia-Pacific region by examining why China has resorted to using military force in the past. Utilizing fresh theoretical insights on the causes of interstate war and employing a sophisticated methodological framework, the book provides detailed analyses of China's intervention in the Korean War, the Sino-Indian War, China's border clashes with the Soviet Union, and the Sino-Vietnamese War. It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation, as frequently claimed. Rather, the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances. When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships, it is argued that the People's Republic is still a status-seeking and thus highly status-sensitive actor. As a result, China's status ambitions should be very carefully observed and well taken into account when interacting with the PRC. This book will be of much interest to students of Chinese foreign policy, Asian politics, military and strategic studies, and IR in general.

decades **The Return of Bipolarity in World Politics** Øystein Tunsjø, 2018-02-27 Since the collapse of the Soviet Union the international system has been unipolar centered on the United States But the rise of China foreshadows a change in the distribution of power ystein Tunsj shows that the international system is moving toward a U S China standoff bringing us back to bipolarity a system in which no third power can challenge the top two The Return of Bipolarity in World Politics surveys the new era of superpowers to argue that the combined effects of the narrowing power gap between China and the United States and the widening power gap between China and any third ranking power portend a new bipolar system that will differ in crucial ways from that of the last century Tunsj expands Kenneth N Waltz s structural realist theory to examine the new bipolarity within the context of geopolitics which he calls geostructural realism He considers how a new bipolar system will affect balancing and stability in U S China relations predicting that the new bipolarity will not be as prone to arms races as the previous era s that the risk of limited war between the two superpowers is likely to be higher in the coming bipolarity especially since the two powers are primarily rivals at sea rather than on land and that the superpowers are likely to be preoccupied with rivalry and conflict in East Asia instead of globally Tunsj presents a major challenge to how international relations understands superpowers in the twenty first century [Chinese Foreign Policy](#) Marc

Chinese Investment in Africa David N. Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa However most of the available material has approached this issue by looking at China as the New Colonialist more interested in Africa's vast natural resources than working in partnership for sustained development Whilst China's interest in Africa's resources is evident it is just half of the story China's foray into Africa goes beyond its appetite for natural resources and into the realm of geopolitics and international political economics For example China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora Breaking free from the binary arguments and analysis which characterize this topic Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win-win outcomes for China and Africa if Africans really know what they want from China Hitherto each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent indeed Africa and the African Union does not yet have a coordinated policy towards China For Africa to be able to do that it needs to know where China is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win-win engagement with China This book will be a valuable read for policy makers think tanks and students of Africa China studies programmes alike

The Political Economy of China's Belt and Road Initiative in East Africa Simon Züfle, 2023-03-25 This book examines the implementation of the Belt and Road Initiative BRI in East Africa The BRI is considered China's central geopolitical and geo-economic project in the era of President Xi Jinping Through this work the author aims to contribute to filling some research gaps such as the lack of depth in studies of individual BRI projects and the underconsideration of processing narratives in participating countries The guiding question is the extent to which the BRI is a political or hegemonic project of the CCP directed state civil society complex in East Africa To answer these questions databases of international organizations and policy documents are analyzed In addition the author conducts a qualitative content analysis of newspaper articles from local media houses in the countries of Ethiopia Kenya and Tanzania to examine three infrastructure projects The work illustrates that the BRI contributes to increasing connectivity in East Africa At the same time the compression of economic relations and the implementation of infrastructure projects in East Africa lead to numerous consequences and contour a hegemonic project

Unrivaled Michael C. Beckley, 2018-09-15 Beckley demonstrates that no country is poised to upend American primacy not economically not militarily and not technologically The evidence he assembles should be part of any serious debate about where we are headed The New York Times The United States has been the world's dominant power for more than a century Now many analysts believe that other countries are rising and the United States is in decline Is the unipolar moment over Is America finished as a superpower In this book Michael Beckley argues that the United States has unique advantages over other nations that if used wisely will allow it to remain the world's sole superpower throughout this century We are not living in a transitional post Cold War era Instead we are in the midst of what he calls the unipolar era a period as singular and important as any epoch in modern history This era Beckley contends will endure because the US has a much larger economic and military lead over its closest rival China than most people think and the best prospects of any nation to amass wealth and power in the decades ahead Deeply researched and brilliantly argued this book covers hundreds of years of great power politics and develops new methods for measuring power and predicting the rise and fall of nations By documenting long term trends in the global balance of power and explaining their implications for world politics the book provides guidance for policymakers businesspeople and scholars alike

Tao of Soldiering Nihar Kuanr, 2020-03-30 Soldiering is all about the growth and development of human potential in the military organization The approach to soldiering in China is apparently distinct as compared to Indian or Western military and the shaping of soldiery in China has taken a very unique and somewhat enigmatic course In the context of PLA in the ongoing reform era a clear shift in the approach to HRM is apparent One of the most important objectives of the ongoing reforms and restructuring of PLA is to appreciably augment its potential and efficiency for the effective prosecution of Integrated Joint operations IJO for winning Local Wars under Informationised Condition LWUIC This book attempt has been made to take a holistic look at soldiering and development of human potential in PLA thus progressing understanding in the broadly interpreted field of HRM in the context of the Chinese military The author argues that PLA has been adopting a very

systematic methodical and focussed approach towards identifying the key issues and addressing them in a time bound manner to enhance the quality of its personnel to include the enlisted personnel NCOs officers and higher leadership However success or failure of HR policies depends as much on several tangible factors educational qualification technological prowess economic and social background as on various intangible aspects influence of culture belief system traditional practices political and ideological factors impinging on the morale motivation and value system The book would enable interested readers to comprehend and grasp the nuances of the development of human potential in the military in general and PLA in specific Various HRD themes like organizational culture leadership efficient decision making etc analyzed in the book can find application in general context as well

European Foreign and Security Policy towards China

Claude Zanardi, 2022-11-08 This book explores the foreign and security policies of Germany France and the UK vis vis China Despite the progress made by the Lisbon Treaty and notwithstanding the first EU Global Strategy the European Union does not have a strategy to address the rise of China Since this strategic deficit does not automatically reflect the level of EU member states this book argues that the vacuum at EU level provides member states with an opportunity to fill this gap By assuming that an increase in national policies on China would eventually lead to a comprehensive European strategy for China the author focuses on the three biggest European countries and looks at the rise of China to understand the development of the EU s Common Foreign and Security Policy vis vis the PRC While the CFSP depends on the contribution of EU member states their role in shaping the CFSP towards China has not been researched yet and this book fills the gap
