that a concurrent course be taken in the science of Electricity and Magnetism which underlies all practical applications to Electrical Engineering and to those whose time for study is strictly limited this science course may be found sufficient for the first year I have avoided a mathematical treatment as far as possible and the numerical problems have not been worked out to a greater degree of accuracy than is required for practical work In no case is an example given requiring more mathematics than is taught in the first stage of that subject About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
