Historiography Zoe Lowery, 2015-12-15 Historiography is the writing of history and the study of such writing particularly that based on critically examining sources choosing specific details from authentic materials within those sources and finally amalgamating all these details into a history that can withstand an analytical scrutiny This pithy volume delves into a thorough examination beginning with Egypt where the world's earliest annals were penned The text then takes the reader through the evolution of historiography winding through its most important human activities questions and understandings This thought provoking book also guides readers through the theories and the history of historical writing **The Study of History**, 2000 History is a subject which never stands still It is always changing its philosophies its contours its leading questions its politics its conceptual status and its methodologies This bibliographical guide to the study of history is wide ranging in scope extending from the ancient world to the 20th century It deliberately concentrates on modern historians views provides a substantial section on the philosophy of history charts controversies and highlights the continual evolution and diversification of history The material is logically organized in major areas and subsections and cross references are given where appropriate An index of authors editors and compilers is also provided History as a Social Science F. Dovring, 2012-12-06 This essay has grown out of an attempt to find the answers to problems basically inherent in the making of historical research Widespread among humanists is a vagueness of concepts which many times makes it difficult or impossible to translate our way of thinking into the terms of natural science or vice versa It sounds sometimes as if humanistic studies were a world of its own rather than a part of the natural world we all live in How long can we go on believing that there are different kinds of knowledge To this conflict of theory another is added a feeling of urgency about cultural problems that are too often left to the future to solve History is not as some natural scientists tend to believe a matter of no practical consequence It is a virulent factor in political and social conflicts and a basic substance in the structure of our personalities The present dynamic epoch raises with particular stress the problem of understanding the conditioning influence which the past exercises upon the present in each particular community Such a substance is neither a toy for pastime hobbies nor an innocent weapon in the hands of dictators Which is then the responsibility of the historian both for what he does and for what he abstains from doing The necessity to stay independent in order to approach objectivity makes for no easy answer Historiography Eileen K.
