BLOCKCHAIN AND DIGITAL IDENTITY: PRIVACY, SECURITY, AND TRUST IN THE DIGITAL AGE Dr. Pramod Kumar, Mr. Gunawan Widjaja, Dr. Raja Varma Pamba, Muhammad Nur Afiat, 2023-06-06 An identity of a person or organization can be represented by a set of qualities associated with the entity such as the person's or organization's name address and other relevant information Maintaining the data required for identifying a person and controlling their access is a component of identity management The three most important actors in the identity management system are called a Holder an Issuer and a Verifier Personal credentials can be issued to an identity holder a legal individual or business by the identity issuer which is a third party that can be trusted and is often a local government The identity issuer verifies the accuracy of the user's personal information included in the credential before releasing the user's data to that user For instance the surname as well as the month and year of birth These credentials can be saved by the holder of the identity in his or her personality identification wallet and the holder of the identity can use them at a later time to verify assertions about his or her identity to a third party who is the validator of the identity data A credential is a collection of several different identity attributes such as a person's name age and date of birth An identity attribute is a piece of information that describes an identity The holder of a credential can make a verifiable claim which must include certain facts about the holder that must be testified to by the issuer and digitally signed by the issuer Credentials are given out by independent organizations that attest for the truthfulness of the information that is contained inside the credential The validity and dependability of a certificate are directly proportional to the credibility and reputation of the organization that issued it The fact in a credential could be the holder's identification data like their date of birth for example or it might be another form of factual data like their grade point average for example After developing a trustworthy connection with the issuer anybody such as an employer has the potential to act in the capacity of claim verifier The verifier makes a request for a particular credential such as a person's birth certificate for instance and then uses the issuer's signature to validate the legitimacy of the credential Identity management can be difficult if the holders do not have complete control over their own identity data This is because identity data are typically stored at the websites of third party issuers such as government institutes banks and credit agencies

Coruh, 2023-10-04 In the complex tapestry of our modern world where economic landscapes constantly shift and evolve three seemingly disparate phenomena have emerged as defining narratives of our time cryptocurrencies the Syrian refugee crisis and the rise of municipal startups These seemingly unrelated forces have converged to create a fascinating and intricate story of economic development resilience and innovation In this book we embark on a journey to unravel the intricate threads that connect these three distinct aspects of our global reality and shed light on the unique opportunities and challenges they present Cryptocurrencies often heralded as the future of finance have disrupted traditional economic systems and ignited a revolution in the way we perceive and transact value While their origins can be traced back to the early 21st century their impact on global economies has been nothing short of revolutionary As we explore the realm of cryptocurrencies we will delve into their potential to democratise finance mitigate financial inequality and foster innovative solutions in the face of economic adversity In stark contrast the Syrian refugee crisis represents one of the most pressing humanitarian challenges of our time Millions of displaced individuals have sought refuge in neighbouring countries and beyond leading to an

unprecedented strain on economies and infrastructure Yet amidst the adversity stories of resilience and entrepreneurial spirit have emerged The Syrian diaspora driven by a relentless pursuit of stability has contributed to local economies through innovative business ventures We will examine these stories of hope and the transformative role of displaced communities in host nations Amid these global narratives the emergence of municipal startups has quietly reshaped the way cities are managed and services are delivered These innovative ventures driven by a desire to address pressing urban challenges have the potential to redefine the relationship between local governments businesses and communities Through case studies and real world examples we will explore how municipal startups are harnessing technology and community driven solutions to improve urban living standards and foster economic growth As we embark on this exploration of interconnected economic developments we will uncover the underlying themes that bind these seemingly disparate threads together Through the lens of cryptocurrencies the lens of the Syrian refugee crisis and the lens of municipal startups we will gain insights into the evolving dynamics of our global economy the resilience of human spirit in times of adversity and the untapped potential of community driven innovation In doing so we will come to understand how these forces converge to shape the economic landscape of our world today and the opportunities they present for a more equitable and prosperous future **Crypto**

Economy Aries Wanlin Wang, 2018-11-20 In late 2008 under the long shadow cast by the most severe economic crisis in generations a revolutionary new form of currency was quietly being shaped At the time no one could have predicted that an obscure form of electronic money would in less than a decade prove to be the most important financial innovation of the 21st century a tool that would spark an entire new economic institution crypto economy That once obscure money was known as Bitcoin and today it is the highest valued digital coin And though consumers continue to scramble to cash in on the trending currency the technology behind Bitcoin known as Blockchain which allows the currency to be bought and sold without regulation by a government remains a mystery to the public In **Crypto Economy** Aries Wanlin Wang provides the definitive blueprint for understanding how Bitcoin Blockchain and other digital technologies are disrupting traditional financial institutions and forever changing the world of commerce **The Truth Machine** Paul Vigna, Michael J. Casey, 2019-03-05

Views differ on bitcoin but few doubt the transformative potential of Blockchain technology **The Truth Machine** is the best book so far on what has happened and what may come along It demands the attention of anyone concerned with our economic future Lawrence H Summers Charles W Eliot University Professor and President Emeritus at Harvard Former Treasury Secretary From Michael J Casey and Paul Vigna the authors of *The Age of Cryptocurrency* comes the definitive work on the Internet's Next Big Thing **The Blockchain** Big banks have grown bigger and more entrenched Privacy exists only until the next hack Credit card fraud is a fact of life Many of the legacy systems once designed to make our lives easier and our economy more efficient are no longer up to the task Yet there is a way past all this a new kind of operating system with the potential to revolutionize vast swaths of our economy the blockchain In **The Truth Machine** Michael J Casey and Paul

Vigna demystify the blockchain and explain why it can restore personal control over our data assets and identities grant billions of excluded people access to the global economy and shift the balance of power to revive society's faith in itself They reveal the disruption it promises for industries including finance tech legal and shipping Casey and Vigna expose the challenge of replacing trusted and not so trusted institutions on which we've relied for centuries with a radical model that bypasses them The Truth Machine reveals the empowerment possible when self-interested middlemen give way to the transparency of the blockchain while highlighting the job losses assertion of special interests and threat to social cohesion that will accompany this shift With the same balanced perspective they brought to The Age of Cryptocurrency Casey and Vigna show why we all must care about the path that blockchain technology takes moving humanity forward not backward
