Tirpitz Niklas Zetterling, Michael Tamelander, 2009-12-19 The authors of *Bismarck* deliver a very good account of the Tirpitz and of the naval war in the North Atlantic and Norwegian waters during World War II NYMAS Review After the Royal Navy's bloody high seas campaign to kill the mighty Bismarck the Allies were left with an uncomfortable truth the German behemoth had a twin sister Slightly larger than her sibling the Tirpitz was equally capable of destroying any other battleship afloat as well as wreaking havoc on Allied troop and supply convoys For the next three and a half years the Allies launched a variety of attacks to remove Germany's last serious surface threat hidden within fjords along the Norwegian coast Trying an indirect approach the British launched one of the war's most daring commando raids at St Nazaire in order to knock out the last drydock in Europe capable of servicing the Tirpitz Of over six hundred commandos and sailors in the raid more than half were lost during an all night battle that succeeded at least in knocking out the drydock It was not until November 1944 that the Tirpitz finally succumbed to British aircraft armed with ten thousand pound Tallboy bombs the ship capsizing at last with the loss of one thousand sailors In this book military historians Niklas Zetterling and Michael Tamelander authors of *Bismarck The Final Days of Germany's Greatest Battleship* illuminate the strategic implications and dramatic battles surrounding the Tirpitz a ship that may have had greater influence on the course of World War II than her more famous sister A riveting story keeps the reader engaged Nautilus A Maritime Journal of Literature History and Culture

Battleship Tirpitz Vincent O'Hara, 2021-11-15 Building upon the expertise of the authors and historians of the Naval Institute Press the Naval History Special Editions are designed to offer studies of the key vessels battles and events of armed conflict Using an image heavy magazine style format these Special Editions should appeal to scholars enthusiasts and general readers alike In 1939 the battleship was the queen of the seas Battleships were designed to project power They were the biggest and most powerful ships afloat and the yardsticks by which the world judged naval strength Within this context the German battleship Tirpitz sister ship of Bismarck was one of the most effective instruments of naval power ever deployed The British called her The Beast She spent the greater part of the Second World War tucked away in isolated fjords north of the Arctic Circle where she became known as The Lonely Queen of the North She sortied only three times and never fired her guns at an enemy warship Yet against this menace the British exerted unequalled effort At all times they kept a pair of modern battleships standing by to face her should she sail they built mini submarines that could operate in the waters of the fjords they repeatedly massed aircraft carrier strike forces in futile efforts to knock her from the war At last they invented massive ordnance the Tallboy bomb the largest non nuclear explosive device of the war Sending their heaviest bombers against her and after three years of sustained effort the Beast was sunk The remarkable career of this remarkable ship is the subject of this authoritative and heavily illustrated Special Edition It considers Tirpitz's design her construction her historical context and all of her operations The power of this individual ship and the influence she exerted on the entire course of the war makes for an enlightening demonstration of the sometimes very unexpected way sea power can be expressed
