Artificial Intelligence with Python Cookbook starts by showing you how to set up your Python environment and taking you through the fundamentals of data exploration. Moving ahead, you'll be able to implement heuristic search techniques and genetic algorithms. In addition to this, you'll apply probabilistic models, constraint optimization, and reinforcement learning. As you advance through the book, you'll build deep learning models for text, images, video, and audio, and then delve into algorithmic bias, style transfer, music generation, and AI use cases in the healthcare and insurance industries. Throughout the book, you'll learn about a variety of tools for problem solving and gain the knowledge needed to effectively approach complex problems. By the end of this book on AI, you will have the skills you need to write AI and machine learning algorithms, test them, and deploy them for production. What you will learn:

- Implement data preprocessing steps and optimize model hyperparameters
- Delve into representational learning with adversarial autoencoders
- Use active learning recommenders
- Knowledge embedding and SAT solvers
- Get to grips with probabilistic modeling with TensorFlow
- Probability
- Run object detection
- Text to speech conversion and text and music generation
- Apply swarm algorithms
- Multi-agent systems and graph networks
- Go from proof of concept to production by deploying models as microservices
- Understand how to use modern AI in practice

Who this book is for: This AI machine learning book is for Python developers, data scientists, machine learning engineers, and deep learning practitioners who want to learn how to build artificial intelligence solutions with easy-to-follow recipes. You'll also find this book useful if you're looking for state-of-the-art solutions to perform different machine learning tasks in various use cases.

Basic working knowledge of the Python programming language and machine learning concepts will help you to work with code effectively in this book.
