Environmental Modeling with Stakeholders Steven Gray, Michael Paolisso, Rebecca Jordan, Stefan Gray, 2016-12-16 This volume brings together in a central text chapters written by leading scholars working at the intersection of modeling the natural and social sciences and public participation This book presents the current state of knowledge regarding the theory and practice of engaging stakeholders in environmental modeling for decision making and includes basic theoretical considerations an overview of methods and tools available and case study examples of these principles and methods in practice Although there has been a significant increase in research and development regarding participatory modeling a unifying text that provides an overview of the different methodologies available to scholars and a systematic review of case study applications has been largely unavailable This edited volume seeks to address a gap in the literature and provide a primer that addresses the growing demand to adopt and apply a range of modeling methods that includes the public in environmental assessment and management The book is divided into two main sections The first part of the book covers basic considerations for including stakeholders in the modeling process and its intersection with the theory and practice of public participation in environmental decision making The second part of the book is devoted to specific applications and products of the various methods available through case study examination This second part of the book also provides insight from several international experts currently working in the field about their approaches types of interactions with stakeholders models produced and the challenges they perceived based on their practical experiences *Introduction to Environmental Modeling* William G. Gray, Genetha A. Gray, 2017 This textbook presents the timeless basic physical and mathematical principles and philosophy of environmental modeling to students who need to be taught how to think in a different way than they would for more narrowly defined engineering or physics problems Examples come from a range of hydrologic atmospheric and geophysical problems **ENVIRONMENTAL modeling**, 1974 *Environmental Modelling, Software and Decision Support* Anthony J. Jakeman, Alexey A. Voinov, Andrea E. Rizzoli, Serena H. Chen, 2008-09-11 The complex and multidisciplinary nature of environmental problems requires that they are dealt with in an integrated manner Modeling and software have become key instruments used to promote sustainability and improve environmental decision processes especially through systematic integration of various knowledge and data and their ability to foster learning and help make predictions This book presents the current state of the art in environmental modeling and software and identifies the future challenges in the field State of the art in environmental modeling and software theory and practice for integrated assessment and management serves as a starting point for researchers Identifies the areas of research and practice required for advancing the requisite knowledge base and tools and their wider usage Best practices of environmental modeling enables the reader to select appropriate software and gives the reader tools to integrate natural system dynamics with human dimensions **Environmental Modeling** Paolo Zannetti, 1996-04 *Environmental Modeling* Michael John
