Co Operative Innovations In China And The West:

Co-operative Innovations in China and the West C. Gijssels, L. Zhao, S. Novkovic, 2014-07-16 This book aims to contribute to our understanding of recent changes in Chinese and Western cooperatives It will provide a variety of audiences with relevant and useful information for further co operative development mutual understanding and cooperation **The Oxford Handbook of Mutual, Co-Operative, and Co-Owned Business** Jonathan Michie, Joseph R. Blasi, Carlo Borzaga, 2017-03-30 The Oxford Handbook of Mutuals and Co Owned Business investigates all types of member owned organizations whether consumer co operatives agricultural and producer co operatives worker co operatives mutual building societies friendly societies credit unions solidarity organizations mutual insurance companies or employee owned companies Such organizations can be owned by their consumers the producers or the employees whether through single stakeholder or multi stakeholder ownership This complex set of organizations is named differently across countries from mutual in the UK to solidarity cooperatives in Latin America In some countries such organizations are not even officially recognized and thus lack a specific denomination For the sake of clarity this Handbook will refer to member owned organizations to encompass the variety of non investor owned organizations and in the national case study chapters the terms used will be those most widely employed in that country These alternative corporate forms have emerged in a variety of economic sectors in almost all advanced economies since the time of the industrial revolution and the development of capitalism through the subsequent creation and dominance of the limited liability company Until recently these organizations were generally regarded as a rather marginal component of the economy However over the past few years member owned organizations have come to be seen in some countries at least as potentially attractive in light of their ability to tackle various economic and social concerns and their relative resilience during the financial and economic crises of 2007 2013 **The Consumer Co-operative Sector** John F. Wilson, Anthony Webster, Espen Ekberg, Samuli Skurnik, 2023-12-01 Globally consumer co operation has experienced a difficult period since the 1970s Large scale failures in France Germany and Austria were accompanied by loss of market share in the UK including the failure of the Scottish Co operative Wholesale Society and its takeover by its English counterpart Even in the Nordic countries where consumer co operation has always been more robust new challenges from the non co operative sector had to be confronted How did co operative organizations in different countries cope with these challenges What were the processes of strategic renewal that they undertook How successful were they These are the key questions that the collection will address culminating in an analysis by the editors of the effectiveness of strategic renewal in the co operative sector This book is a study of strategic renewal in the consumer co operative sector using eleven international case studies to demonstrate how the concept has been applied over the last fifty years Co-operative and Mutual Enterprises Research Tim Mazzarol, 2023-10-25 Co operative and mutual enterprise is one of the oldest and most enduring forms of business encompassing co operatives mutual firms friendly societies and credit unions This book provides

an expert overview of contemporary research in this important field Governments around the world have encouraged the development of co operative and mutual enterprises CMEs yet relatively little attention has been given to them within the mainstream business and economics research literature In this book the author summarises the origins impacts and structure of the research field The book does so by focusing on the CME business model and is structured around a conceptual framework for research into CMEs It also explores the historical evolution of the CME research field and presents a systematic review of the literature Foundation theories relevant to CMEs are discussed before detailed discussions of the research from a systems enterprise and member level perspective This book critically analyses the state of knowledge in the field of CMEs which delivers a concise and valuable book for scholars and students in the fields of business and management around the world *Cooperatives and the World of Work* Bruno Roelants, Hyungsik Eum, Simel Esim, Sonja

Novkovic, Walteri Katajamäki, 2019-07-16 As the world of work and jobs is more uncertain than ever because of various trends impacting it including the rise of robotics and the gig economy *Cooperatives and the World of Work* furthers the debate on the future of work sustainable development and the social and solidarity economy of which cooperatives are a fundamental component Throughout the book the authors who are experts in their respective fields do not limit themselves to praising the advantages of the cooperative model Rather they challenge the narrow understanding of cooperatives as a mere business model and raise debate on the more fundamental role that cooperatives play in responding to social changes and in changing society itself The book is unique in tracing the historical connection between cooperatives and the world of work since the end of the First World War and the recent shifts and restructuring in enterprise and the workplace It presents a redefinition of the very concept of work focusing on organizational innovation This book is published in recognition of 100 years of the International Labour Organization and gathers together research from leading experts who were brought together at an event co hosted by the International Co operative Alliance ICA and the International Labour Organization ILO

Cooperatives in an Uncertain World Michael Ambühl, Stefano Brusoni, Anja Niedworok, Martin Gutmann, 2024-07-30 This book focuses on different aspects of cooperatives in Switzerland and its neighboring countries and their contribution to meeting overarching societal challenges It seeks to identify how cooperatives can tackle grand societal challenges and extends the body of research on cooperatives The discussions are highlighted in the context of the UN s Sustainable Development Goals The respective chapters cover topics such as cooperatives in Switzerland historical roots current landscape embeddedness in profit nonprofit organizations participatory governance and legal aspects grand societal challenges and cooperatives and the future with and of cooperatives This is an open access book **Co-operatives in a**

Post-Growth Era Tom Webb, Sonja Novkovic, 2014-10-09 For the past three decades neoclassical doctrine has dominated economic theory and policy The balance of power has shifted to protect private interests resulting in unprecedented damage to the environment and society with no solution in sight as more austerity and less government continues to be posited as the

answer to the oncoming waves of crisis It doesn't have to be this way Featuring a remarkable roster of internationally renowned critical thinkers *Co-operatives in a Post Growth Era* presents a feasible alternative for a more environmentally sustainable and equitable economic system specifically the co-operative business model With more than 100 million people working in co-operatives and more than a billion members around the world the time has never been better for co-operatives everywhere to recognise their potential to change the economic landscape An essential book for students policymakers and concerned citizens looking for a practical way to change the current stagnant economic paradigm

The Future of Consumer Society Maurie J. Cohen, 2016-11-03 Consumer society in the United States and other countries is receding due to demographic ageing rising income inequality political paralysis and resource scarcity At the same time steady jobs that compensate employees on a salaried or hourly basis are being replaced by freelancing and contingent work The rise of the so called sharing economy the growth of do it yourself production and the spreading popularity of economic localization are evidence that people are striving to find new ways to ensure livelihoods for themselves and their families in the face of profound change Indications are that we are at the early stages of a transition away from a system of social organization predicated on consumerism These developments have prompted some policy makers to suggest providing households with a non labor source of income that would enable more adequate satisfaction of their basic needs These proposals include a universal basic income a citizen's dividend and a legal framework for broad based stock ownership in corporations However extreme political fractiousness makes it unlikely that these recommendations will receive prompt and widespread legislative endorsement in most countries In the meantime we seem to be moving incontrovertibly toward a twenty first century version of feudalism How might we chart a different path founded on social inclusiveness and economic security A practicable option entails establishment of networks of interlinked worker consumer cooperatives that organizationally unify production and consumer Such modes of mutual assistance already exist and *The Future of Consumer Society* profiles several successful examples from around the world If replicated and scaled worker consumer cooperatives could smooth the transition beyond consumer society and facilitate a future premised on sufficiency resiliency and well being
