Libicki,2009 The protection of cyberspace the information medium has become a vital national interest because of its importance both to the economy and to military power An attacker may tamper with networks to steal information for the money or to disrupt operations Future wars are likely to be carried out in part or perhaps entirely in cyberspace It might therefore seem obvious that maneuvering in cyberspace is like maneuvering in other media but nothing would be more misleading Cyberspace has its own laws for instance it is easy to hide identities and difficult to predict or even understand battle damage and attacks deplete themselves quickly Cyberwar is nothing so much as the manipulation of ambiguity The author explores these in detail and uses the results to address such issues as the pros and cons of counterattack the value of deterrence and vigilance and other actions the United States and the U S Air Force can take to protect itself in the face of deliberate cyberattack Publisher description      *Congressional Record* United States. Congress,1971 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873      *Responses to Cyber Terrorism* . Centre of Excellence - Defence Against Terrorism, Ankara, Turkey,2008-02-28 The one issue touched on repeatedly by the contributors of this publication is the difficulty of arriving at a definition of cyber terrorism A NATO Office of Security document cautiously defines it as a cyber attack using or exploiting computer or communication networks to cause sufficient destruction or disruption to generate fear

or to intimidate a society into an ideological goal But the cyber world is surely remote from what is recognized as terrorism the bloody attacks and ethnic conflicts or more precisely the politically motivated intention to cause death or serious bodily harm to civilians or non combatants with the purpose of intimidating a population or compelling a government UN report Freedom from Fear 2005 It is hard to think of an instance when computer code has physically harmed anyone Yet a number of contributors show that exactly such events potentially on a huge scale can be expected For example attacks on critical infrastructure in particular on SCADA Supervisory Control and Data Acquisition systems which control physical processes in places like chemical factories dams and power stations A part of the publication examines cyber terrorism in the proper sense of the term and how to respond in terms of technology awareness and legal political measures However there is also the related question of responding to the terrorist presence on the Internet so called terrorist contents Here the Internet is not a weapon but an important tool for terrorists communications coordination training recruiting and information gathering on the targets of planned attacks

*Green Restorations* Aaron Lubeck,2010-01-01 Some 40 percent of North Americans live in homes built prior to 1940 and when it comes time to remodel or restore our older homes homeowners and contractors can find themselves lost in a morass of wildly divergent information and opinion With *Green Restorations* author Aaron Lubeck brings his expertise as a restoration contractor and preservation consultant to this first of its kind guide leading the reader through the steps for restoring historic building using sustainable practices and green building techniques In a readily accessible room by room and system by system format *Green Restorations* covers rehabilitation and remodelling questions applicable to old homes focusing on the core techniques and debates often seen in practice Here you ll find the answers to restoration questions such as Is sealing my old crawl space a good idea Should I replace or rehabilitate my windows Are there historic aspects of my home I need to preserve and what can I change What are the cultural environmental and financial implications of my proposed changes Do residential historic tax credits apply to my home and how can I access them Written in such a way as to be accessible for homeowners but technical enough for contractors this book will appeal to anyone trying to green an older home while preserving its historic and cultural significance
