## **Coffee For Consciousness The Application Of Perspective To Reality:**

**Coffee for Consciousness** Vito Mucci, 2015-05-22 Live in the Now Don't worry be happy Follow your bliss These catch phrase imperatives confront us on a daily basis but so few of us seem to know how to do any of those things If you've repeatedly tried and failed to manifest your better self or a more resonant life you might be saying You know it's not that easy **Coffee for Consciousness 101** is the instruction book you've been waiting for because you're right it's not easy Finding yourself takes work and sharing yourself with the world in love takes even more work but the rewards are amazing Our longstanding unhelpful definition of risk and reward is just one of the concepts that author Vito Mucci deconstructs with compassion humor and a deep understanding of the ways in which our beliefs about ourselves and the world get in the way of achieving conscious presence in the world and consciously evolving relationships with ourselves and others Our beliefs and ideas are the lenses through which we look at the world this book gives you the idea of Perspectives a new set of lenses that change what you see and consequently who you can be Rooted in the author's decades of experience in managing his PTSD and addictions through careful cultivation and alteration of consciousness **Coffee for Consciousness 101** is a fascinating joyful and deeply practical exploration of how to read the road map to positive change and greater presence

**Consciousness from a Broad Perspective** Anders Hedman, 2017-05-23 This volume offers an introduction to consciousness research within philosophy psychology and neuroscience from a philosophical perspective and with an emphasis on the history of ideas and core concepts The book begins by examining consciousness as a modern mystery Thereafter the book introduces philosophy of mind and the mind body problem and proceeds to explore psychological philosophical and neuroscientific approaches to mind and consciousness The book then presents a discussion of mysterianist views of consciousness in response to what can be perceived as insurmountable scientific challenges to the problem of consciousness As a response to mysterianist views the next chapters examine radical approaches to rethinking the problem of consciousness including externalist approaches The final two chapters present the author's personal view of the problem of consciousness Consciousness remains a mystery for contemporary science a mystery raising many questions Why does consciousness persist as a mystery Are we humans not intelligent enough to solve the riddle of consciousness If we can solve this mystery what would it take What research would we need to conduct Moreover the mystery of consciousness prompts the larger question of how well the cognitive sciences have actually advanced our understanding of ourselves as human beings After all consciousness is not just a minor part of our existence Without consciousness we would not be human beings at all This book aims to increase the accessibility of major ideas in the field of consciousness research and to inspire readers to contribute to the ongoing discussion of the place of consciousness in nature

*How Consciousness Creates Reality* Claus Janew, 2009-08-18 This is the abridged version of the book of the same title written out of the desire to examine the structure of our reality from a standpoint unbiased by established teachings be they academic scientific popular esoteric or religious in nature Claus Janew begins with seemingly

simple interactions in our daily lives examines how they originate on a deeper level comes to understand the essentials of consciousness and finally recognizes that we create our reality in its entirety In the course of this quest the reader will uncover little heeded paths to accessing the subconscious other individuals and that which can be understood by the term God And the solution to the classical problem of free will constitutes the gist of the concepts thus revealed You do not need to bring previous philosophical knowledge to the reading of this text but simply an interest in fundamental interconnections a certain openness and the willingness to think along This is a treatise which explains the most fundamental results of the authors research and their respective central argument and which can serve as a stimulus for a more extensive examination of reality May it bring you thoughtful pleasure and subtle delight

*The Dawn of Mind* James Cooke, 2024-12-03

Although consciousness is at the very center of who we are its exact nature continues to confound modern science From where does consciousness originate At our core are we material bodies or immaterial conscious minds Many assume that consciousness is a product of our complex brains a product of evolution and yet there is no evolutionary reason that a mechanical function of the brain should allow us to enjoy the beauty of a sunrise or become intoxicated with the smell of rain on dry earth If consciousness is not the product of sophisticated human brains might the nonhuman living world be conscious If so where does that place us in relation to the rest of life on Earth and what does this imply about our domination and plundering of the natural world for resources Dr James Cooke is no stranger to intricate and existential questions such as these and he confronts them head on in his compelling inventive revolutionary new book *The Dawn of Mind* Weaving together cutting edge science and the contemplative insights that arise from mystical experience as occurs with meditation and the emerging therapeutic paradigm of psychedelic medicine Cooke radically redraws our understanding of what it truly means to be who we are Though Cooke approaches the question of consciousness from a rigorous scientific stance his first foray into the study of consciousness was an intensely personal one On a bus ride through Colchester the ancient Roman capital of Britain Cooke spontaneously felt himself feeling intensely and fully connected with the natural world around him his sense of self fell away entirely This transcendent moment inspired years of scientific study and the contemplative exploration of personal mystical experiences leading Cooke to a stunning revelation our sense of self is not an objective fact but an illusion a survival technique we use to try and find order in a disorderly world We each construct a boundary between ourselves and the natural world constantly simulating what will happen around us in order to survive and navigate our surroundings Consider this how long would you make it if you were crossing a busy street and only reacted to an oncoming car reflexively once you felt its touch on your skin Unlike the self however consciousness is no such illusion and is the product of the very same survival process it is the simulation in which our sense of self appears Of course we aren't the only creatures who function in this way According to Cooke consciousness is not complex brain function that only we possess but a deeply embodied phenomenon an essential feature of being a living thing Sure we aren't conscious in the same way as a tree or a worm but as

living things we are all conscious just maybe this notion of our dominion over all other life on earth was a ruse all along Understanding consciousness in this way is not just some theoretical exercise As climate change amplifies by the day a growing chorus of voices insists that our fundamental disconnect from nature is at the root of our ecological crisis Healing the divide between nature and consciousness may be the key to extricating ourselves from this dire predicament

**Consciousness** Prem Saran Satsangi, Stuart Hameroff, Vishal Sahni, Pami Dua, 2016-01-01 This unique volume brings together eastern and western perspectives on consciousness with essays from philosophers and scientists which emphasize different aspects of the integration The overarching aim of this book is to provide direction toward integrating Eastern philosophical and religious practice with philosophies and science of Western culture an aim that could be pivotal in understanding consciousness and its place in nature A unifying approach is adopted to the study of consciousness integrating the wisdom of the sages of the east and the scientists of the west and the stupendous east west integration that has been achieved is indeed a milestone The book will appeal to the rapidly growing mass of scientists and students in this upcoming field both in the east and west as well as the general inquisitive reader Courses in consciousness studies are being promoted in leading Universities all over the world It will also interest the followers and adherents of Eastern Philosophy of Saints and Radhasoami Faith numbering in a few millions around the globe Phenomenological Reflections on Mindfulness in the Buddhist Tradition Erol Čopelj, 2022-06-24 This book offers an original phenomenological description of mindfulness and related phenomena such as concentration sam dhi and the practice of insight vipassan It demonstrates that phenomenological method has the power to reanimate ancient Buddhist texts giving new life to the phenomena at which those texts point Beginning with descriptions of how mindfulness is encountered in everyday pre philosophical life the book moves on to an analysis of how the Pali Nik yas of Theravada Buddhism define mindfulness and the practice of cultivating it It then offers a critique of the contemporary attempts to explain mindfulness as a kind of attention The author argues that mindfulness is not attention nor can it be understood as a mere modification of the attentive process Rather becoming mindful involves a radical shift in perspective According to the author s account being mindful is the feeling of being tuned in to the open horizon which is contrasted with Edmund Husserl s transcendental horizon The book also elucidates the difference between the practice of cultivating mindfulness with the practice of the phenomenological epoch which reveals new possibilities for the practice of phenomenology itself Phenomenological Reflections on Mindfulness in the Buddhist Tradition will appeal to scholars and advanced students interested in phenomenology Buddhist philosophy and comparative philosophy **The Boundaries of Consciousness: Neurobiology and Neuropathology** Steven Laureys, 2006-08-24 Consciousness is one of the most significant scientific problems today Renewed interest in the nature of consciousness a phenomenon long considered not to be scientifically explorable as well as increasingly widespread availability of multimodal functional brain imaging techniques EEG ERP MEG fMRI and PET now offer the possibility of detailed integrated exploration

of the neural behavioral and computational correlates of consciousness The present volume aims to confront the latest theoretical insights in the scientific study of human consciousness with the most recent behavioral neuroimaging electrophysiological pharmacological and neuropathological data on brain function in altered states of consciousness such as brain death coma vegetative state minimally conscious state locked in syndrome dementia epilepsy schizophrenia hysteria general anesthesia sleep hypnosis and hallucinations The interest of this is threefold First patients with altered states of consciousness continue to represent a major clinical problem in terms of clinical assessment of consciousness and daily management Second the exploration of brain function in altered states of consciousness represents a unique lesional approach to the scientific study of consciousness and adds to the worldwide effort to identify the neural correlate of consciousness Third new scientific insights in this field have major ethical and social implications regarding our care for these patients
