## **Coastal Governance Foundations Of Contemporary Environmental Studies Series:**

Coastal Governance Richard Burroughs, 2011 Coastal Governance provides a clear overview of how U S coasts are currently managed and explores new approaches that could make our shores healthier Drawing on recent national assessments Professor Richard Burroughs explains why traditional management techniques have ultimately proved inadequate leading to polluted waters declining fisheries and damaged habitat He then introduces students to governance frameworks that seek to address these shortcomings by considering natural and human systems holistically The book familiarizes students not only with current management techniques but with the policy process By focusing on policy development Coastal Governance prepares readers with the knowledge to participate effectively in a governance system that is constantly evolving This understanding will be critical as students become managers policymakers and citizens who shape the future of the coasts

**An Introduction to Scientific Research Methods in Geography and Environmental Studies** Daniel Montello, Paul Sutton, 2012-12-10 Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation From chapters on the scientific method and fundamental research concepts to experimental design sampling and statistical analysis the text offers an excellent introduction to the key concepts of geographical research The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters Joseph Mallalieu School of Geography Leeds University Montello and Sutton is one of the best texts I've used in seminars on research methodology The text offers a clear balance of quantitative vs qualitative and physical vs human which I've found particularly valuable The chapters on research ethics scientific communication information technologies and data visualization are excellent Kenneth E Foote Department of Geography University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research covering both geography and environmental studies Written for undergraduate and postgraduate students it Explains both the conceptual and the technical aspects of research as well as all phases of the research process Combines approaches in physical geography and environmental science human geography and human environment relations and geographic and environmental information techniques such as GIS cartography and remote sensing Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography environmental studies and related disciplines such as planning and earth science

**Water Resources** Shimon C. Anisfeld, 2011-01-03 In this concise introduction to water resources Shimon Anisfeld explores the fundamental interactions between humans and water including drinking sanitation irrigation and power production The book familiarizes students with the current water crisis and with approaches for managing this essential resource more effectively in a time of rapid

environmental and social change Anisfeld addresses both human and ecological problems including scarcity pollution disease flooding conflicts over water and degradation of aquatic ecosystems In addition to providing the background necessary to understand each of these problems the book discusses ways to move towards better management and addresses the key current debates in the water policy field In the past water development has often proceeded in a single sector fashion with each group of users implementing its own plans without coordination with other groups resulting in both conflict and inefficiency Now Anisfeld writes the challenge of water management is figuring out how to balance all the different demands for water from sanitation to energy generation to ecosystem protection For inquiring students of any level *Water Resources* provides a comprehensive one volume guide to a complex but vital field of study Markets and the Environment, Second Edition Nathaniel O. Keohane, Sheila M. Olmstead, 2016-01-05 A clear grasp of economics is essential to understanding why environmental problems arise and how we can address them Now thoroughly revised with updated information on current environmental policy and real world examples of market based instruments The authors provide a concise yet thorough introduction to the economic theory of environmental policy and natural resource management They begin with an overview of environmental economics before exploring topics including cost benefit analysis market failures and successes and economic growth and sustainability Readers of the first edition will notice new analysis of cost estimation as well as specific market instruments including municipal water pricing and waste disposal Particular attention is paid to behavioral economics and cap and trade programs for carbon Publisher's web site SEJ Journal, 2006 **Sustainable Development and Planning IX** C.A. **Responding to Climate Change** Paul Burton, 2014-11-05 South East Queensland has been one of the fastest growing regions of Australia both in terms of its rapidly growing population and an ever expanding built environment It is also one of the most vulnerable regions likely to suffer from the adverse impacts of climate change especially increased flooding storms coastal erosion and drought Responding to Climate Change Lessons from an Australian Hotspot brings together the results of cutting edge research from members of the Griffith Climate Change Response Program showing how best to respond to anticipated changes and how to overcome barriers to adaptation The authors treat climate change adaptation as a cross cutting multi level governance policy challenge extending across human settlements infrastructure ecosystems water management primary industries emergency management and human health The research focuses on but is not limited to the experience of climate change adaptation in the recognised climate hotspot of South East Queensland The results of this research will be of interest to planners policy makers and other practitioners engaged in urban and environmental planning coastal management public health emergency management and physical infrastructure at the local regional and metropolitan government scales

**Anthropology and Climate Change** Susan A. Crate, Mark Nuttall, 2016-03-31 The first edition of Anthropology and Climate Change 2009 pioneered the study of climate change through the lens of anthropology covering the relation between human cultures and the environment from prehistoric times to the present This second heavily revised edition brings the material on this rapidly changing field completely up to date with major scholars from around the world mapping out trajectories of research and issuing specific calls for action The new edition introduces new foundational chapters laying out what anthropologists know about climate change today new theoretical and practical perspectives insights gleaned from sociology and international efforts to study and curb climate change making the volume a perfect introductory textbook presents a series of case studies both new case studies and old ones updated and viewed with fresh eyes with the specific purpose of assessing climate trends

provides a close look at how climate change is affecting livelihoods especially in the context of economic globalization and the migration of youth from rural to urban areas expands coverage to England the Amazon the Marshall Islands Tanzania and Ethiopia re examines the conclusions and recommendations of the first volume refining our knowledge of what we do and do not know about climate change and what we can do to adapt      **Responses to Disasters and Climate Change** Michele

Companion, Miriam S. Chaiken, 2016-11-30 As the global climate shifts communities are faced with a myriad of mitigation and adaptation challenges These highlight the political cultural economic social and physical vulnerability of social groups communities families and individuals They also foster resilience and creative responses Research in hazard management humanitarian response food security programming and other areas seeks to identify and understand factors that create vulnerability and strategies that enhance resilience at all levels of social organization This book uses case studies from around the globe to demonstrate ways that communities have fostered resilience to mitigate the impacts of climate change

*Interactive Governance for Small-Scale Fisheries* Svein Jentoft, Ratana Chuenpagdee, 2015-05-30 Drawing on more than 30 case studies from around the world this book offers a multitude of examples for improving the governance of small scale fisheries Contributors from some 36 countries argue that reform transformation and innovation are vital to achieving sustainable small scale fisheries especially for mitigating the threats and vulnerabilities of global change For this to happen governing systems must be context specific and the governability of small scale fisheries properly assessed The volume corresponds well with the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries adopted in 2014 spearheaded by the United Nations Food and Agriculture Organization FAO These affirm the importance of small scale fisheries for food security nutrition livelihoods rural development and poverty reduction The book arises from the project Too Big To Ignore Global Partnership for Small Scale Fisheries Research TBTI A nuanced diverse vibrant and local specific collection of essays just as the small scale fisheries around the world dealt with by this versatile array of authors Following on the heels of the recently adopted FAO Small Scale Fisheries Guidelines here is an erudite compendium which I heartily recommend to policy makers academics and activists who wish to come to terms with the complex issue of governance of this important field of human activity John Kurien Founding Member of the International Collective in Support of Fishworkers ICSF and Former Professor Centre for Development Studies Trivandrum India Likely to become a classic in its field this book is about small scale fisheries and interactive governance governance which is negotiated deliberated upon and communicated among stakeholders who often share governing responsibilities The authors show that interactive governance is not just a normative theory but a phenomenon that can be studied empirically here with 34 case studies from as many countries around the world north and south east and west Such force of example enables the editors to put together well developed arguments and sometimes surprising conclusions about the way ahead A must read for managers practitioners stakeholders and students Fikret Berkes University of Manitoba Canada and author of *Coasts for People*      *Governability of Fisheries and Aquaculture:*

*Theory and Applications* Maarten Bavinck, Ratana Chuenpagdee, Svein Jentoft, Jan Kooiman, 2013-04-10 Following from Fish for Life Interactive Governance for Fisheries Kooiman et al 2005 which presents an interdisciplinary and intersectoral approach to the governance of capture and aquaculture fisheries this volume pursues what interactive governance theory and the governability perspective contribute to the resolution of key fisheries problems these include overfishing unemployment and poverty food insecurity and social injustice Since these problems are varied and can be felt among governments resource users and communities globally the diagnosis must be holistic and take account of principles institutions and operational conditions The authors argue that wicked problems and institutional limitations are inherent to each setting and must be included in the analysis The volume thereby offers a new lens and a systematic approach for analysing the nature of problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world's fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado
