WW2 Codebreaking Events and Organisations Ronald Koorn, 2025-07-10. The second volume of a series on a glossary of codebreaking. *WW2 Codebreaking Events and Organisations* brings to the reader an easily understandable account and listing of those organisations involved in collecting and analysing military intelligence principally during the second world war. A listing of key events or occurrences is provided which moulded the direction of codebreaking and gathering of enemy intelligence. Whilst Bletchley Park was the HQ of codebreaking activities in wartime, numerous organisations became involved in a support role, and this became critical when more advanced enemy encoding machines were introduced by the Nazis. The evolution of certain organisations over time can be tracked to a degree by reading the glossary in depth. The entries are cross-referenced to enable the reader to research as much or as little as they want to dip in to the glossary to use it as a basis for further study or just to learn a little more about the people and organisations that helped us win the war with our allied friends.
