 Gerhard Rabe,2013-04-18 Safety related computer systems are those which may lead to loss of life injury or plant and
 environmental damage Such systems therefore have to be developed and implemented so that they meet strict require and
 security because their applications cover ments on safety reliability nearly all areas of daily life and range from controlling
 and monitoring industrial processes through robotics and power generation to transport systems Highly reliable electronic
 systems for safety related applications represent an area in which industry has been involved for many years and which is
 now gaining increasing importance in academia Their relevance also results from an increased perception of safety by society
 Therefore not only are technicians involved in this area but psycho logical and sociological aspects also play a major role
 Dealing with safety related systems we have to consider the whole lifecycle of these systems starting from specification up to
 implementation assessment and operation All those issues mentioned above are covered in this book which represents the
 proceedings of the 14th International Conference on Computer Safety Reliability and Security SAFECOMP 95 held in
 Belgirate Italy 11 13 October 1995 The conference continues the series of SAFECOMP conferences which was originated by
 the European Workshop on Industrial Computer Systems Technical Committee 7 on Safety Security and Reliability EWICS
