Eisenhowers Guerrillas Jedburghs Maquis Liberation Ebook:

The Price of Freedom David Foulk, 2022-11-04 This is a significant book that investigates how the French internal resistance and external Free French movement were financed during the Second World War. It brings together the secretive financial aspects of resistance inside France with those under the control of the Free French movement in London. To date, there have been a number of studies that have followed the Gaullist movement, but none have studied how they were funded. This exploration also demonstrates the global scale of the war. It shows how the Free French were not simply a European Atlantic based movement but were in fact colonial and operated on a global scale, shedding light on French relations with their colonies in Africa and the Pacific. It underlines the role played by expatriates, those belonging to the French diaspora, and third country nationals in Allied nations and neutral countries including Central and South America. Through the combination of digital humanities methods including social network analysis and GIS Geographic Information Systems, the Allied funding for de Gaulle's movement and the internal resistance will be unveiled for the first time in its entirety. The painstaking reconstruction of the financial records of the Free French and their lines of subsidy is a novel approach that sheds new light onto the financial networks between French, British, and American officials who made this financing possible. This illuminates the complexity of international relations in a time of war. Using a combination of economic and accounting analysis, as well as primary sourced historical research, this book distinctively applies sociological methodologies to this long held question. This book will be of interest to those in economics, economic history, finance, accounting, digital humanities, modern history, international relations, political science, and war studies.
