### Estructura de clases agraria y desarrollo económico en la Europa preindustrial

Robert Brenner hace hincapié en que los modelos económicos están destinados al fracaso, ya que según él:

"es la estructura de relaciones de clase, del poder de clase lo que determina el modo y el grado en que los cambios concretos que se operan desde una perspectiva demográfica o comercial afectan la distribución de la renta y el desarrollo económico a largo plazo, y no al contrario."

Dicho de otro, lo que prevalece en importancia es la forma en la que "funcionan" las estructuras de clase, ya sea refinándose a la relación de propiedad del productor directo con respecto a los medios de producción como a la manera en la que se extrae el excedente y tienden a poner límites a la forma en la que los aspectos demográficos o mercantiles inciden en el desarrollo económico.

Antes que nada, Brenner se propone refutar las teorías demográficas y mercantiles.

### El modelo demográfico

El modelo malthusiano merece atención, ya que tiene lógica: la subdivisión y la superpoblación de las tenencias y el agotamiento de los recursos naturales suponen hambre y escasez, lo que produce un descenso demográfico, y luego de ello la vuelta a la condición de equilibrio. Aunque parezca infalible, el modelo malthusiano choca con el problema de la distribución de la tierra y la manera en la que estaban establecidas las relaciones de propiedad, tanto del campesino como del señor, y cual era la naturaleza de las relaciones y el poder de clase. El modelo demográfico está condicionado porque no explica la distribución del producto de la tierra y la relación entre el señor y el campesino.

### El modelo mercantil

Para oponerse a este modelo, Brenner recurre a Postan, que demostró que durante el periodo de comienzo del mercado mundial de granos, se dio un mayor grado de sujeción del campesinado en el este de Europa, al mismo tiempo que se desarrollaba el capitalismo en el oeste. La interpretación mercantil falla en que ignora la capacidad del señor para aplicar exacciones arbitrarias. La alteración del tipo de renta no implicó la finalización del poder del señor sobre el campesino, sino más bien su continuidad.

**Rethinking Revolutionary Change in Europe** Bailey Stone, 2020-02-17 Reconsidering the English French and Russian Revolutions this book offers an important new approach to the theoretical and comparative study of revolutions Bailey Stone proposes an innovative neostructuralist integration of competing structuralist and postmodernist theory Providing a balanced and nuanced critique of both sides he presents new ways of understanding radical change in the European polities that created the concept and the dramatic realities of modern revolution He focuses on the central issues of modernizers versus traditionalists old regime bourgeoisies regicides terror and state legitimacy By reconciling political and cultural theories of revolutionary causation and process Stone's synthesis marks a critical advance in our understanding of revolution *The Medieval Antecedents of English Agricultural Progress* Bruce M.S. Campbell, 2023-05-31 Until recently historians tended to stress the perceived technological and ecological shortcomings of medieval agriculture The ten essays assembled in this volume offer a contrary view Based upon close documentary analysis of the demesne farms managed for and by lords they show that by 1300 in the most commercialized parts of England production decisions were based upon relative factor costs and commodity prices Moreover when and where economic conditions were ripe and environmental and institutional circumstances favourable medieval cultivators successfully secured high and ecologically sustainable levels of land productivity They achieved this by integrating crop and livestock production into the sort of manure intensive systems of mixed husbandry which later underpinned the more celebrated output growth of the seventeenth and eighteenth centuries If medieval agriculture failed to fulfill the production potential provided by wider adoption of such systems this is more appropriately explained by the want of the kind of market incentives that might have justified investment innovation and specialization on the scale that characterized the so called agricultural revolution than either the lack of appropriate agricultural technology or the innate backwardness of medieval cultivators *El origen del capitalismo* Ellen Meiksins Wood, 2021-05-24 El capitalismo no es ni una consecuencia inevitable de la naturaleza humana ni una mera ampliación de antiguas prácticas comerciales cuyos orígenes se pierden en la noche de los tiempos Desencadenado en unas coordenadas espaciales y temporales específicas el capitalismo necesitaba de una transformación radical previa de las relaciones entre los seres humanos y de estos con la naturaleza En este clásico de Ellen Meiksins Wood la autora ofrece al público lector una introducción formidable y accesible a las teorías y debates en torno al nacimiento del capitalismo el imperialismo y el Estado nación moderno *The Emergence of a National Market in Spain, 1650-1800* Guillermo Perez Sarrion, 2016-06-16 Awarded the Jaume Vicens Vives Prize by the Spanish Association of Economic History this study analyses the development of the Spanish domestic market from 1650 to 1800 which transformed the country from a pseudocolonial territory politically and economically dependent on its European neighbours to a significant European power The Emergence of a National Market in Spain 1650 1800 places Spain firmly in a European context arguing that the origins of a sophisticated economy must be

understood through the complex diplomacy of the period namely the competition between Britain and France for dominance in the Iberian peninsula It was in response to this rivalry that the Spanish state actively promoted the conditions for economic development in the 18th century aided by autonomous commercial networks of Catalan merchants Navarrese tradesmen and migrant French businessmen This original interpretation by one of Spain's leading economic historians available in English for the first time is indispensable reading for students and scholars of Spanish history

**Crises and Transformation in the Mediterranean World** Jordi Catalan Vidal, 2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705 1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalonian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics

**Land, Labour and Tenure: the Institutional Arrangements of Conflict and Cooperation in Comparative Perspective** Clara Eugenia Núñez, 1998 The character of English rural society Henry French, Richard Hoyle, 2013-07-19 This is a major study of the transformation of early modern English rural society It begins by assessing the three major debates about the character of English society the Brenner Debate the debate over English Individualism and the long running debate over the disappearance of the small landowner It then turns to the history of Earls Colne in Essex which has never before been the subject of a full length study despite it being one of the most discussed villages in England French and Hoyle's rounded account describes the arrival of a new landlord family the Harlakendens the tensions created by this change and the gradual atrophy of their power This account of change is backed up by a new and original analysis of landholding in the village which depicts the land market in unprecedented detail and explores the changing significance of landownership for ordinary people It is a key work for all those interested in how English rural society changed between the sixteenth and eighteenth centuries

**Spanish Society, 1400-1600** Teofilo F Ruiz, 2014-09-11 Spanish Society depicts a complex and fascinating country in transition from the late Middle Ages to modernity It describes every part of society from the gluttonous nobility to their starving peasants Through anecdotes a lively style and portraits of figures such as St Teresa of Avila and Torquemada the book reflects the character and humour with which the common Spaniard endured an often

wretched lot Beginning with a description of the geography political life and culture of Spain from 1400 to 1600 the unfolding narrative charts the country's shifts from one age to the next It unveils patterns of everyday life from the court to the brothel from the haves of the aristocracy and clergy to the have nots of the peasantry and the urban poor Historical records illuminate details of Spanish society such as the transition from medieval festivities to the highly scripted spectacles of the early modern period the reasons for violence and popular resistance and the patterns of daily living eating dressing religious beliefs and concepts of honour and sexuality This compelling account includes historical examples and literary extracts which allow the reader direct access to the period From the street theatre of village carnivals to the oppressive Spanish Inquisition it gives an abiding sense of Spain in the making and renders vivid the colours of a passionate history

Mexico's Regions Eric Van Young,1992 These essays grew out of a workshop conference of the same title held at the Center for U S Mexican Studies University of California San Diego in December 1988 Capitalism in the Web of Life Jason W. Moore,2025-08-19 Integrating both social and historical factors this radical analysis of the development of capitalism reveals the ever deepening relationship between capital and ecology Finance Climate Food Work How are the crises of the twenty first century connected In Capitalism in the Web of Life Jason W Moore argues that the sources of today's global turbulence have a common cause capitalism as a way of organizing nature including human nature Drawing on environmentalist feminist and Marxist thought Moore offers a groundbreaking new synthesis capitalism as a world ecology of wealth power and nature Capitalism's greatest strength and the source of its problems is its capacity to create Cheap Nature's labor food energy and raw materials That capacity is now in question Rethinking capitalism through the pulsing and renewing dialectic of humanity in nature Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis Capitalism in the Web of Life shows how the critique of capitalism in nature rather than capitalism and nature is key to understanding our predicament and to pursuing the politics of liberation in the century ahead **Rethinking the Great Transition** Peter L. Larson,2022-01-27 This case study of two rural parishes in County Durham England provides an alternate view on the economic development involved in the transition from medieval to modern partly explaining England's rise to global economic dominance in the seventeenth century Coal mining did not come to these parishes until the nineteenth century these are an example of agrarian expansion Low population favourable seigniorial administration and a commercialised society saw the emergence of large farms on the bishopric of Durham soon after the Black Death these secure copyhold and leasehold tenures were among the earliest known in England Individualism developed within a strong parish and village community that encouraged growth while enforcing conformity tenants had freedom to farm as they wished within limits Along with low rents this allowed for a swift expansion of agricultural production in the sixteenth century as population rose and then as the coal trade expanded rapidly The prosperity of these men is reflected in their lands livestock and consumer goods Yet not all shared in this prosperity as the poor and landless increased in number simply by

population growth Through reformation and rebellion these and other parishes prospered without experiencing severe disruption or destruction In north eastern England agrarian development was an evolution and not a revolution This study shows England s economic development as a single narrative woven together from a collection of regional experiences at different times and at different speeds      The Culture of Capital Henry Turner,2014-04-08 Leading literary critics and historians reassess one of the defining features of early modern England the idea of capital The collection reevaluates the different aspects of the concept amidst the profound changes of the period      **The Other Rebellion** Eric Van Young,2002-04-01 Mexico s movement toward independence from Spain was a key episode in the dissolution of the great Spanish Empire and its accompanying armed conflict arguably the first great war of decolonization in the nineteenth century This book argues that in addition to being a war of national liberation the struggle was also an internal war pitting classes and ethnic groups against each other an intensely localized struggle by rural people especially Indians for the preservation of their communities While local and national elites focused their energies on wresting power from colonial authorities and building a new nation state rural people were often much more concerned about keeping village identities and lifeways intact against the forces of state expansion commercialization and modernization Conventional wisdom says that Mexican independence was achieved through a cross class and cross ethnic alliance between creole ideologues military leaders and a mass following This book shows that this is not only an incomplete explanation of what went on in Mexico during the decade of armed confrontation that led to Mexico s independence but also a distortion of Mexican social and cultural history The author delves deeply into life histories previously unexamined texts statistical social profiling and local historical ethnography to examine the dynamics of popular rebellion He focuses especially on Mexico s Indian villages but also considers the role of parish priests as insurgent leaders local conflicts over land politics and religious symbols the influence of messianism and millenarianism in popular insurgent ideology and the everyday language of political upheaval      **The Civic Foundations of Fascism in Europe** Dylan Riley,2019-01-15 Drawing on a Gramscian theoretical perspective and developing a systematic comparative approach The Civic Foundations of Fascism in Europe challenges the received Tocquevillian consensus on authoritarianism by arguing that fascist regimes just like mass democracies depended on well organised rather than weak and atomised civil societies In making this argument the book focuses on three crucial cases of interwar authoritarianism Italy Spain and Romania selected because they are all counterintuitive from the perspective of established explanations while usefully demonstrating the range of fascist outcomes in interwar Europe Civic Foundations argues that in all three cases fascism emerged because of the rapid development of voluntary associations combined with weakly developed political parties among the dominant class thus creating a crisis of hegemony Riley then traces the specific form that this crisis took depending on the form of civil society developed autonomous as in Italy elite dominated as in Spain or state dominated as in Romania in the nineteenth century      Agriculture and Rural Society After the Black Death Ben

Dodds, R. H. Britnell, 2008 With special emphasis on the period following the Black Death this new collection of essays explores agriculture and rural society during the late Middle Ages Combining a broad perspective on agrarian problems such as depopulation and social conflict with illustrative material from detailed local and regional research this compilation demonstrates how these general problems were solved within specific contexts The contributors supply detailed studies relating to the use of the land the movement of prices the distribution of property the organization of trade and the cohesion of village society among other issues New research on regional development in medieval England and other European countries is also discussed

**Domination and Resistance** Daniel Miller, Michael Rowlands, Chris Tilley, 2005-06-27 uses a wealth of perspectives and case studies from archaeology and its related disciplines to delineate and assess the mechanisms of dominance and of its counterpart resistance

**Social Theory and Japanese Experience** Johann P. Arnason, 2013-12-16 First published in 1997 This book is addressed to two kinds of readers to social theorists on the grounds that the Japanese experience is or should be of particular relevance to their problems and to scholars working on Japanese history culture and society in the hope that the theoretical interpretations outlined below may be of some interest to them

The Middling Sort of People Jonathan Barry, Christopher Brooks, 1994-10-26 This volume of essays seeks to offer a radical re-evaluation of most of our preconceptions about the early modern English social order The majority of people who lived in early modern England were neither very rich nor very poor

yet a disproportionate amount of historiography has been directed towards precisely these groups This book intends to define the term middle classes and treat them as active participants of history rather than as a simple by product rising and falling according to others activities
