Raptor Andrew Feld, 2012-02-12 *Raptor* the second book by the author of the widely praised *Citizen* is a collection of formal poems and measured free verse unified by its investigation of our ancient poetic mythic and scientific fascination with birds of prey hawks eagles owls vultures and falcons Drawing extensively on his own experience working at a raptor rehabilitation center along with a variety of sources ranging from medieval texts on falconry to the latest conservation studies of raptor anatomy and habitat Andrew Feld shows these killing birds to be mirrors for humanity as indicator species and as highly charged figures for the intersection of that which we call wild and that which we think of as domesticated or domestic and how these opposed terms apply to the imperiled natural world to our human social relations and to our most private interior selves In these poems Feld does not shy away from either the damaging world or the new more comprehensive view damage affords in its aftermath

The Red-tailed Hawk Liam J. McGranaghan, 2001 Passions for Birds Sean Nixon, 2022-05-15 Whether as sources of joy and pleasure to be fed counted and watched as objects of sport to be hunted and killed or as food to be harvested wild birds evoke strong feelings Sean Nixon traces the transformation of these human passions for wild birds from the early twentieth century through the 1970s detailing humans close encounters with wild birds in Britain and the wider North Atlantic world Drawing on a rich range of written sources Passions for Birds reveals how emotional subjective and material attachments to wild birds were forged through a period of pronounced social and cultural change Nixon demonstrates how for all their differences new traditions in birdwatching and conservation field sports and bird harvesting mobilized remarkably similar feelings towards birds Striking similarities also emerged in the material forms that each of these practices used to bring birds closer to people hides and traps nets and ropes and binoculars Wide ranging in scope Passions for Birds sheds new light on the ways in which wild birds helped shape humans throughout the twentieth century as well as how birds themselves became burdened with multiple cultural meanings and social anxieties over time *The Great Eagles* Michael O'Neal Campbell, 2022-05-18 This book examines the current literature and knowledge on the evolution and ecology

of all the birds named as eagles with particular emphasis on the larger species It also examines the past and current relations between eagles and people including habitat change and conservation issues Eagle ecologies and conservation are currently seriously impacted by human activities such as industrialization urbanization pollution deforestation and hunting Some eagle species have consequently experienced extreme population changes There are however some positive developments Eagles have a strong historic bond with human civilization due to their status as the world's most charismatic birds Conservation policies have also been successful in repopulating some ecosystems with breeding eagles Therefore despite the complexity of this relationship there may yet be hope for this unique species group frequently rated as the kings of birds and symbolic of human power ambition royalty nationality and even concepts of God It is hoped that this book will contribute to the further understanding of these unique and fantastic birds
