Labor Relations Reference Manual ,1982 Vols 9 17 include decisions of the War Labor Board Indigenism Alcida Rita Ramos,1998 Indigenous people comprise only 0.2% of Brazil's population yet occupy a prominent role in the nation's consciousness In her important and passionate new book anthropologist Alcida Ramos explains this irony exploring Indian and non Indian attitudes about interethnic relations Ramos contends that imagery about indigenous people reflects an ambivalence Brazil has about itself as a nation for Indians reveal Brazilians contradiction between their pride in ethnic pluralism and desire for national homogeneity Based on her more than thirty years of fieldwork and activism on behalf of the Yanomami Indians Ramos explains the complex ideology called indigenism She evaluates its meaning through the relations of Brazilian Indians with religious and lay institutions non governmental organizations official agencies such as the National Indian Foundation as well as the very discipline of anthropology Ramos not only examines the imagery created by Brazilians of European descent members of the Catholic church government officials the army and the state agency for Indian affairs she also scrutinizes Indians own self portrayals used in defending their ethnic rights against the Brazilian state Ramos thoughtful and complete analysis of the relation between indigenous people of Brazil and the state will be of great interest to lawmakers and political theorists environmental and civil rights activists developmental specialists and policymakers and those concerned with human rights in Latin America Official Gazette of the United States Patent and Trademark Office ,2003 **Labor Relations Reference Manual, Court Opinions, Volume 108** ,1982 **Measurement of Thermal Radiation Properties of Solids** Joseph C. Mbah,Walter Leal Filho,Sandra Ajaps,2022-10-21 This book states that whilst academic research has long been grounded on the idea of western or scientific epistemologies this often does not capture the uniqueness of Indigenous contexts and particularly as it relates to the achievement of the United Nations Sustainable Development Goals (SDGs) The SDGs were announced in 2015 accompanied by 17 goals and 169 targets These goals are the means through which Agenda 2030 for sustainable development is to be pursued and realised over the next 15 years and the contributions of Indigenous peoples are essential to achieving these goals Indigenous peoples can be found in practically every region of the world living on ancestral homelands in major cities rainforests mountain regions desert plains the arctic and small Pacific Islands Their languages knowledges and values are rooted in the landscapes and natural resources within their territories However many Indigenous peoples are now minorities within their homelands and globally and there is a dearth of research based on Indigenous epistemologies and methodologies Furthermore academic research on Indigenous peoples is typically based on western lenses Thus the paucity of Indigenous methodologies within mainstream

research discourses present challenges for implementing practical research designs and interpretations that can address epistemological distinctiveness within Indigenous communities There is therefore the need to articulate as well as bring to the nexus of research aimed at fostering sustainable development a decolonising perspective in research design and practice This is what this book wants to achieve The contributions critically reflect on Indigenous approaches to research design and implementation towards achieving the sustainable development goals as well as the associated challenges and opportunities The contributions also advanced knowledge theory and practice of Indigenous methodologies for sustainable development
