

Behandeling Functional Family Therapy (FFT)

Het behandelprogramma FFT (Functional Family Therapy) wordt gekenmerkt door een systeemgerichte aanpak. De oplossing voor het probleemgedrag van de jongere ligt volgens FFT in het verbeteren van de relaties tussen de gezinsleden. Door een positieve en persoonlijke benadering van alle gezinsleden zoekt de therapeut, samen met de gezinsleden, naar een manier waarop uiteindelijk iedereen medeverantwoordelijk kan worden voor de ontstane situatie.

■ Doelgroep

De behandeling richt zich op gezinnen waarvan een kind zeer problematisch gedrag vertoont. De behandeling is gericht op jongeren in de leeftijd van 12 tot 18 jaar. Er is een uitloop mogelijk naar 23 jaar, mits de desbetreffende jongere opgroeit binnen zijn gezin.

■ Doelstelling

FFT richt zich op het verbeteren van gezinsrelaties en onderlinge communicatie waardoor het probleemgedrag van de jongere vermindert.

■ Het effect van FFT

Internationaal wetenschappelijk onderzoek heeft aangetoond dat door FFT bij 80% van de jongeren het probleemgedrag vermindert. Daarnaast verbetert het functioneren van de gezinnen van deze jongeren en het aantal uithuisplaatsingen neemt af.

■ Het team

Om de kwaliteit van de behandeling te waarborgen wordt deze uitgevoerd door speciaal opgeleide therapeuten. Zij ontvangen wekelijks supervisie. Er is ook een psychiater verbonden aan het FFT behandelprogramma.

■ Werkwijze

De FFT-behandeling bestaat uit drie fasen:

1. Verbindings- en motiveringsfase

De therapeut helpt de gezinsleden het probleemgedrag van de jongere te begrijpen. Hoe komt het? Waar komt het vandaan? Samen met het gezin wordt besproken hoe het patroon doorbroken kan worden.

2. Gedragsveranderingsfase

De gezinsleden leren diverse vaardigheden die ze toe kunnen passen om de situatie te verbeteren.

3. Generalisatiefase

De therapeut maakt samen met het gezin een plan voor na de behandeling. Het doel van het plan is dat de dingen die goed gaan behouden kunnen blijven. Ook bevat het vervolgstappen en handvaten voor de momenten waarop het moeilijk gaat. De therapeut denkt indien nodig, mee over een doorverwijzing of vervolgbehandeling.

Integrative Family and Systems Treatment (I-FAST) J. Scott Fraser PhD, David Grove LISW-S, Mo Yee Lee PhD, Gilbert Greene PhD, Andy Solovey MSW, 2014-03-28 Funders of mental health services to youth and families have increasingly required providers to use treatments deemed to be evidence based There are several evidence based family treatment EBFT approaches found to be effective with the same types of presenting problems and populations All of these EBFTs claim to be based on similar theoretical approaches and have specified treatment protocols that providers must follow to be faithful to the model These EBFTs are expensive for agencies to establish and maintain Many agencies that initially adopted one of these EBFTs later de adopted it because they could not sustain it when billing Medicaid is the only way to pay for such services Meta analyses of treatment outcome studies have found that various theoretical approaches to therapy are effective but no one approach is more effective than any other What accounts for client improvement is not the specific treatment approach but rather the factors they all have in common To provide an effective affordable and flexible approach to family treatment the authors of this book developed and have conducted researched on an approach they call Integrative Family and Systems Treatment I FAST I FAST is a meta model organized around the common factors to family treatment Such a model does not require practitioners to learn a completely new way to provide treatment but rather it builds on and incorporates the clinical strengths and skills they already possess This book is a manual for how to faithfully and flexibly provide I FAST A manual for a meta model to treatment based on the common factors has never been provided This book provides clear guidelines illustrated by cases examples for not only how to provide I FAST but also how to teach and supervise it as well as how to integrate I FAST with the rest of an agency s services and programs **Clinical Handbook of**

Handbook of Family and Marital Therapy Sharon A. Shueeman, Benjamin B. Wolman, 2012-12-06 Family and marital therapies are rapidly becoming highly used methods of treatment of mental disorders and are no longer ancillary methods to individual psychotherapy The last few decades have brought about an increasing awareness of the fact that excluding organic etiology practically all mental disorders are caused fostered and or related to faulty interpersonal relations As a rule the earlier in life one is exposed to noxious factors the more severe is the damage Thus early child parents and child siblings interactions are highly relevant determinants of mental health and mental disorder Moreover parents themselves do not live in a vacuum Their marital interaction significantly contributes to their own mental health or to its decline and parent child relationships are greatly influenced by the nature of intraparental relationships Parental discord conflicts and abandonment affect the child s personality development Thus family and marital therapy is more than therapy it is an important contribution to the prevention of mental disorder The present volume is comprised of three parts The first primarily theoretical analyzes the fundamental aspects of marital and family therapy The second part describes the various therapeutic techniques and the last deals with several specific issues It gives me great
