Mathematical Logic Angelo Margaris, 1990-01-01 Attractive and well written introduction Journal of Symbolic Logic The logic that mathematicians use to prove their theorems is itself a part of mathematics in the same way that algebra analysis and geometry are parts of mathematics This attractive and well written introduction to mathematical logic is aimed primarily at undergraduates with some background in college level mathematics however little or no acquaintance with abstract mathematics is needed Divided into three chapters the book begins with a brief encounter of naive set theory and logic for the beginner and proceeds to set forth in elementary and intuitive form the themes developed formally and in detail later In Chapter Two the predicate calculus is developed as a formal axiomatic theory The statement calculus presented as a part of the predicate calculus is treated in detail from the axiom schemes through the deduction theorem to the completeness theorem Then the full predicate calculus is taken up again and a smooth running technique for proving theorem schemes is developed and exploited Chapter Three is devoted to first order theories i e mathematical theories for which the predicate calculus serves as a base Axioms and short developments are given for number theory and a few algebraic theories Then the metamathematical notions of consistency completeness independence categoricity and decidability are discussed The predicate calculus is proved to be complete The book concludes with an outline of Godel's incompleteness theorem Ideal for a one semester course this concise text offers more detail and mathematically relevant examples than those available in elementary books on logic Carefully chosen exercises with selected answers help students test their grasp of the material For any student of mathematics logic or the interrelationship of the two this book represents a thought provoking introduction to the logical underpinnings of mathematical theory An excellent text Mathematical Reviews **The American Mathematical Monthly**, 1970 National Bureau of Standards Miscellaneous Publication, 1961 *Miscellaneous Publication - National Bureau of Standards* United States.
