Family Practices In Later Life Ageing And The Lifecourse:

Ageing, Independence, and the Life Course Sara Arber, 1993 Using a life course approach which emphasises the importance of recognising the effects of different life experiences on different groups of individuals and the interlinkage between phases of the life course the book explores the ways in which bases of structural advantage and disadvantage have cumulative impacts on the situation of older people

Valuing Older People Edmondson, Ricca, von Kondratowitz, Hans-Joachim, 2009-07-20 This collection offers a lively and creative response to contemporary challenges of ageing and how to understand it

Aging and the Life Course Deborah Lowry, 2022-01-10 Aging part II explores the experiences and conditions of aging especially in particular groups and part III presents current research on older adults engagement in work family social networks and sex Finally Part IV addresses themes of aging and social change

[Aging and the Digital Life Course](#) David Prendergast, Chiara Garattini, 2017-06 Across the life course new forms of community ways of keeping in contact and practices for engaging in work healthcare retail learning and leisure are evolving rapidly This book examines how developments in smart phones the Internet cloud computing and online social networking are redefining experiences and expectations around growing older in the twenty first century Drawing on contributions from leading commentators and researchers across the world this book explores key themes such as caregiving the use of social media robotics chronic disease and dementia management gaming migration and data inheritance to name a few

Population Ageing from a Lifecourse Perspective Kathrin Komp, Stina Johansson, 2016-06-01 Populations around the globe are ageing rapidly This demographic shift affects families market structures and social provisions This timely volume part of the Ageing and the Lifecourse series argues that the lifecourse perspective helps us understand the causes and effects of population ageing The lifecourse perspective suggests that individuals experiences at an early age can influence their decisions and behaviour at a later age This much needed volume combines insights from different disciplines and real life experiences to describe the theories and practices behind this idea It therefore caters to the needs of scholars practitioners and policy makers in a range of areas including sociology and political science

Older Widows and the Life Course Pat Chambers, 2018-01-18 Later life widowhood is the expectation of most older wives since statistically women live longer than men and tend to marry men older than themselves Despite this there has been little coverage of the complexities of later life widowhood In this book Pat Chambers redresses this balance combining an analysis of the literature that does exist with qualitative research amongst older widows The research reveals a multi faceted experience of later life widowhood Older widows life stories challenge the dominant public narrative of misery and decline pointing instead to a complexity of experience which is rooted in personal biography and the female life course rather than in later life widowhood itself Chambers develops the concept of multiple narratives as a way of uncovering the complex but often hidden lives of older widows Without such an understanding she argues it is all too easy to subscribe to the powerfully dominant public narrative and thus to misinterpret older widows

current needs and aspirations This is an engaging and original study of a key topic for gerontological research and will be of great interest to sociologists and social policy scholars who study ageing and the life course **The Life Course** Stephen J. Hunt, 2017-09-16 Dramatic social transformation in Western society over recent decades has had a profound impact on the way the life course is studied While people continue to experience the implications of class gender ethnicity and of course age they are more than ever able to take personal control of their own lives The Life Course considers how in a diverse and uncertain world the previously predictable stages of life are no longer fixed but increasingly open to change Focusing on continuities and change this book looks not only at the different phases of life but also at the transformation of a number of closely related social institutions such as the family education and the workplace Recognising that the established cradle to grave view is now outdated the trajectory from infancy and youth to later and end of life is followed not as a stable object of study but as a starting point for critical analysis This second edition offers an essential overview of the sociology of the life course incorporating both contemporary and conventional perspectives It calls upon current theorising around the life course as well as on up to date empirical research data This thought provoking text is relevant to researchers and students of life course studies and sociology as well as to those in nursing social work and related caring professions Addressing the Sexual Rights of Older People Catherine Barrett, Sharron Hinchliff, 2017-11-02 There is growing evidence that the sexual rights of older people are not being met One reason perhaps the main reason relates to the way that old age is viewed In many cultures being old is associated with decline and disease which positions older people as dependent and powerless Furthermore an absence of positive or celebratory discourses around older people's sexuality is particularly striking The book addresses a gap in research and policy Using an adaptation of the Declaration of Sexual Rights from the World Association of Sexual Health it provides readers with an innovative and evidence based framework for achieving the sexual rights of older people Drawing on interdisciplinary research it explores the cultural and social locations of old age and its intersections with sexual orientation gender identity and intersex status Key themes include stigma silencing invisibility prejudice discrimination and a lack of information awareness and understanding Addressing the Sexual Rights of Older People Theory Policy and Practice is a text for academics health professionals social professionals service providers and policy makers It is a timely and insightful collection which suggests ways to apply the sexual rights framework raise awareness and engage communities in constructing strategies for reform *Housing and Life Course Dynamics* Rory Coulter, 2023-05-18 Deepening inequalities and wider processes of demographic economic and social change are altering how people across the Global North move between homes and neighbourhoods over the lifespan This book presents a life course framework for understanding how the changing dynamics of people's family education employment and health experiences are deeply intertwined with ongoing shifts in housing behaviour and residential pathways Particular attention is paid to how these processes help to drive uneven patterns of population change within and across neighbourhoods and localities

Integrating the latest research from multiple disciplines the author shows how housing and life course dynamics are together reshaping 21st century inequalities in ways that demand greater attention from scholars and public policy makers
