Source inconnue **Hyper-organization** Patricia Bromley, John W. Meyer, 2015 *Hyper Organization* offers an institutional explanation for the expansion of formal organization in the contemporary era in numbers internal complexity social domains and national contexts Much expansion is hard to justify in terms of technical production or political power it lies in areas such as protecting the environment promoting marginalized groups or behaving with transparency The authors argue that expansion is supported by widespread cultural rationalization characterized by scientism rights and empowerment discourses and an explosion of education These cultural changes are transmitted through legal accounting and professionalization principles driving the creation of new organizations and the elaboration of existing ones The resulting organizations are constructed to be proper social actors as much as functionally effective entities They are painted as autonomous and integrated but depend heavily on external definitions to sustain this depiction So expansion creates organizations that are whatever their actual effectiveness structurally arational This book advances theories of social organization in three main ways First by giving an account of the expansive rise of organization rooted in rapid worldwide cultural rationalization Second explaining the construction of contemporary organizations as purposive actors rather than passive bureaucracies or loose associations Third showing how the expanded actorhood of the contemporary organization and the associated interpenetration with the environment dialectically generate structures far removed from instrumental rationality

success story there were injustices as the more vulnerable struggled to access good quality food and some businesses received inadequate help The authors consider the winners and losers in a time of rapid social change the lasting impacts on the UK food system and lessons to be learned for a food system dependent on imports and large retailers and with a high burden of diet related health issues      *New Civil Engineer* ,1977
