from developed countries The challenges mentioned above are the main sources of motivation for writing this book The faculty members involved in the book s writing are people who have experienced those challenges All have a long educational background and besides they are involved in the financial markets and some of whom are in decision making positions Each of the sections contains real world and Turkey examples values current financial practices and new theories The price of this book has been kept as low as possible Thus it is aimed to contribute to both our students and the economy of the country Financial managers students academicians and other interested in the financial sector will benefit from the theories examples problem solutions and recommendations contained in the book We wish the book to be useful to students and all interested in finance

The financial markets have undergone a significant development process both qualitatively and quantitatively and partly induced by major pushes for globalization and deregulation In this context finance has taken on an increasingly central role for companies and is now on par with production and sales which have always been the cornerstones of business management The effects of these structural and functional changes are not limited to the way companies operate but also imply a change in corporate cultures one consequence of this phenomenon is the large percentage of managers from the world of finance at the top tiers of corporate organizations Moreover environmental turbulence has forced companies to increasingly face negative situations characterized by economic and financial imbalances that may require far reaching strategic changes The purpose of this book therefore is to investigate the possible financial strategies that companies in distress can adopt in this regard it approaches financial strategies as opportunities to resolve
