Geyer,2021-06-09 This memoir is the first to review all of Antarctica's volcanism between 200 million years ago and the Present. The region is still volcanically active. The volume is an amalgamation of in-depth syntheses which are presented within distinctly different tectonic settings. Each is described in terms of 1 the volcanology and eruptive palaeoenvironments, 2 petrology and origin of magma and 3 active volcanism including tephrochronology. Important volcanic episodes include astonishingly voluminous mafic and felsic volcanic deposits associated with the Jurassic break up of Gondwana, the construction and progressive demise of a major Jurassic to Present continental arc including back arc alkaline basalts and volcanism in a young ensialic marginal basin, Miocene to Pleistocene mafic volcanism associated with post subduction slab window formation, numerous Neogene alkaline volcanoes including the massive Erebus volcano and its persistent phonolitic lava lake that are widely distributed within and adjacent to one of the world's major zones of lithospheric extension, the West Antarctic Rift System, and very young ultrapotassic volcanism erupted subglacially and forming a world wide type example, Gaussberg.

**Actas de Las VIII Jornadas de Concurrencia** Diego Cazorla López,2000 La proliferación actual de sistemas concurrentes en general debido al abaratamiento sustancial de poderosos sistemas de cómputo y el auge cada vez mayor que toman las aplicaciones distribuidas hace que cada vez sea más interesante el estudio de los sistemas concurrentes en todos los aspectos de la Informática. La mayor complejidad y tamaño de los secuenciales convencionales exige el uso de técnicas adecuadas tanto para su diseño y análisis como para su posterior implementación práctica. Este libro contiene las comunicaciones que han sido presentadas en la Octava edición de las Jornadas de Concurrencia celebradas en Cuenca en junio de 2000. Este es un foro para el intercambio de experiencias entre los investigadores nacionales tanto de la Universidad como de la Industria en el campo de los sistemas concurrentes y por tanto en él se muestran tanto los resultados teóricos como las aplicaciones industriales más recientes en esta materia.
