It's all about light. The ability to see, influence, modify, control, and create light will take your images from snapshots to great shots. In *Lighting for Digital Photography: From Snapshots to Great Shots*, photographer and bestselling author Syl Arena begins with a primer on light itself: how to see its direction, intensity, color, contrast, and hardness, and quickly moves on to discussions of shooting both indoors and outdoors in the many different conditions of natural or man-made light. Then the book digs in to begin creating light with photographic lights, whether that's small flash or big strobe, the pop-up flash on your DSLR or continuous lights. Follow along with Syl and you will learn the basics and beyond of light modifiers that make light bigger and softer, such as umbrellas, softboxes, beauty dishes, and diffusion panels. Understand how to control and shape the light itself with flags, grids, snoots, and the zoom function on your flash.
