Eureka Math A Story Of Ratios Grade 7 Module 2 Rational Numbers:

Eureka Math, A Story of Ratios: Grade 7, Module 2 Great Minds, 2013-12-09 Common Core Mathematics is the most comprehensive CCSS based mathematics curriculum available today. The modules are sequenced and paced to support the teaching of mathematics as an unfolding story that follows the logic of mathematics itself. They embody the instructional shifts and the standards for mathematical practice demanded by the CCSS. Each module contains a sequence of lessons that combine conceptual understanding, fluency and application to meet the demands of each topic in the module. Formative assessments are included to support data driven instruction. The modules are written by teams of master teachers and mathematicians. The New York Edition is nearly identical to the national version but available earlier for the 2013-2014 school year.

Eureka Math A Story of Ratios

Eureka Math is based on the theory that mathematical knowledge is conveyed most clearly and effectively when it is taught in a sequence that follows the story of mathematics itself. In A Story of Ratios, our middle school curriculum, this sequencing has been joined with methods of instruction that have been proven to work in this nation and abroad. These methods drive student understanding beyond process to deep mastery of mathematical concepts. The goal of Eureka Math is to produce students who are not merely literate but fluent in mathematics. This teacher edition is a companion to Eureka Math online and EngageNY Sequence of Grade 7 Modules: Module 1 Ratios and Proportional Relationships, Module 2 Rational Numbers, Module 3 Expressions and Equations, Module 4 Percent and Proportional Relationships, Module 5 Statistics and Probability, Module 6 Geometry.

Eureka Math is a comprehensive content rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction and descriptions of mathematical models. The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade 7 provides an
