REACH Regulation for Chemicals Lucas Bergkamp, 2013-10-24 This book discusses the law and practice of the European Union's new chemical regulatory programmes known under the acronym REACH. REACH is intended to ensure the safe management of risks associated with chemical substances throughout the supply chain. Its scope is very broad, subject to limited exceptions. REACH applies to all bulk chemicals used in industrial processes and to chemicals present in products such as cleaning products, paints, clothing, furniture, and electrical appliances. The newly established European Chemicals Agency (ECHA), the Commission, and member state authorities are in charge of administering the various parts of the REACH Regulation, creating a complex patchwork of government powers, procedures, and oversight. The volume is written by experienced REACH practitioners. It addresses both the key legal regulatory issues associated with REACH and the key management and practical challenges. In addition to analysing the scope, the processes, and the obligations of the industry under REACH, the book covers the strategy and management of REACH compliance from the perspective of the regulated entities. The focus is on the strategic and practical decisions facing companies subject to REACH's various regimes. Significant attention is paid to REACH consortia, which are a key instrument in compliance management, and to the competition law issues arising in connection with REACH consortia. It also covers legal remedies, enforcement, intellectual property rights, and civil liability for damages arising from chemical substances, as well as how companies can shape their REACH compliance programme to reduce their liability exposure. Fish and Diadromy in Europe (ecology, management, conservation)

Sylvie Dufour, Etienne Prevost, Eric Rochard, Patrick Williot, 2008-08-24 Most of the diadromous fish of the world have decreased in distribution and abundance since the beginning of the twentieth century. They are now threatened, and important conservation issues arise. The causes of these trends vary among species and basins, but regional human impact, damming, pollution, fisheries, and global change in climate are suspected to be responsible for these difficulties. This book contains selected papers from an international symposium organised by the Diadfish network, held in Bordeaux, France, in 2005. Readers will find up-to-date information on the ecology, ecotoxicology, and physiology of several diadromous species: Atlantic salmon, shads, lampreys, eels, and this whole group in Europe. Main impacts are also documented and analysed in case studies, and solutions or remediation actions are presented. **Foundations of Mental Health Promotion**
