Ethics and Criminal Justice John Kleinig, 2008 **The Broadview Introduction to Philosophy Volume II: Values and Society** Andrew Bailey, 2019-06-18 This volume of The Broadview Introduction to Philosophy offers an intriguing selection of readings on ethics social political philosophy and issues of life death and happiness Canonical texts from historical figures such as Plato Hobbes and Wollstonecraft are included alongside contemporary selections from such thinkers as Claudia Card Judith Jarvis Thomson and Ta Nehisi Coates Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms The Palgrave Handbook of Applied Ethics and the Criminal Law Larry Alexander, Kimberly Kessler Ferzan, 2019-12-02 This handbook consists of essays on contemporary issues in criminal law and their theoretical underpinnings Some of the essays deal with the relationship between morality and criminalization Others deal with criminalization in the context of specific crimes such as fraud blackmail and revenge pornography The contributors also address questions of responsible agency such as the effects of addiction or insanity and some deal with punishment its mode and severity and the justness of the state's imposition of it These chapters are authored by some of the most distinguished scholars in the fields of applied ethics criminal law and jurisprudence **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 2008 List of members in v 1 **Ends and Means in Policing** John Kleinig, 2019-03-01 Policing is a highly pragmatic occupation It is designed to achieve the important social ends of peacekeeping and public safety and is empowered to do so using means that are ordinarily seen as problematic that is the use of force deception and invasions of privacy along with considerable discretion It is often suggested that the ends of policing justify the use of otherwise problematic means but do they This book explores this question from a philosophical perspective The relationship between ends and means has a long and contested history both in moral practical reasoning and public policy Looking at this history through the lens of policing criminal justice philosopher John Kleinig explores the dialectic of ends and means whether the ends justify the means or whether the ends never justify the means and offers a new sharpened perspective on police ethics After tracing the various ways in which ends and means may be construed the book surveys a series of increasingly concrete issues focusing especially on those that arise in policing contexts The competing moral demands made by ends and means culminate in considerations of noble cause corruption dirty hands theory lesser degradations such as tear gas tasers chokeholds and so on and finally those means deemed impermissible by the majority in Western culture such as torture

Ethics and Situational Crime Prevention Thomas Søbirk Petersen, 2024-07-25 This book addresses the ethics of

Situational Crime Prevention SCP It seeks not only to analyse specific SCP measures but to demonstrate how ethical analysis can support and improve the implementation of SCP strategies In ethically analysing a particular SCP measure it is not enough to look at empirical data Even if a measure is effective at preventing crime it may turn out to be ethically unattractive because it harms more people than it benefits or because it violates our right to free movement The book proceeds from the assumption that decision making about whether we should use SCPs can only be conducted by carefully identifying clarifying and critically evaluating the ethical arguments for and against use of the SCP measure in question The author analyses several SCP strategies that have not been treated in detail in criminology or applied ethics literatures These SCP strategies include gated communities excluding people with a criminal record from housing or employment the use of hostile design in public spaces and the implementation of intelligent speed adaption in vehicles Ethics and Situational Crime Prevention is an essential resource for criminologists moral philosophers legal scholars and social scientists with an interest in crime prevention
