ontological personal medical moral legal cultural social political religious and environmental In navigating through such a complex web of issues it has been said that the central problems philosophers and bioethicists face are ethical in nature In this regard biomedical sciences and technological breakthroughs take a leading role in terms of shaping the sorts of questions that give rise to ethical problems For example is it ethical to keep terminally ill patients alive on dialysis machines or artificial ventilators Is it ethical to take someone's vital organs upon death and transplant them into another person's body without any prior consent from the deceased person Reproductive techniques also raise complicated ethical issues involving in vitro fertilization contraceptives prenatal testing abortions and genetic enhancements Moreover biomedical issues raise ethical problems regarding research on human subjects stem cell research and enhancement biotechnology The beginning and end of life issues bring up their own complicated ethical conundrums involving among other things terminating life support and euthanasia This book approaches such complex bioethical questions by engaging in ground level debates about the ontology of persons This is a nonnegotiable first step in taking steps forward in seeking a plausible solution's for the complex ethical problems in bioethics      Ethical Theory - Second Edition Heimir Geirsson, Margaret Holmgren, 2010-05-07

characterized by sudden blazing temper on both sides and also by long periods of weariness boredom and disengagement It is not that conflict which might arise from temporary private troubles from having a bad day or going through a bad patch for it is there week in week out and involves significant numbers Such conflict has been of interest to both psychologists and sociologists of education and important contributions have been offered by both of these disciplines Sociologists have mapped out the differing cultural values and norms which appear to promote it They have identified the social constraints present within the environment in which it is produced constraints which emanate from the socio economic organization of society and from the maintenance of an institutional framework and which affect the micro dynamics of teacher pupil interaction Psychologists have described the effects on behaviour of genetic factors environmental conditions and cognitive states Important though such insights are however they can only speak indirectly to teacher practice This book provides an educational approach to the subject discussing topics including theoretical considerations teacher pupil discussion and relationships between classroom behaviour and the curriculum It will appeal to those involved with schools and education as well as psychologists educational sociologists and researchers
