Eunomia New Order For A New World:

Eunomia Philip Allott,1990 It is impossible to imagine a world completely free of war Or is it In an age when the search for peaceful cohabitation between nations of the world has taken on a new and vibrant urgency when what is needed is a model from which to fashion an international society that will hold firm in peace for generations to come the tragic truth is that the ambitions of twentieth century peacemakers have been thwarted by a system of international diplomacy which mocks the idea of peace *Netherlands Yearbook of International Law - 2003* Niels M. Blokker, N. J. Schrijver, 2011-01-07 Two major factors brought about the establishment of the Netherlands Yearbook of International Law in 1970 demand for the publication of national practice in international law and the desirability for legal practitioners state representatives and international lawyers to have access to the growing amount of available data in the form of articles notes etc The Documentation section contains an extensive review of Dutch state practice from the parliamentary year prior to publication an account of developments relating to treaties and other international agreements to which the Netherlands is a party summaries of Netherlands judicial decisions involving questions of public international law many not published elsewhere lists of Dutch publications in the field and extracts from relevant municipal legislation Although the NYIL has a distinctive national character it is published in English and the editors do not adhere to any geographical limitations when deciding upon the inclusion of articles

understand the enormous recent changes in military strategy and global politics

Regional Integration and Democracy Jeffrey J. Anderson, 1999 This work explores the interrelationship between democracy and regional integration Although centred in Europe the volume shifts terms of discussion on integration and democracy by including case studies outside of Europe It also analyzes the European Union's democratic deficit the impact of regional integration on national democracy and the dynamic interactions between democracy and integration elsewhere in the world

International Society and the Making of International Order Günther Auth, 2005 Theorising within the American discipline of International Relations has been plagued by a rather severe intellectual crisis Theorists have meant that they need to emulate the natural sciences of the eighteenth and nineteenth centuries in outlook and argumentative style But this has destroyed much awareness for the nature of modern international relations as a dynamically evolving historical process This book seeks to overcome the vicissitudes of mainstream theorising by abandoning the discipline's scientism and by adopting a stance that is more in tune with the standards of modern social science

The European Union's Shaping of the International Legal Order Dimitry Kochenov, Fabian Amtenbrink, 2014 This book offers a new approach to the study of EU law of external relations

A Critical Humanitarian Intervention Approach K. Butler, 2011-05-25 A Critical Humanitarian Intervention Approach explores ways of reconceptualising security in terms of Ken Booth's Theory of World Security This approach focusing on human development more broadly can improve upon the theoretical and practical limitations of solidarist theories on the subject of humanitarian intervention

Socializing Development Leon Valentin Schettler, 2020-09-04 As Multilateral Development Banks increasingly gained influence in shaping global development transnational social movements pushed to hold them accountable for their human rights impact towards communities Leon Valentin Schettler presents a novel causal mechanism of movement advocacy towards MDBs combining disruptive and conventional tactics Systematically comparing the evolution of human rights standards and complaint mechanisms over the last three decades he reveals how the combination of 1 declining US hegemony 2 counter mobilization by China and 3 movement cooptation by the World Bank bureaucracy led to a dilution of human rights accountability in the 2010s

Minority Issues in Europe: New Ideas and Approaches Tove H. Malloy, Caitlin Boulter, 2019-03-18 As the political landscape of Europe transforms so too does the field of minority issues New areas of focus encompass topics as varied as populism and media representation anthropological insights and intersectional feminist considerations education in human rights and participatory mechanisms and the changing categories and roles of minority communities as important actors in a variety of forums Volume 2 of *Minority Issues in Europe* reflects a growing range of disciplinary approaches to the field and a fresh outlook on the issues facing Europe's diverse communities Bringing together research from experienced experts and young researchers this book aims to equip students with critical and considered insights to some of the most pressing questions in minority studies today

The Power of Language in the Making of International Law Stephane Beaulac, 2004-04-01 The purpose of this book is to

enter into the history of the mental social phenomena that are the word sovereignty and the myth of Westphalia Given the circularity of language the project proposes to examine the reality creating role of language as an organic instrument of social power within humanity In semiotic terms the complex structures of words and also myths form part of sign systems in which they can both represent and create reality These are the passive and active functions of language which explain that words and myths not only represent and describe reality but may also play a leading part in creating and transforming reality thus demonstrating and being used to carry fabulous power within humanity The Peace of Westphalia is analysed to show that in spite of what actually took place in 1648 Westphalia has had an incredible social effect in international law standing for the proposition that it signalled the beginning of a new era based on state sovereignty However it is argued that Westphalia constitutes a myth an aetiological myth which has provided a way for society to explain itself to itself that is a way for international society to explain its genesis to itself As regards sovereignty it is shown that Jean Bodin introduced the word in Six Livres for the purpose of having the French ruler enjoy supreme power in the hierarchical organisation structure of society This is the original creative and transforming social effect on the shared consciousness of humanity for which the linguistic sign must be credited which has continued unaltered to this day With respect to Droit des Gens it is demonstrated that Emer de Vattel utilised and actually changed the reality associated with sovereignty also for a specific reason namely to carry out its externalisation the ruling entity was now to enjoy exclusive power to govern which entailed being the sole representative of the people both internally and externally and also meant that it could not be submitted to any foreign state or to any higher law externally Vattel s use of the word has had an extraordinary effect on the shared consciousness of society including that of the emerging international society which is still very much present today These two archetype cases in which sovereignty developed show how this word has really had two paradigms over the years that is it has represented and created the two distinct realities of the internal and the international

International Relations, Political Theory, and the Problem of Order Nicholas J. Rengger, 2000 This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory

Limits of Global Governance Margot Ely, 1991 This book is essential reading for those with research interests in Global Politics International Relations and Globalisation Jacket

For the Sake of Present and Future Generations Suzannah Linton, Gerry Simpson, William A. Schabas, 2015-07-14

law for the sake of present and future generations

Environmental Policy in Search of New Instruments B.

Dente,2013-03-09 Environmental policy is undergoing a dramatic transformation The problems connected with global change the need for preventative action and the growing importance of non source pollution call for new courses of action and new institutional arrangements In this situation it is fairly obvious that both the traditional command and control policy instruments and the more modern financial and economic instruments are increasingly under stress This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies In doing so it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors On the basis of a shared theoretical framework the book explores the potential of new policy instruments such as policy evaluation or mediation proposes alternative institutional arrangements for dealing with the issues classifies existing instruments and illuminates the process through which old and new tools can be set into operation

Land Reform Policy Ben Chigara,2019-06-04

Originally published in 2004 The book examines the possibility of resolving past and continuing social injustices that are rooted in colonial or some such other similar experience of states from a variety of perspectives First the issue is examined from an international law perspective which evaluates the validity of counter claims to title to land in affected SADC states Secondly the issue is examined from a human rights perspective which privileges promotion for the respect of the inherent dignity of all persons Thirdly the issue is examined from victimology and psychology schools of thought in order to understand both the effect and impact on stakeholders of the operative dynamics in conflicts that arise from long standing social injustices that are connected to colonial or some such other similar historical experience of States The book proposes humwefficiency as a model for resolution of this type of conflict This model targets preservation of the inherent dignity of all stakeholders by combining international human rights morality with local intuition about land ownership and use In this sense the book takes human rights theory beyond politics and utopia and applies it to foster new social engineering technologies for the resolution of social injustices and promotion of social justice This is justified by the fact that the human rights culture has evolved in a considerably short period of time to become the dominant culture of the world

Strategic Visions for Human Rights Geoff

Gilbert,Francoise Hampson,Clara Sandoval,2010-09-13 Strategic Visions for Human Rights takes a multi disciplinary approach to future directions for human rights It looks beyond what international human rights treaties have so far established and considers the context in which rights in the twenty first century might develop to meet needs The book examines how international law might be utilized to protect groups rather than just individual members of the group and it also calls into question the liberal positivist approach to international law that provides the framework for human rights norms The contributors to this volume are well known academics in the field of human rights and include Francesca Klug Conor Gearty David Beetham and Asbjorn Eide Amongst some of the issues addressed in the book are the future of the

European Court of Human Rights the role of academics play in engendering transition to post conflict democratic states and human rights and religious pluralism **International Law and Ethics After the Critical Challenge** Euan

MacDonald,2011-03-05 Recasting the critical challenge to international law in positive terms this book examines what is left of international law if we accept both that apolitical rules are impossible and that the values used to justify them are irreducibly radically subjective

Sustainable Development and Good Governance Erik Denters,Konrad Ginther,Paul J.I.M. de Waart,2023-08-28 The chapters in this volume are based on the papers that were presented at a seminar in March 1994 organized under the auspices of the newly established ILA Committee on Legal Aspects of Sustainable Development The seminar focused on the legal principles and international practice of sustainable development and good governance as one of its constitutive elements The book is divided into four parts Evolution of Concepts Participatory Development Development Cooperation and Human Rights and Sensible Economic and Social Policies They reflect the holistic concept of sustainable development advanced by the International Union for the Conservation of Nature sustainable development This concept implies that maintaining a quality of life for many generations is socially desirable economically viable and ecologically sustainable The volume highlights the principle of sustainable development as a major topic in international law embodied in the international instruments agreed upon at the UN Conference on Environment and Development in Rio de Janeiro 1992 The introductory chapter discusses the interlinking of development and good governance including human rights democracy and sensible economic and social policies as presented in the 1994 UN Agenda for development The management of the economy society and environment towards sustainability will be one of the most momentous discussions of our times According to one author sustainable development is incompatible with continuous growth of the economy while good governance appears to be incompatible with the achievement within a reasonable time scale of a non growth society Other provocative opinions make this volume a highly challenging source for any scholar interested in the subject

Chance, Order, Change: The Course of International Law, General Course on Public International Law James

Crawford,2014-04-29 Chance Order Change The Course of International Law General Course on Public International Law by J Crawford The course of international law over time needs to be understood if international law is to be understood This work aims to provide such an understanding It is directed not at topics or subject headings sources treaties states human rights and so on but at some of the key unresolved problems of the discipline Unresolved they call into question its status as a discipline Is international law law properly so called In what respects is it systematic Does it can it respect the rule of law These problems can be resolved or at least reduced by an imaginative reading of our shared practices and our increasingly shared history with an emphasis on process In this sense the practice of the institutions of international law is to be understood as the law itself They are in a dialectical relationship with the law shaping it and being shaped by it This is explained by reference to actual cases and examples providing a course of international law in some standard sense as well
