The Political Economy of Organ Transplantation Hagai Boas, 2022-09-09 This thought provoking work examines how the relationships of organs tissues and cells transferred from one body to another through donation sale or gift are mediated by the state market and family The book is a thorough review of the sociological anthropological and ethical literature surrounding transplant organs but encased within the author's own personal dilemmas and lived experience His work skillfully underscores the negotiations and accommodations inherent in the use of these technologies and reveals the situatedness of decisions that belie any simplistic readings of the ethics of transplantations This is a stimulating and accessible book for those with an interest in transplantation ethics or the social implications of medical technologies Its strength lies in the reflexive accounts from the author of his own experience juxtaposed with the sensitive appraisals of the workings of the state market and family in the organ economy Andrea Whittaker Monash University reviewed for Social Forces This innovative work combines a rigorous academic analysis of the political economy of organ supply for transplantation with autobiographical narratives that illuminate the complex experience of being an organ recipient Organs for transplantations come from two sources living or post mortem organ donations These sources set different routes of movement from one body to another Postmortem organ donations are mainly sourced and allocated by state agencies while living organ donations are the result of informal relations between donor and recipient Each route traverses different social institutions determines discrete interaction between donor and recipient and is charged with moral meanings that can be competing and contrasting The political economy of organs for transplants is the gamut of these routes and their interconnections and this book suggests how such a political economy looks like what are its features and contours its negotiation of the roles of the state market and the family in procuring organs for transplantations and its ultimate moral justifications Drawing on Boas personal experiences of waiting searching and obtaining organs each autobiographical section of the book sheds light on a different aspect of the discussed political economy of organs post mortem donations parental donation and organ market and illustrates the experience of living with the fear of rejection and the intimidation of chronic shortage A Political Economy of Organ Transplantation is of interest to students and academics with an interest in bioethics sociology of health and illness medical anthropology and science and technology studies

The Publishers' Trade List Annual, 1988 Bioethics Yearbook B.A. Lustig, B.A. Brody, H. Tristram Engelhardt Jr., Laurence B. McCullough, 2013-04-17 As noted in Volume 1 the Yearbook series alternates between a biennial volume tracing recent theological discussions on topics in bioethics and a biennial volume tracing recent regional discussions in bioethics Volume 2 provides for the first time a comprehensive single volume summary of recent international and regional developments on specific topics in bioethics To give uniformity to the discussions all authors were asked to report on the following topics new reproductive technologies abortion maternal fetal conflicts case of severely disabled newborns consent of treatment and experimentation confidentiality

equitable access to health care ethical concerns raised by cost containment measures decisions to withhold or withdraw life sustaining treatment active euthanasia the definition of death organ donation and transplantation The internationally respected contributors report on the following 16 areas the United States Canada Latin America the United Kingdom and Ireland France the Netherlands Germany Austria Switzerland Eastern Europe Spain Portugal Italy Scandinavia India Southeast Asia China Japan Australia New Zealand Council of Europe EEC The commentators draw on three sets of resources Statutes legislative proposals and regulatory changes that directly influence or have implications for areas of bioethical concern Case law and court judgments that shape either decisively or suggestively recent legal interpretations of particular issues of areas in bioethics Formal statements of governmentally appointed commissions advisory bodies and representative professional groups as well as less formal statements and recommendations of other organisations In addition to providing timely summaries of recent developments the volume offers rich and useful bibliographical references to a wide array of documents many of which would be difficult for readers to learn about given the lack of centralized international collection of such documents The Yearbook should be widely consulted by all bioethicists public policy analysts lawyers and theologians

Philosophy of Medicine and Bioethics Ronald A. Carson, C.R. Burns, 2006-04-11 Papers presented at a symposium on philosophy and medicine at the Institute for the Medical Humanities at the University of Texas Medical Branch in 1974 were published in the inaugural volume of this series To help celebrate more than 20 years of extraordinary success with the series another symposium was convened in Galveston in 1995 The convenors asked the participants these questions In what ways and to what ends have academic humanists and medical scientists and practitioners become serious conversation partners in recent years How have their dialogues been shaped by prevailing social views political philosophies academic habits professional mores and public pressures What have been the key concepts and questions of these dialogues Have the dialogues made any appreciable intellectual or social difference Have they improved the care of the sick Authors respond from a variety of theoretical perspectives in the humanities They also articulate conceptions of philosophy of medicine and bioethics from various practice experiences and bring critical attention to aspects of the contemporary health policy

The New Genetic Medicine Thomas Anthony Shannon, James J. Walter, 2003 Since the 1970s the interrelated areas of medical genetics and biotechnology have developed dramatically and afforded increased control over the design of living organisms From the very beginning controversies over these techniques and their applications to plants animals and humans have raged in many disciplines including science philosophy ethics and religion This book brings together the seminal essays of two leading Catholic moral theologians Thomas Shannon and James Walter in an effort to identify the key ethical and theological questions raised by the new genetic medicine What is unique about this book is that it specifically and directly brings modern genetics and the Roman Catholic theological and ethical tradition into dialogue While the authors argue that the Catholic tradition has much to offer in putting this current scientific revolution into perspective they well understand the need to avoid merely repeating the tradition in favor of bringing the best of the tradition to bear on the precise questions posed by modern genetic technology

Religious Methods and Resources in Bioethics P.F. Camenisch, 2013-03-09 A volume on religious theological methods in biomedical ethics inevitably of whether the methodological dimension can be distinguished from the various other things that go on in ethical

discourse It is difficult to answer this question definitively since many elements in moral conversation can be interpreted in different ways Barbara Hilbert Andolsen illustrates this issue in this volume when she defines one of her crucial categories gender justice as being both procedural and substantive normative This difficulty of finally separating the methodological from the normative arises in many areas of contemporary ethical writing both feminist and otherwise Nevertheless it seems that in many cases we can separate out the methodological issues with considerable precision Albert Jonsen and James Childress achieve just such a sharp focus in their essays This does not mean that a careful dissecting of their papers would not reveal normative elements lurking about their methodological points It is simply to say that the issues they analyze and the positions they take are at least prima facie overwhelmingly methodological They are much more about how we think about ethical matters than they are about what we think about them Bibliography of the History of Medicine, 1984

The Space that Separates: A Realist Theory of Art Nick Wilson, 2019-08-23 The Space that Separates A Realist Theory of Art radically challenges our assumptions about what art is what art does who is doing it and why it matters Rejecting the modernist and market driven misconception that art is only what artists do Wilson instead presents a realist case for living artfully Art is defined as the skilled practice of giving shareable form to our experiences of being in relation with the real that is to say the causally generative domain of the world that extends beyond our direct observation comprising relations structures mechanisms possibilities powers processes systems forces values ways of being In communicating such aesthetic experience we behold life's betweenness the space that separates so coming to know ourselves as connected Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective Aesthetic Critical Realism ACR Wilson argues for a profound paradigm shift in how we understand and care for culture in terms of our systems of value recognition Fortunately we have just the right tool to help us achieve this transformation and it's called art Offering novel explanatory accounts of art aesthetic experience value play culture creativity artistic truth and beauty this book will appeal to a wide audience of students and scholars of art aesthetics human development philosophy and critical realism as well as cultural practitioners and policy makers
