End This Depression Now:

End This Depression Now! Paul Krugman, 2012-04-30 A New York Times best selling call to arms from Nobel Prize winning economist Paul Krugman The Great Recession is more than four years old and counting Yet as Paul Krugman points out in this powerful volley Nations rich in resources talent and knowledge all the ingredients for prosperity and a decent standard of living for all remain in a state of intense pain How bad have things gotten How did we get stuck in what now can only be called a depression And above all how do we free ourselves Krugman pursues these questions with his characteristic lucidity and insight He has a powerful message for anyone who has suffered over these past four years a quick strong recovery is just one step away if our leaders can find the intellectual clarity and political will to end this depression now

End This Depression Now University Paul Krugman, 2015-02 Japanese edition of End This Depression Now by Paul Krugman winner of 2008 Nobel Prize in Economics and Professor of economics at Princeton Four years after the recession countries should be doing much better economically Why In Japanese Annotation copyright Tsai Fong Books Inc Distributed by Tsai Fong Books Inc **The Return of Depression Economics and the Crisis of 2008** Paul Krugman, 2009-08-25 Our newest Nobel Prize winning economist shows how today's crisis parallels the events that caused the Great Depression and explains what it will take to avoid catastrophe The End of Normal James K. Galbraith, 2014-09-09 The years since the Great Crisis of 2008 have seen slow growth high unemployment falling home values chronic deficits a deepening disaster in Europe and a stale argument between two false solutions austerity on one side and stimulus on the other Both sides and practically all analyses of the crisis so far take for granted that the economic growth from the early 1950s until 2000 interrupted only by the troubled 1970s represented a normal performance From this perspective the crisis was an interruption caused by bad policy or bad people and full recovery is to be expected if the cause is corrected The End of Normal challenges this view Placing the crisis in perspective Galbraith argues that the 1970s already ended the age of easy growth The 1980s and 1990s saw only uneven growth with rising inequality within and between countries And the 2000s saw the end even of that despite frantic efforts to keep growth going with tax cuts war spending and financial deregulation When the crisis finally came stimulus and automatic stabilization were able to place a floor under economic collapse But they are not able to bring about a return to high growth and full employment Today four factors impede a return to normal They are the rising costs of real resources the now evident futility of military power the labor saving consequences of the digital revolution and the breakdown of law and ethics in the financial sector The Great Crisis should be seen as a turning point a barometer of the rise of unstable economic conditions which should be regarded as the new normal Policies and institutions going forward should be designed above all modestly to cope with this fact maintaining conditions for a good life in difficult times Critiquing Krugman Justin Merrill, 2012-11-02 A critical review of Krugmanomics rooting out contradictions inconsistencies and ahistorical arguments proposed by Prof Paul Krugman since the Great Recession **Monthly Bulletin**
